

## Blackbaud Institute Shares Spotlight on 2023 Trends in Giving

April 8, 2024

*Based on Blackbaud's Robust Philanthropic Data Set, the Blackbaud Institute Shares New Insights on Last Year's Giving Trends and What Fundraisers Should Know for 2024*

CHARLESTON, S.C., April 8, 2024 /PRNewswire/ -- The Blackbaud Institute, a research lab at [Blackbaud](#) (NASDAQ: BLKB), the leading provider of software for powering social impact, today released new insights from Blackbaud's unmatched philanthropic dataset in its [2023 Trends in Giving Spotlight](#).

The Blackbaud Institute gives social impact professionals data to understand broader industry trends, benchmark success and take fundraising to new levels. This new series of quarterly spotlights will draw from Blackbaud's data and insights on charitable giving, nonprofit business operations, corporate social responsibility and more. The current spotlight provides a round-up of the charitable giving trends that defined 2023 and a look at the past five years, with tips on how organizations can make the most of this year.

"Looking back at the past year in fundraising, the trend that jumps out is stability," said Carrie Cobb, chief data officer, Blackbaud. "2023 can be seen as a bookend to a historic five-year story of charitable giving, with generosity remaining durable and today's giving levels sustaining well above their pre-pandemic norms."

### Key Findings:

- **Giving remains resilient.**
  - For average year-over-year changes normalized at the organization level, the 5-year compound annual growth rate of 1.79% illustrates a solid upward trend felt across the nonprofit sector, with giving at the average organization remaining well above pre-pandemic levels.
- **Online Giving continues to make gains.**
  - The percentage of charitable giving donated through online sources rose from almost 8% in 2022 to over 12% for the average organization in 2023.
  - This increase was felt across organization sizes and subsectors, but small organizations (revenue below \$1M) lead the pack with nearly 17% of the average organization's donations coming from online sources, and online giving as a whole increasing by 1.5% for the average organization.
- **Environmental causes—a favorite for Millennials and Gen Z—saw a strong 2023**
  - The three subsectors in which the average organization saw the largest increases in charitable giving in 2023 were: Environmental Organizations (+3.8%), Animal Welfare Organizations (+1.4%) and Medical Research (+1.3%).
  - These are also top causes for Millennials and Gen Zers. As the percentage of giving from online sources rises, optimizing online donation forms will make giving easier for Millennial and Gen Z donors. Gen Z donors report using an organization's website to donate at nearly twice the rate assumed by fundraising professionals.
