

Blackbaud[®]

Annual Report 2007

Make the world a better place

Corporate Profile

Nonprofit organizations
around the world use
Blackbaud software solutions
and consulting services

to increase donations, reduce fundraising costs, improve relationships with their constituents, and better manage their finances. We now have more than 19,000 customers spread over 55 countries, which gives us a unique perspective on the global nonprofit community. But we haven't forgotten our roots — our first customer, The Nightingale Bamford School in New York City, is still a client.

And their story is not unusual; we have one of the highest customer retention rates in the industry. This is probably because we partner with our

customers to fulfill their needs. From consulting and educational services to training and customer support, we do everything we can to ensure that our customers get the most out of our solutions and the maximum return on their investment.

Since our start in 1981, we have developed a wide range of technology solutions to meet the needs of nearly any type of nonprofit. Organizations such as the American Red Cross, Dartmouth College, the WGBH Educational Foundation, Cancer Research UK, Special Olympics, and the Arthritis Foundation have partnered with us to improve their operations so they can focus on their missions.

It is a great source of pride for us to have been a small part of these organizations' success and in return, they have helped us succeed. Today, we are recognized as the "industry standard" for nonprofit software.

Letter to the Stockholders

DEAR FELLOW STOCKHOLDERS,

“Make the world a better place by working with the nonprofit community to improve lives.” In 2007, we launched a major effort to clarify and

restate Blackbaud’s mission and the values that support it. What followed was a renewed sense of mission and focus on performance. In 2007, your company’s performance was above the high end of our expectations, both financially and in the progress achieved in our strategic growth initiatives. We acquired

the Target Companies and eTapestry, made impressive strides in growing our international business, successfully launched our Enterprise CRM and Direct Marketing solutions, and dramatically improved our Internet offerings. Each of these elements will continue to be a key component of our growth strategy for 2008 and beyond.

We continue to experience high levels of interest in our solutions, as the organizations that make up the nonprofit sector realize the importance of technology as a means to improve their efficiency and their ability to raise funds and achieve their missions.

We believe the market remains under-penetrated for the expanding range of solutions we offer; one indication of this is that the majority of our larger transactions in 2007, particularly those involving our Enterprise CRM offering, have been with brand new customers. Our goal in 2007 was to identify

and secure early adopters for our new offerings who could serve as reference accounts in the future. In the short time since we introduced our Enterprise CRM offering, we have enjoyed significant market interest, have closed two of the largest sales in Blackbaud’s history, and were selected by a number of very large organizations from the education, healthcare, religious, and health and social service market sectors because of our quality product solution. Several of these customers also purchased our Direct Marketing offering. Our first Enterprise CRM customer, a large state university, went live in the fourth quarter of 2007 at six of the nine campuses involved and is expected to add an additional three early in 2008.

In addition to our progress with Enterprise CRM and Direct Marketing, we enjoyed continued growth with our other new solutions, including Blackbaud NetCommunity, which had sales-growth of over 60% on a year-over-year basis, The Patron Edge, and our family of analytics offerings. Our success with these products, along with our eTapestry Software as a Service (SaaS) offering, which we believe is ideally suited to support the fundraising needs of smaller nonprofits, bodes well for 2008.

Internally, our efforts to clarify and restate Blackbaud’s mission and the values that support it led us to ask “why not improve lives by making our own world a better place to work?” A natural component of our mission is to hire, develop, and retain the best employees. In 2005, we were losing approximately one in three of our employees annually. At the end of 2007, we had reduced turnover to less than 15%. We are proud of the strides we’ve made and are targeting further progress in this area in 2008.

Financial Information

Our financial performance for 2007 was again excellent, with total revenue increasing 34% over 2006 to a total of \$257 million. Organic revenue growth, that is excluding the revenue contributions from the Target Companies and eTapestry, was 20%. Income from operations was \$52.4 million, an increase of just over 11% compared with 2006. Net income was \$31.7 million compared with \$30.2 million in the prior year, resulting in earnings of \$0.71 per share compared with \$0.68. Cash flow from operations for 2007 was \$62.8 million; we used this strong cash flow to help fund the Target and eTapestry acquisitions. We also paid a \$0.34 per share dividend in 2007, and on February 7, 2008, we announced an increase in the 2008 dividend to \$0.40, an increase of almost 18%.

Meeting the needs of a changing nonprofit landscape

The concept of philanthropy is an integral part of the American character, and it has been since the earliest days of the Republic. A report by the Kettering Foundation found that nine out of 10 Americans claim to give to nonprofits. The needs of our fellow citizens in the 21st century reflect major changes. Emergency food requests have doubled in the past three decades. The number of U. S. families without health insurance is up to 47 million, and government funding for social programs continues to drop. At the same time, confidence in nonprofits is at an all-time low, partially due to the instant access technology has created. Moreover, our social structure has changed. While their parents

habitually contributed to recognized nonprofits, today's young people seek immediacy and direct involvement. They are more connected to the organizations they support yet are more likely to stop giving when they perceive a need expressed by another. Addressing these socio-economic changes caused by technology requires the application of technology.

With more than 25 years of experience serving this market, Blackbaud understands these challenges and has developed technology that helps nonprofits meet and overcome them. We believe that our operational excellence, strategic understanding of the market, and our financial strength will help us maintain our market leadership and continue to grow in order to better serve the market's needs.

In closing, I want to thank our customers. They are indeed making the world a better place. It is an honor to serve them. Thanks also to our employees, each and every one. They are resourceful, dedicated, and hard-working; the heart of our commercial success; and they make Blackbaud an exciting place to work. Finally, thanks to you, our stockholders. Your loyal support is most appreciated, and we will work to continue to merit your support in 2008 and the years beyond.

Sincerely,

Marc E. Chardon
President and Chief Executive Officer

Stock Performance

Below is a graph comparing cumulative total return on \$100 invested, alternatively, in our common stock; the Center for Research in Security Prices (CRSP) Total Market Return Index for the NASDAQ® Stock Market; and a peer group industry index based on the standard industrial code for computer programming, data processing, and other computer-related

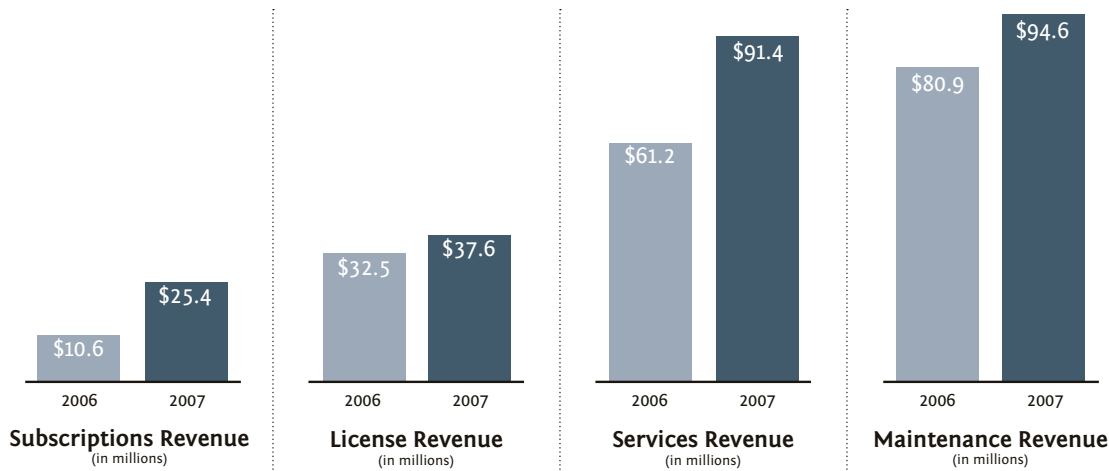

services, for the period commencing on July 26, 2004, the first date our common stock was traded on NASDAQ®, and ending on December 31, 2007. We paid quarterly dividends at an annual rate of \$0.28 and \$0.34 per share for the fiscal years ending December 31, 2006 and 2007, respectively, and the graph assumes reinvestment of such dividends.

Five-Year Cumulative Total Return

| | 7/26/2004 | 12/31/2004 | 12/30/2005 | 12/29/2006 | 12/31/2007 |
|--------------------------------|-----------|------------|------------|------------|------------|
| BLKB Blackbaud Common Stock | 100.00 | 167.31 | 195.45 | 297.48 | 320.86 |
| CRSP Total Market Return Index | 100.00 | 117.70 | 120.20 | 132.06 | 143.21 |
| Peer Group | 100.00 | 121.09 | 125.20 | 140.57 | 171.77 |

Financial Results

Over the last five years, we grew revenue at a compound annual growth rate of over 19%. This performance has been the direct result of increased adoption of our traditional mid-market software solutions, development and sales of new products and services, and a continuous focus on customer support and satisfaction.

In 2007, we generated \$257 million in revenue and \$62.8 million in cash flow from operations. Our license revenue in 2007 was \$37.6 million, services revenue was \$91.4 million, maintenance revenue was \$94.6 million, and subscriptions revenue was \$25.4 million. We generated almost \$63 million in cash from operations.

Our common stock is listed on the NASDAQ® Global Select Market under the ticker symbol BLKB.

Environmental Notes

One of Blackbaud's core values is to be good stewards of our resources. That's why we selected Opus paper for the narrative of this annual report. Opus is certified by the Forest Stewardship Council. This environmentally responsible paper boasts 10% post-consumer fiber and a Forest Stewardship Council chain of custody. All of the electricity used to manufacture Opus sheets is Green-e-certified renewable energy.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains certain statements that may be deemed to be “forward-looking statements” that anticipate results based on our estimates, assumptions and plans that are subject to uncertainty. These statements are made subject to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements in this report not dealing with historical results or current facts are forward-looking and are based on estimates, assumptions and projections. Statements which include the words “believes,” “seeks,” “expects,” “may,” “should,” “intends,” “likely,” “targets,” “plans,” “anticipates,” “estimates” or the negative version of those words and similar statements of a future or forward-looking nature identify forward-looking statements.

Although we attempt to be accurate in making these forward-looking statements, it is possible that future circumstances might differ from the assumptions on which such statements are based. In addition, other important factors that could cause results to differ materially include those set forth under “Item 1A. Risk factors” and elsewhere in this report and in our other SEC filings. We undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

PART I

Item 1. *Business*

Overview

We are the leading global provider of software and related services designed specifically for nonprofit organizations. Our customers use our products and services to help increase donations, reduce fundraising costs, improve communications with constituents, manage their finances, and optimize operations. We have focused solely on the nonprofit market since our incorporation in 1982. At the end of 2007, we had approximately 19,000 customers spread over 55 countries. Our customers come from nearly every segment of the nonprofit sector, including education, foundations, health and human services, religion, arts and cultural, public and societal benefits, environment and animal welfare, and international and foreign affairs.

Industry background

The nonprofit industry is large and growing

A 2006 study by the Johns Hopkins Nonprofit Employment Data Project shows that nonprofits employ nearly 10% of the work force in the United States, and more if volunteers are included. There were more than 1.5 million U.S. nonprofit organizations registered with the Internal Revenue Service in 2006, and there are approximately another 1.7 million nonprofit organizations internationally. Moreover, from 2001 to 2006, the average growth rate for the market was approximately 3%.

Donations to nonprofit organizations in the U.S. were \$295 billion in 2006, having increased almost every year since 1962. The compound annual growth rate from 1996 to 2006 was 7.6%, according to *Giving USA*. These organizations also receive fees of approximately \$850 billion annually for services they provide. Worldwide, nonprofit organizations account for \$1.3 trillion in total annual expenditures, according to the Johns Hopkins Nonprofit Employment Data Project.

Traditional methods of fundraising are costly and inefficient

Many nonprofits use manual methods or stand-alone software applications not designed to manage fundraising. Such methods are often costly and inefficient because of the difficulties in effectively collecting, sharing, and using donation-related information. Furthermore, general purpose and Internet-related software applications

frequently have limited functionality and do not efficiently integrate multiple databases. Based on our market research, nearly a quarter of every dollar donated is used for fundraising expenses alone. Some nonprofit organizations have developed proprietary software, but doing so is expensive, requiring on-site technical personnel for development, implementation, and maintenance.

The nonprofit industry faces particular operational challenges

Nonprofit organizations must efficiently:

- Solicit funds and build contact with major donors;
- Garner small cash contributions from numerous contributors;
- Manage complex relationships with the large numbers of constituents;
- Comply with complex accounting, tax, and reporting issues that differ from traditional businesses;
- Solicit cash and in-kind contributions from businesses to help raise money or deliver products or services;
- Provide a wide array of programs and services to individual constituents; and
- Improve the data collection and sharing capabilities of their employees, volunteers, and donors by creating and providing distributed access to centralized databases.

Because of these challenges, we believe nonprofit organizations can benefit from software applications specifically designed to serve their particular needs.

The Blackbaud solution

Our products and services address the fundraising needs and operational challenges facing nonprofit organizations by providing them with software and services that help them increase donations, reduce the overall costs of managing their businesses, and build a strong sense of community while effectively managing communications with their constituents. We offer an operational platform through core software applications, plus an additional 40 extended applications to provide distinct, add-on functionality tailored to meet the specific needs of our diverse customer base. We also offer a suite of analytical tools and related services that enable nonprofit organizations to extract, aggregate, and analyze vast quantities of data to make better-informed operational decisions. In addition, we help our customers increase the returns on their technology investments by providing a broad range of consulting and professional services, as well as maintenance and technical support.

Nonprofit organizations use our products and services to increase donations

Managing the fundraising process is a critical business function for nonprofits. Our fundraising and constituent relationship management solutions allow nonprofit organizations to establish, maintain, and develop their relationships with current and prospective donors and other constituents. Our fundraising products and services enable them to use a centralized database, as well as the Internet and an array of analytical tools, to facilitate and expand their fundraising efforts. In addition, we believe our products and services help nonprofit organizations increase donations by enabling them to:

- Solicit large numbers of potential donors;
- Deliver personalized messages that drive constituent action;
- Provide an easy-to-use system for sharing and using critical fundraising information;
- Utilize our Internet-based offerings to receive online donations and support online volunteer and events management; and
- Simplify and automate business processes.

Nonprofit organizations use Blackbaud software, services and tools to improve operational effectiveness

Our comprehensive suite of software, services, and analytical tools help nonprofit organizations manage the key aspects of their operations. By automating business processes, our products streamline operations for our customers and help to reduce the overall costs of operating their organizations. For example, The Raiser's Edge and our other core products automate data collection processes, which eliminate cumbersome and inaccurate manual processes. We provide solutions that address many of the technological and business process needs of our customers, including:

- Constituent relationship management;
- Financial management and reporting;
- Cost accounting information for projects and grants;
- Integration of financial data and donor information in a centralized system;
- Student information systems designed for independent schools and small colleges;
- Ticketing and event management;
- Data analysis and reporting tools and services;
- Management of complex volunteer networks; and
- Results tracking for multiple campaigns.

Our strategy

Our objective is to maintain and extend our position as the leading provider of software and related services designed specifically for nonprofit organizations. Key elements for achieving this objective are to:

Grow our customer base

We intend to continue to expand our industry-leading customer base and enhance our market position. We have established a strong market presence with approximately 19,000 customers and, in a 2007 nonprofit market survey by Addison Whitney, 30% of respondents were familiar with Blackbaud. We believe that the fragmented nature of the industry presents an opportunity for us to continue to increase our market penetration. We plan to achieve this objective by leveraging our experience, our existing customer base, and our strong brand recognition. We also intend to expand our overall sales efforts, especially national accounts and enterprise-focused sales teams.

Maintain and expand existing customer relationships

We have historically had success selling maintenance renewals and additional products and services to existing customers. In each of the past four years, an average of more than 95% of our customers renewed their maintenance and support plans. We will continue to pursue opportunities to better serve our existing customer base by increasing both the number of our products and services they use and the frequency with which they use them. To this end, we have a dedicated sales team that focuses exclusively on selling products and services to existing customers.

Introduce additional products and services

We intend to use our expertise and experience in developing leading products for the nonprofit industry to introduce additional products and related services. We will build stronger relationships with existing customers and attract new customers. We believe that our existing proprietary software can form the foundation for an even wider range of products and services for nonprofit organizations. Our current products share approximately

one-third of our proprietary code, and we anticipate that future product offerings will also share this backbone. We believe this shared code allows us to more cost efficiently expedite the development and rollout of new products.

Pursue strategic acquisitions and alliances

We intend to selectively pursue acquisitions and alliances in the future with companies that provide us with complementary technology, customers, and personnel with significant relevant experience, as well as to increase our access to additional geographic and vertical markets. We have completed eight acquisitions in the past five years, including the acquisition of Target Software, Inc. and Target Analysis Group, Inc. or the Target Companies, in January 2007, along with the acquisition of eTapestry.com, or eTapestry, in August of 2007. We are also currently involved in a number of strategic relationships. We believe that our size and our history of leadership in the nonprofit sector make us an attractive acquirer or partner for others in the industry.

Enable customers to effectively utilize the Internet as a comprehensive business tool

We will enhance our existing products and develop new products and services that will allow our customers to more fully utilize the Internet to effectively achieve their missions. Although online fundraising comprises a small percentage of all charitable contributions, our 2007 State of the Nonprofit Industry survey indicates that online donations are growing as a percentage of total contributions and that nonprofits are benefiting from this trend. We have web-enabled our core applications and currently offer a variety of Internet applications and consulting services that allow nonprofits to leverage the Internet for online fundraising, e-marketing, alumni and membership directories, newsletters, event management, and volunteer coordination.

Expand international presence

The United Kingdom, Canada, and Australia, as well as other international markets, represent growing market opportunities for our products and services. We currently have international operations in Glasgow, Scotland; London, England; Toronto, Canada; and Sydney, Australia; we believe the overall market of international nonprofit organizations is changing. Donations to domestic and international nonprofit organizations are increasing in response to reductions in governmental funding of certain activities. U.S.-based nonprofit organizations are growing their international activities and opening overseas locations. We believe the international marketplace is currently underserved, and we intend to increase our international presence by expanding our sales and marketing efforts. We will make use of our installed base of customers to sell complementary products and services, and we will develop and offer new products tailored to international markets.

Products and services

We license software and provide various services to our customers. We generate revenue in six reportable segments and in four geographic regions, as described in more detail in Note 14 of our consolidated financial statements. These revenue segments are license fees, maintenance fees, and subscription fees for our software products, consulting and education services, analytic services, and others.

Software products

Fundraising and Constituent Relationship Management

The Raiser's Edge

The Raiser's Edge is the leading software application specifically designed to manage nonprofit organizations' constituent relationship management activity. The Raiser's Edge enables nonprofit organizations to communicate with their constituents, manage fundraising activities, expand their development efforts, and make better

informed decisions through powerful segmentation, analysis, and reporting capabilities. It provides a comprehensive dashboard view that shows users important performance indicators for campaigns, appeals, funds, events, proposals, and membership drives. The Raiser's Edge is highly configurable, allowing a nonprofit organization to create numerous custom views of constituent records and automate a variety of business processes. Among other things, The Raiser's Edge allows an organization to access extensive biographical and demographic information about donors and prospects, process gifts, monitor solicitation activity, analyze data, and publish reports. The Raiser's Edge improves operational efficiency and effectiveness by reducing overall mailing costs, offering faster data entry and gift processing, supporting major donor cultivation, and using the Internet to send email appeals and accept online donations. The Raiser's Edge also integrates with Microsoft® Office® to enable users to take advantage of additional functionality.

In addition to the standard functionality of The Raiser's Edge, we have built a number of extended applications to address the specific needs of various market segments, examples of which are described below.

| Module Name | Key Features/Benefits |
|-------------------------------|--|
| RE: Event | Helps plan, organize, and manage all aspects of fundraising events |
| RE: Volunteer | Coordinates an organization's volunteer work force |
| RE: Member | Tracks the identity of members, manages membership activities |
| Recurring Gifts Management | Enables easy management and processing of monthly giving |
| RE: Search | Manages prospective, planned, and major gift donors from identification and profiling to the cultivation and solicitation of major gifts |
| RE: Alum | Helps an organization reach, solicit, and better manage its alumni constituency |
| RE: Tribute | Tracks all gifts made in honor or memory of an individual or individuals and facilitates properly acknowledging the donor and honoree |
| RE: Electronic Funds Transfer | Allows an organization to easily process gifts made by credit card or by direct debit from donors' bank accounts |
| RE: NetSolutions | Enables online fundraising, e-marketing, event management, and volunteer coordination |

Blackbaud Enterprise CRM

Blackbaud Enterprise CRM is a flexible, scalable, and secure Constituent Relationship Management (CRM) solution that addresses the unique needs of larger nonprofit organizations. Currently in an early adopter program phase, Blackbaud Enterprise CRM helps large institutions build their brands, develop deeper and more personalized relationships with their constituencies, and gain organizational efficiencies. Blackbaud Enterprise CRM brings together disparate information, such as annual and capital giving, gift planning, major giving, and alumni and parent systems, across multiple locations and within the departments and programs of a large organization. With a single system of record that can be securely and efficiently shared, larger organizations are able to turn their data into timely, actionable information that maximizes their advancement efforts, synchronizes campaigns across departments and programs, and strengthens relationships with constituents.

eTapestry

eTapestry is a Software-as-a-Service, or SaaS, fundraising solution built specifically for smaller nonprofits. It tracks donors, prospects, or alumni while managing gifts, pledges, and payments. eTapestry has been built to be operated in a hosted environment and be accessed via the Internet. The latest technology provides a sophisticated

system that is simple to maintain, costs little to operate, and is intuitively easy to learn without extensive training. It offers nonprofit organizations a cost-effective way to manage donors, process gifts, create reports, accept online donations, and communicate with constituents.

Financial Management

The Financial Edge

The Financial Edge is an accounting application designed to address the specific accounting, analytical and financial reporting needs of nonprofit organizations. It integrates with The Raiser’s Edge to simplify gift entry processing and relate information from both systems in an informative manner to eliminate redundant tasks. The Financial Edge improves the transparency and accountability of organizations by allowing them to track and report from multiple views, measure the effectiveness of programs and other initiatives, use budgets as monitoring and strategic planning tools, and supervise cash flow. As a result, The Financial Edge provides nonprofit organizations with the means to help manage fiscal and fiduciary responsibility, enabling them to be more accountable to their constituents. In addition, The Financial Edge is designed specifically to meet governmental accounting and financial reporting requirements prescribed by the Financial Accounting Standards Board and Governmental Accounting Standards Board.

As with The Raiser’s Edge, we have built extended applications to address the specific functional needs of our customers, examples of which are described below.

| Module Name | Key Features/Benefits |
|---------------------------|---|
| Purchase Orders | Provides a variety of options for generating and tracking purchase orders issued to vendors |
| eRequisitions | Automates the requisition and purchase order process by enabling multiple departments, sites, and budget managers to make purchasing requests electronically in a web-enabled application |
| Electronic Funds Transfer | Allows an organization to make and record electronic payments |
| Cash Management | Provides on online register to manage and reconcile multiple bank and cash accounts in a centralized repository |
| Cash Receipts | Provides flexible means of recording and tracking where cash receipt amounts originated, produces a detailed profile of each related transaction, and prints a deposit ticket |
| Payroll | Automates in-house payroll processing |
| Fixed Assets | Stores the information required to properly track and manage property and equipment and the costs associated with them |
| Student Billing | Provides independent schools the ability to perform billing functions and process payments |
| School Store Manager | Manages sales, inventory control, and other administrative tasks for school stores |
| Accounting Forms | Enables an organization to print certain accounting and business forms cost effectively |

School Management

The Education Edge

The Education Edge is a comprehensive student information management system designed principally to organize an independent school’s admissions and registrar processes, including capturing detailed student

information, creating class schedules, managing attendance records and performance/grades, producing demographic, statistic, and analytical reports, and printing report cards and transcripts. With The Education Edge, an organization can keep biographical and address information for students, parents, and constituents consistent across all of its Blackbaud software products. This integrated system allows an independent school to reduce data-entry time and ensure that information is current and accurate throughout the school.

Blackbaud's Student Information System

Blackbaud's Student Information System is a complete software solution designed for small colleges and other institutions of higher education with a full-time enrollment of less than 5,000. The solution links student information across all campus offices and includes functionality designed specifically to organize the admissions and registrar's processes. In addition, Blackbaud's Student Information System can be combined with other applications to offer integration across back-office functions, providing one-time entry for biographical information, financial reliability, and audit trail functionality. This helps significantly reduce time spent on data maintenance and creation of class schedules and allows institutions to communicate efficiently with prospects, students, and alumni.

Online Solutions

Blackbaud NetCommunity

Blackbaud NetCommunity is an Internet marketing and communications tool that enables organizations to build interactive websites and manage email marketing campaigns. With Blackbaud NetCommunity, organizations can establish online communities for social networking among constituents and also provide a platform for online giving, membership purchases, event registration, and more. Blackbaud NetCommunity is the only product of its kind that integrates with The Raiser's Edge to give a single source of up-to-date constituent information across an entire organization.

Ticketing

The Patron Edge

The Patron Edge is a comprehensive ticketing management solution specifically designed to help large or small performing arts organizations, museums, zoos, and aquariums boost attendance and increase revenue. The Patron Edge can be integrated with The Raiser's Edge to allow for a complete profile view of patrons, donors, or visitors. The Patron Edge offers a variety of ticketing methods and allows customers to save time and costs by streamlining ticketing, staffing, scheduling, event and membership management, and other administrative tasks.

Business Intelligence

The Information Edge

The Information Edge is a scalable business intelligence solution designed specifically to meet the needs of nonprofit organizations. The Information Edge includes robust reporting, analysis, and performance management capabilities. The Information Edge allows an organization to use data from The Raiser's Edge and The Financial Edge and then integrate that data into a data warehouse allowing for high-speed queries and complex analysis and reporting.

Direct Marketing

Blackbaud Direct Marketing

Blackbaud Direct Marketing allows nonprofit organizations to achieve integrated campaign planning by managing direct marketing campaigns with multiple types of media and channels. It delivers campaign management capabilities including planning and budgeting, predictive analysis and list segmentation, campaign

execution, and performance measurement and reporting. The result is that nonprofit organizations can more easily manage their marketing campaigns while maximizing the return on investment of their direct marketing efforts. Nonprofit organizations can integrate Blackbaud Direct Marketing with Blackbaud Enterprise CRM or The Raiser's Edge to combine fundraising functions, such as major giving programs, with direct marketing campaigns.

Consulting services

Our consultants provide conversion and implementation services for each of our software products. These services include:

- System implementation, including all aspects of installation and configuration to ensure a smooth transition from the customer's legacy system and to create a more streamlined business workflow;
- Management of the data conversion process to ensure data is a reliable and powerful source of information for an organization;
- Business process analysis and application customization to ensure that the organization's system is properly aligned with an organization's processes and objectives;
- Removal of duplicate records, database merging and enrichment, information cleansing and consolidation, and secure credit card transaction processing;
- Database production activities that include direct marketing, business intelligence, cultivation, and stewardship processes; and
- Website design services, Internet strategy consulting, and specialized services such as email marketing and search engine optimization.

In addition, we apply our industry knowledge and experience, combined with expert knowledge of our products, to evaluate an organization's needs and provide business process improvement consulting. This work is performed by staff consultants, who have extensive and relevant domain experience in all aspects of nonprofit management, accounting, project management, and IT services. This experience and knowledge allows us to make recommendations and implement best practices to help our customers reach their goals. In addition, we offer software customization services to organizations that do not have the time or in-house resources to create customized solutions using our core products. We believe that no other software company provides as broad a range of consulting and technology services and solutions dedicated to the nonprofit industry.

Education services

We provide a variety of classroom, onsite, distance-learning, and self-paced training services to our customers relating to the use of our software products and application of best practices. Our software instructors have extensive training in the use of our software and present course material that is designed to include hands-on lab exercises, as well as course materials with examples and problems to solve.

Blackbaud OnDemand

Blackbaud OnDemand provides our customers with a convenient, affordable alternative to setting up and managing Blackbaud applications on their own. Our technical team will set up and manage on an ongoing basis the hosting of one or more Blackbaud systems on our secure servers and ensure that they can be relied upon to be accessible and current on a 24/7 basis. All that is needed to connect is a web browser. We manage everything from initial data setup through network security configuration.

Analytics services

Target Analytics

Target Analytics was formed in early 2008 by combining Blackbaud's prospect research division with the newly acquired Target Analysis Group. Target Analytics offers a comprehensive range of products and services for nonprofit organizations' analytics needs. These include donor acquisition and development, prospect segmentation, wealth identification, and collaborative peer benchmarking. Target Analytics offers software, solutions, and services such as:

Acquisition Lists—Target Analytics' acquisition mailing lists are custom-built using the Nonprofit Cooperative Database, the first national cooperative database designed exclusively for nonprofit mailing lists and response modeling. The database was developed to help locate the best prospects for each organization and make acquisition efforts more productive.

WealthPoint—A database screening solution that delivers detailed wealth identification information on prospects. WealthPoint provides initial prospect qualification, assists with prospect cultivation, and delivers information on financial capacity and recommends appropriate "ask" amounts and gift types.

ProspectPoint—A custom data modeling solution that delivers critical information on a prospect's or donor's likelihood to make a gift to an organization. It analyzes current and historical data from external sources and behavioral trends to identify an organization's best potential annual, planned, and major giving prospects.

The Researcher's Edge—Houses all the results from ProspectPoint, WealthPoint, and an organization's own research in a secure environment and allows prospect researchers to manage vast amounts of data.

donorCentrics—A set of strategic analytic and benchmarking tools designed to drive fundraising at nonprofit organizations. These reports uncover strengths and weaknesses in fundraising programs, highlight opportunities for growth, and facilitate strategy-sharing across organizations.

Data Enrichment Services—Services that enrich the quality of the data in our customers' databases. These include a service that finds outdated address files in the database and makes corrections based on the requirements and certifications of the United States Postal Service and a service that uses known fields in an organization's constituent records to search and find lost donors and prospects.

Maintenance

Most of our customers enroll in one of our maintenance and support programs. In each of the past four years, more than 95% of our customers have renewed their maintenance plans. Customers enrolled in the plans enjoy fast, reliable customer support, receive regular software updates, stay up-to-date with support newsletters, and have unlimited, around-the-clock access to support resources, including our extensive knowledgebase and forums. Customers who enroll in upgraded maintenance plans receive enhanced benefits.

Customers

We have customers in every principal vertical market within the nonprofit industry. At the end of 2007, we had approximately 19,000 customers, including customers from the Target Companies and eTapestry, of which 97% paid annual maintenance and support fees. These organizations range from small, local charities to healthcare and higher education organizations, to the largest national health and human services organizations. No one customer accounts for more than 2% of our annual revenue.

Sales and marketing

The majority of our software and related services are sold through direct sales forces, but the Target and eTapestry divisions also sell through a number of referral partners, agencies, and service partners. Our direct

sales force is complemented by a team of account development representatives responsible for sales lead generation and qualification. As of December 31, 2007, we had approximately 398 sales and marketing employees. These sales and marketing professionals are located at our headquarters in Charleston, South Carolina; at the Target Companies' and eTapestry's home bases in Cambridge, Massachusetts, and near Indianapolis, Indiana, respectively; and in metropolitan areas throughout the United States, the United Kingdom, Canada, and Australia. We plan to continue expanding our direct sales force in the Americas, Europe, and Asia.

Our sales force is divided into two main areas of responsibility:

- Selling products and services to existing customers; and
- Acquiring new customers.

In addition, a dedicated portion of our sales team is focused exclusively on large, enterprise-wide accounts. We have a group of sales engineers who support both new and existing customers in this market segment. In general, sales representatives are responsible for handling one product line in a designated geographic area. However, sales representatives for the K-12 independent schools market, small college market, and the arts and cultural market are responsible for selling all of our software products. We generally begin a customer relationship with the sale of one of our primary products, such as The Raiser's Edge or Blackbaud Enterprise CRM, and then sell additional products and services to the customer as its needs increase.

We conduct marketing programs to create brand recognition and market awareness for our products and services. Our marketing efforts include participation at tradeshow, technical conferences, and technology seminars, publication of technical and educational articles in industry journals, and preparation of competitive analyses. Our customers and strategic partners provide references and recommendations that we often feature in our advertising and promotional activities.

We believe relationships with third parties can enhance our sales and marketing efforts. We have and will continue to establish additional relationships with companies that provide services to the nonprofit industry, such as consultants, educators, publishers, financial service providers, complementary technology providers, and data providers. These companies promote or complement our nonprofit solutions and provide us access to new customers.

Corporate philanthropy and volunteerism

We believe that service to others makes the world a better place and champion this value through our global corporate philanthropy and employee-focused programs. In addition to having employees select grant recipients for our endowment fund, we celebrate individual acts of service through a competitive grant program that honors excellent examples of volunteerism and benefits the organizations they serve.

Competition

The market for software and related services in the nonprofit sector is fragmented, competitive, and constantly evolving. For certain areas of the market, entry barriers are low. On the other hand, our experience and product depth makes us a formidable competitor. We expect to continue to see new competitors as the market matures and as nonprofit organizations become more aware of the advantages and efficiencies attainable through the use of specialized software. A number of diversified software enterprises have made acquisitions or developed products for the market, including Sage and SunGard. Other companies, such as Microsoft, Salesforce.com, and Oracle have greater marketing resources, revenue, and market recognition than we do. While they do not offer products that are designed specifically for nonprofits, some of their products do have a degree of functionality for nonprofits that could be considered competitive. These larger companies could decide to enter the market with new, directly competitive products or through acquisitions of our current competitors.

We mainly face competition from four sources:

- Software developers offering specialized products designed to address specific needs of nonprofit organizations;
- Custom-developed solutions;
- Providers of traditional, less automated fundraising services; and
- Software developers offering general products not designed to address specific needs of nonprofit organizations.

We compete with several software developers that provide specialized products, such as on-demand software specifically designed for nonprofit use. In addition, we compete with custom-developed solutions created either internally by the nonprofit organization or outside by custom service providers. We believe that we compete successfully against these companies, as building a custom solution requires extensive financial and technical resources that may not be available or cost-effective for the nonprofit organization. In addition, the nonprofit organization's legacy database and software system may not have been designed to support the increasingly complex and advanced needs of today's growing community of nonprofit organizations.

We also compete with providers of traditional, less automated fundraising services, including parties providing services in support of traditional direct mail campaigns, special events fundraising, telemarketing, and personal solicitations. Although there are numerous general software developers marketing products that have some application in the nonprofit market, these competitors have generally neglected to focus specifically on this market and typically lack the domain expertise to cost effectively build or implement integrated solutions for its needs. We believe we compete successfully against these traditional fundraising services, primarily because our products and services are more automated, more robust, and more efficient.

Research and development

We have made substantial investments in research and development and expect to continue to do so as a part of our strategy to introduce additional products and services. As of December 31, 2007, we had approximately 260 employees working on research and development. Our research and development expenses for the years ending on December 31, 2007, 2006, and 2005 were \$28.5 million, \$23.1 million, and \$21.1 million, respectively.

Technology and architecture

Our newest products, such as Blackbaud Enterprises CRM and Blackbaud Direct Marketing, are built on the Microsoft® .Net™ framework platform. These products are web-delivered applications utilizing a Service Oriented Architecture built on Internet standards and protocols such as HTTP, XML, and SOAP. This architecture is designed to support flexible deployment scenarios including both on-premise, as well as hosted by Blackbaud in a Software-as-a-Service model. The applications expose web service application programming interfaces so that functionality and business logic can be accessed programmatically from outside the context of an interactive user application. This allows our customers to extend and modify the functionality of our applications without requiring them to make any source code or data modifications themselves. This is important for customers who want to customize our applications by incorporating their own business logic into key areas of the applications. The end result is a robust customization platform through which the application can be modified and extended without requiring source code alteration.

Our version 7.x generation products utilize a three-tier client server architecture, built on the Microsoft® Component Object Model (COM). The architecture of both our .Net and COM-based development models ensure our applications are:

- *Flexible.* Our component-based architecture is programmable and easily customized by our customers without requiring modification of the source code, ensuring that the technology can be extended to accommodate changing demands of our clients and the market.

- *Adaptable.* The architecture of our applications allows us to easily add features and functionality or to integrate with third-party applications in order to adapt to our customers' needs or market demands.
- *Scalable.* We combine a scalable architecture with the performance, capacity, and load balancing of industry-standard web servers and databases used by our customers to ensure that the applications can scale to the needs of larger organizations.

We have and intend to continue to license technologies from third parties that are integrated into our products. Currently, we believe that the loss of any third party technology integrated into our products would not have a material adverse effect on our business. However, our inability to obtain licenses for third-party technology for future products could delay product development, which in turn could harm our business and operating results.

Intellectual property and other proprietary rights

To protect our intellectual property, we rely on a combination of patent, trademark, copyright, and trade secret laws in various jurisdictions, as well as employee and third-party nondisclosure agreements and confidentiality procedures. We have a number of registered trademarks, including "Blackbaud" and "The Raiser's Edge". We have applied for additional trademarks. We currently have six patents pending on our technology, including functionality in The Financial Edge, The Information Edge, and ProspectPoint.

Employees

As of December 31, 2007, we had 1,655 employees, consisting of 398 in sales and marketing, 260 in research and development, 489 in consulting and professional services, 231 in customer support, 82 in subscriptions, and 195 general and administrative personnel. None of our employees are represented by unions or are covered by collective bargaining agreements. We are not involved in any material disputes with any of our employees, and we believe that relations with our employees are satisfactory.

Where you can find additional information

Our website address is www.blackbaud.com. We make available, free of charge through our website, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports as soon as is reasonably practicable after such material is electronically filed with or furnished to the SEC. The SEC maintains an Internet site that contains these reports at www.sec.gov.

Executive officers of the registrant

The following table sets forth certain information concerning our executive officers as of February 27, 2008:

| <u>Name</u> | <u>Age</u> | |
|----------------------|------------|---|
| Marc E. Chardon | 52 | President and Chief Executive Officer |
| Timothy V. Williams | 58 | Chief Financial Officer, Senior Vice President, Treasurer and Assistant Secretary |
| Louis J. Attanasi | 46 | Senior Vice President of Strategic Technologies |
| Charles T. Cumbaa | 55 | Senior Vice President of Products and Services |
| Lee W. Gartley | 43 | Senior Vice President, President of Target Division |
| Charles L. Longfield | 51 | Chief Scientist |
| John J. Mistretta | 52 | Senior Vice President of Human Resources |
| Heidi H. Strenck | 38 | Senior Vice President, Controller, Assistant Treasurer and Assistant Secretary |
| Gerard J. Zink | 44 | Senior Vice President of Customer Support |

Marc E. Chardon joined us in November 2005. Previously, Mr. Chardon served as chief financial officer for the \$11 billion Information Worker business group at Microsoft, where he was responsible for the core functions of long-term strategic financial planning and business performance management. He joined Microsoft in August 1998 as general manager of Microsoft France. During his three-year leadership, the subsidiary remained one of the three most admired companies by French professionals and achieved increased customer satisfaction. Prior to joining Microsoft, Mr. Chardon was general manager of Digital France. He joined Digital in 1984, and held a variety of international marketing and business roles within the company. In 1994, Mr. Chardon was named director, office of the president, with responsibility for Digital's corporate strategy development. Mr. Chardon is an American/French dual national. He is an economics honors graduate from Harvard University.

Timothy V. Williams has served as our Chief Financial Officer since January 2001. Mr. Williams is responsible for all of our financial reporting and controls, as well as human resources and legal. From January 1994 to January 2001 he served as Executive Vice President and CFO of Mynd, Inc. (now a subsidiary of Computer Sciences Corporation), a provider of software and services to the insurance industry. Prior to that, Mr. Williams worked at Holiday Inn Worldwide, most recently as Executive Vice President and Chief Financial Officer. Mr. Williams serves on the Board of Directors of PROS Holdings, Inc., a publicly traded software development company. Mr. Williams holds a BA from the University of Northern Iowa.

Louis J. Attanasi has led our Strategic Technologies group since 2000. Prior to that, he was our Vice President of Product Development since 1996. He joined us in 1986, and in 1988, he began managing our research and development efforts. From 1988 through 1995, Mr. Attanasi was responsible for our software design. Prior to joining us, he taught mathematics at the State University of New York at Stony Brook and worked as a programming engineer at Environmental Energy Corporation. Mr. Attanasi holds a BS in Mathematics from State University of New York at Stony Brook and a MS in Mathematics from the University of Charleston.

Charles T. Cumbaa, our senior Vice President of Services and Development, joined us in May 2001. Prior to joining us, Mr. Cumbaa was an Executive Vice President with Intertech Information Management from December 1998 until October 2000. From 1992 until 1998 he was President and Chief Executive Officer of Cognitech, Inc., a software company he founded. Prior to that, he was employed by McKinsey & Company. Mr. Cumbaa holds a BA from Mississippi State University and an MBA from Harvard Business School.

Lee W. Gartley joined us in January 2007 as a Senior Vice President as part of our acquisition of the Target Companies. Mr. Gartley remains as President of and is responsible for the day-to-day operations of the Target division. Prior to joining the Target companies in 1998, Mr. Gartley was a senior marketer with Art Technology Group from 1996 until 1998 where he helped to launch an online commerce platform. From 1992 to 1996 he was a management consultant with Boston Consulting Group working with clients in a variety of industries to develop and implement sound strategy. Mr. Gartley holds a BA in Physics from Bowdoin College and an MBA from the Kellogg Graduate School of Management.

Charles L. Longfield became our Chief Scientist in January 2007 as part of our acquisition of the Target Companies, both of which he founded. Mr. Longfield has extensive experience designing and implementing national as well as international constituency databases that address the fundraising information needs at many of the world's largest nonprofit organizations. Mr. Longfield holds a BA in Mathematics and a M.Ed. from Harvard University and has over 25 years of experience helping nonprofits automate their fundraising operations.

John J. Mistretta, our Senior Vice President of Human Resources, joined us in August 2005. Prior to joining us, Mr. Mistretta was an Executive Vice President of Human Resources and Alternative Businesses at National Commerce Financial Corporation from 1998 to 2005. Earlier in his career, Mr. Mistretta held various senior Human Resources positions over a thirteen year period at Citicorp. Mr. Mistretta holds a Masters of Science in Counseling and a BA in Psychology from the State University of New York at Oswego.

Heidi H. Strenck has served as our Senior Vice President and Controller since January 2007. From October 2002 until January 2007, Ms. Strenck served as our Vice President and Controller. Ms. Strenck joined us in September 1996 and held key management roles as Accounting Manager from 1996 until 1997 and as Controller until 2002. Prior to joining us, she served as a Senior Associate with Coopers & Lybrand and as Internal Auditor for The Raymond Corporation. Ms. Strenck holds a BA from Hartwick College.

Gerard J. Zink has served as our Senior Vice President of Customer Support since January 2007 and Vice President of Customer Support since June 1996. Mr. Zink is responsible for all of our customer support, as well as information technology and administrative services. He joined us in November 1987, and served as a Customer Support Analyst and Manager of Customer Support before assuming his current position. Prior to joining us, Mr. Zink was employed as a computer consultant by the Diocese of Rockville Center in New York.

Item 1A. Risk factors

Our business operations face a number of risks. These risks should be read and considered with other information provided in this report.

A substantial portion of our revenue is derived from The Raiser's Edge and a decline in sales or renewals of this product and related services could harm our business.

We derive a substantial portion of our revenue from the sale of The Raiser's Edge and related services, and revenue from this product and related services is expected to continue to account for a substantial portion of our total revenue for the foreseeable future. For example, revenue from the sale of The Raiser's Edge and related services represented approximately 50%, 60% and 66% of our total revenue in 2007, 2006 and 2005, respectively. Because we generally sell licenses to our products on a perpetual basis and deliver new versions and enhancements to customers who purchase annual maintenance and support, our future license, services and maintenance revenue are substantially dependent on sales to new customers. In addition, we frequently sell The Raiser's Edge to new customers and then attempt to generate incremental revenue from the sale of additional products and services. If demand for The Raiser's Edge declines significantly, our business would suffer.

If our customers do not renew their annual maintenance and support agreements or subscriptions for our products or if they do not renew them on terms that are favorable to us, our business might suffer.

Most of our maintenance agreements and subscriptions are for a term of one year. As the end of the annual period approaches, we pursue the renewal of the agreement with the customer. Historically, maintenance and subscriptions renewals have represented a significant portion of our total revenue, including approximately 36%, 38% and 36% of our total revenue in 2007, 2006 and 2005, respectively. Because of this characteristic of our business, if our customers choose not to renew their maintenance and support agreements or subscriptions with us on beneficial terms, our business, operating results and financial condition could be harmed.

We might not generate increased business from our current customers, which could limit our revenue in the future.

Our business model is highly dependent on the success of our efforts to increase sales to our existing customers. Many of our customers initially make a purchase of only one or a limited number of our products or only for a single department within their organization. These customers might choose not to expand their use of or make additional purchases of our products and services. If we fail to generate additional business from our current customers, our revenue could grow at a slower rate or even decrease. In addition, as we deploy new applications and features for our existing products or introduce new products and services, our current customers could choose not to purchase these new offerings.

The market for software and services for nonprofit organizations might not grow, and nonprofit organizations might not continue to adopt our products and services.

Many nonprofit organizations have not traditionally used integrated and comprehensive software and services for their nonprofit-specific needs. We cannot be certain that the market for such products and services will continue to develop and grow or that nonprofit organizations will elect to adopt our products and services rather than continue to use traditional, less automated methods, attempt to develop software internally, rely upon legacy software systems, or use generalized software solutions not specifically designed for the nonprofit market. Nonprofit organizations that have already invested substantial resources in other fundraising methods or other non-integrated software solutions might be reluctant to adopt our products and services to supplement or replace their existing systems or methods. In addition, the implementation of one or more of our core software products can involve significant time and capital commitments by our customers, which they may be unwilling or unable to make. If demand for and market acceptance of our products and services does not increase, we might not grow our business as we expect.

Our services revenue produces substantially lower gross margins than our license revenue, and an increase in services revenue relative to license revenue would harm our overall gross margins.

Our services revenue, which includes fees for consulting, implementation, training, data and technical services and analytics, was approximately 36% of our revenue for 2007 and 32% of our revenue in both 2006 and 2005. Our services revenue has substantially lower gross margins than our product license revenue. An increase in the percentage of total revenue represented by services revenue would adversely affect our overall gross margins.

Certain of our services are contracted under fixed fee arrangements, which we base on estimates. If our estimated fees are less than our actual costs, our operating results would be adversely affected.

Services revenue as a percentage of total revenue has varied significantly from quarter to quarter due to fluctuations in licensing revenue, economic changes, changes in the average selling prices for our products and services, our customers' acceptance of our products and our sales force execution. In addition, the volume and profitability of services can depend in large part upon:

- competitive pricing pressure on the rates that we can charge for our services;
- the complexity of the customers' information technology environment and the existence of multiple non-integrated legacy databases;
- the resources directed by customers to their implementation projects; and
- the extent to which outside consulting organizations provide services directly to customers.

Any erosion of our margins for our services revenue or any adverse changes in the mix of our license versus service revenue would adversely affect our operating results.

Our current and potential customers might demand the delivery of our software solutions under a SaaS model much more rapidly than we currently anticipate and we may be unable to respond in a timely fashion.

Customers in many industries are increasingly showing interest in purchasing software solutions under a Software-as-a-Service, or SaaS, licensing model. In a SaaS model, as distinct from a traditional perpetual-right software licensing model, the software is operated, or hosted, on the vendor's computers, and customers are provided access electronically, typically from remote locations via the Internet. Under this model, the customer typically executes a subscription agreement for 1-3 years and pays either a one-time or recurring subscription fee for access to the software. The nonprofit market has been slower to adopt the SaaS model than for-profit organizations and we believe that if the nonprofit market continues to move at a similar pace in adopting a SaaS model, we will have the ability to successfully transition our business to continue to meet the needs of our nonprofit customers. If nonprofits in general, and specifically our customers and prospects, desire to adopt a SaaS model much more rapidly than we currently anticipate and we are unable to respond in a timely fashion, we could encounter significant effects to our business, including substantial capital expenditures, reduction in profitability, decrease in revenue growth and/or we could become potentially less competitive, resulting in a loss of market share.

We might face challenges in integrating the Target Companies and eTapestry and, as a result, might not realize the expected benefits of these recent acquisitions.

In January 2007, we acquired the Target Companies, two privately-owned affiliated companies, and in August 2007, we acquired privately-owned eTapestry.com, Inc. Managing and integrating the operations and personnel of these acquired companies could be a complex process. The integration might not be completed rapidly or achieve the anticipated benefits of the acquisitions. The successful integration of these companies with Blackbaud will require, among other things, coordination of various departments, including product development, sales and marketing and finance. The diversion of the attention of management and any difficulties encountered in this process could cause the disruption of, or a loss of momentum in, sales or product development. The inability to successfully integrate the operations and personnel of the acquired companies, or any significant delay in achieving integration, could have a material adverse effect on our business and on the market price of our common stock.

If we are unable to retain key personnel of the Target Companies or eTapestry, our business may suffer.

The success of our acquisition of the Target Companies and eTapestry will depend in part on our ability to retain their sales, marketing, development and other personnel. It is possible that these employees might decide to terminate their employment. Moreover, payment of the value of all options outstanding under the stock option plans for each of the acquired companies in connection with their acquisition might reduce the financial incentive of certain key employees to remain as employees. If key employees terminate their employment, the sales, marketing or development activities of the acquired companies might be adversely affected, our management's attention might be diverted from successfully integrating the acquired companies' operations to hiring suitable replacements, and, as a result, our business might suffer.

Future acquisitions could prove difficult to integrate, disrupt our business, dilute stockholder value and strain our resources.

As part of our business strategy we have made acquisitions in the past, and we might acquire additional companies, services and technologies that we feel could complement or expand our business, augment our market coverage, enhance our technical capabilities, provide us with important customer contacts or otherwise offer growth opportunities. Acquisitions and investments involve numerous risks, including:

- difficulties in integrating operations, technologies, services, accounting and personnel;
- difficulties in supporting and transitioning customers of our acquired companies;
- diversion of financial and management resources from existing operations;
- risks of entering new sectors of the nonprofit industry;
- potential loss of key employees; and
- inability to generate sufficient revenue to offset acquisition or investment costs.

Acquisitions also frequently result in recording of goodwill and other intangible assets, which are subject to potential impairments in the future that could harm our operating results. In addition, if we finance acquisitions by issuing equity securities or securities convertible into equity securities, our existing stockholders would be diluted, which, in turn, could affect the market price of our stock. Moreover, we could finance any acquisition with debt, resulting in higher leverage and interest costs. As a result, if we fail to evaluate and execute acquisitions or investments properly, we might not achieve the anticipated benefits of any such acquisition, and we may incur costs in excess of what we anticipate.

If we do not successfully address the risks inherent in the expansion of our international operations, our business could suffer.

We currently have operations in the United Kingdom, Canada and Australia, and we intend to expand further into international markets. We have limited experience in international operations and may not be able to compete effectively in international markets. Our international offices generated revenues of approximately \$36.2 million,

\$26.2 million and \$22.4 million for the years ended December 31, 2007, 2006 and 2005, respectively. Accordingly, international revenue increased 38.2% and 17.0% in 2007 and 2006, respectively. Expansion of our international operations will require a significant amount of attention from our management and substantial financial resources and may require us to add qualified management in these markets. Our direct sales model requires us to attract, retain and manage qualified sales personnel capable of selling into markets outside the United States. In some cases, our costs of sales might increase if our customers require us to sell through local distributors.

If we are unable to grow our international operations in a cost effective and timely manner, our business and operating results could be harmed. Doing business internationally involves additional risks that could harm our operating results, including:

- difficulties associated with and costs of staffing and managing international operations;
- differing technology standards;
- difficulties in collecting accounts receivable and longer collection periods;
- political and economic instability;
- fluctuations in currency exchange rates;
- imposition of currency exchange controls;
- potentially adverse tax consequences;
- reduced protection for intellectual property rights in certain countries;
- dependence on local vendors;
- protectionist laws and business practices that favor local competition;
- compliance with multiple conflicting and changing governmental laws and regulations;
- seasonal reductions in business activity specific to certain markets;
- longer sales cycles;
- restrictions on repatriation of earnings;
- differing labor regulations;
- restrictive privacy regulations in different countries, particularly in the European Union;
- restrictions on the export of technologies such as data security and encryption; and
- import and export restrictions and tariffs.

Our quarterly financial results fluctuate and might be difficult to forecast and, if our future results are below either any guidance we might issue or the expectations of public market analysts and investors, the price of our common stock might decline.

Our quarterly revenue and results of operations are difficult to forecast. We have experienced, and expect to continue to experience, fluctuations in revenue and operating results from quarter to quarter. As a result, we believe that quarter-to-quarter comparisons of our revenue and operating results are not necessarily meaningful and that such comparisons might not be accurate indicators of future performance. The reasons for these fluctuations include but are not limited to:

- the size and timing of sales of our software, including the relatively long sales cycles associated with many of our larger software sales;
- budget and spending decisions by our customers;
- market acceptance of new products we release;
- market acceptance of product we acquire;
- the amount and timing of operating costs related to the expansion of our business, operations and infrastructure;
- changes in our pricing policies or our competitors' pricing policies;

- seasonality in our revenue;
- general economic conditions; and
- costs related to acquisitions of technologies or businesses.

Our operating expenses, which include sales and marketing, research and development and general and administrative expenses, are based on our expectations of future revenue and are, to a large extent, fixed in the short term. If revenue falls below our expectations in a quarter and we are not able to quickly reduce our operating expenses in response, our operating results for that quarter could be adversely affected. It is possible that in some future quarter our operating results may be below either any guidance we might issue or the expectations of public market analysts and investors and, as a result, the price of our common stock might fall.

We encounter long sales and implementation cycles, particularly for our largest customers, which could have an adverse effect on the size, timing and predictability of our revenue and sales.

Potential customers, particularly our larger enterprise-wide clients, generally commit significant resources to an evaluation of available software and require us to expend substantial time, effort and money educating them as to the value of our software and services. Sales of our software products to these larger customers often require an extensive education and marketing effort. We could expend significant funds and management resources during the sales cycle and ultimately fail to close the sale. Our software product sales cycle averages approximately two months for sales to existing customers and from six to nine months for sales to new customers and large enterprise-wide sales. Our implementation cycle for large enterprise-wide sales can extend for a year or more, which can negatively impact the timing and predictability of our revenue. Our sales cycle for all of our products and services is subject to significant risks and delays over which we have little or no control, including:

- our customers' budgetary constraints;
- the timing of our clients' budget cycles and approval processes;
- our clients' willingness to replace their current methods or software solutions;
- our need to educate potential customers about the uses and benefits of our products and services; and
- the timing and expiration of our clients' current license agreements or outsourcing agreements for similar services.

If we are unsuccessful in closing sales after expending significant funds and management resources or if we experience delays as discussed above, it could have a material adverse effect on the size, timing and predictability of our revenue.

We have recorded a significant deferred tax asset, and we might never realize the full value of our deferred tax asset, which would result in a charge against our earnings.

In connection with the initial acquisition of our common stock as part of our recapitalization in 1999, we recorded approximately \$107.0 million as a deferred tax asset. Our deferred tax asset balance of \$54.0 million, of which \$50.5 million relates to our 1999 recapitalization, was approximately 23% of our total assets as of December 31, 2007.

Realization of our deferred tax asset is dependent upon our generating sufficient taxable income in future years to realize the tax benefit from that asset. In accordance with Financial Accounting Standards Board, or FASB, Statement of Financial Accounting Standards, or SFAS, No. 109, "Accounting for Income Taxes," deferred tax assets are reviewed at least annually for impairment. Impairment would result if, based on the available evidence, it is more likely than not that some portion of the deferred tax asset will not be realized. This impairment could

be caused by, among other things, deterioration in performance, loss of key contracts, adverse market conditions, adverse changes in applicable laws or regulations, including changes that restrict the activities of or affect the products sold by our business and a variety of other factors. If an impairment were to occur in a future period, it would be recognized as an expense in our results of operations during the period of impairment.

Depending on future circumstances, it is possible that we might never realize the full value of our deferred tax asset. Any future determination of impairment of a significant portion of our deferred tax asset would have an adverse effect on our financial condition and results of operations.

Our failure to compete successfully could cause our revenue or market share to decline.

Our market is fragmented, competitive and rapidly evolving, and there are limited barriers to entry for some aspects of this market. We mainly face competition from four sources:

- software developers offering integrated specialized products designed to address specific needs of nonprofit organizations;
- providers of traditional, less automated fundraising services, such as services that support traditional direct mail campaigns, special events fundraising, telemarketing and personal solicitations;
- custom-developed products created either internally or outsourced to custom service providers; and
- software developers offering general products not designed to address specific needs of nonprofit organizations.

The companies we compete with, and other potential competitors, may have greater financial, technical and marketing resources and generate greater revenue and better name recognition than we do. If one or more of our competitors or potential competitors were to merge or partner with one of our competitors, the change in the competitive landscape could adversely affect our ability to compete effectively. For example, a large diversified software enterprise, such as Microsoft, Oracle or Salesforce.com, could decide to enter the market directly, including through acquisitions.

Our competitors might also establish or strengthen cooperative relationships with resellers and third-party consulting firms or other parties with whom we have had relationships, thereby limiting our ability to promote our products. These competitive pressures could cause our revenue and market share to decline.

Because competition for highly qualified personnel is intense, we might not be able to attract and retain the employees we need to support our planned growth.

To execute our continuing growth plans, we need to increase the size and maintain the quality of our sales force, software development staff and our professional services organization. To meet our objectives successfully, we must attract and retain highly qualified personnel with specialized skill sets focused on the nonprofit industry. Competition for qualified personnel can be intense, and we might not be successful in attracting and retaining them. The pool of qualified personnel with experience working with or selling to nonprofit organizations is limited overall and specifically in Charleston, South Carolina, where our principal office is located. Our ability to maintain and expand our sales, product development and professional services teams will depend on our ability to recruit, train and retain top quality people with advanced skills who understand sales to, and the specific needs of, nonprofit organizations. For these reasons, we have from time to time in the past experienced, and we expect to continue to experience in the future, difficulty in hiring and retaining highly skilled employees with appropriate qualifications for our business. In addition, it takes time for our new sales and services personnel to become productive, particularly with respect to obtaining and supporting major customer accounts. In particular, we plan to continue to increase the number of services personnel to attempt to meet the needs of our customers and potential new customers. In addition to hiring services personnel to meet our needs, we might also engage additional third-party consultants as contractors, which could have a negative impact on our earnings. If we are

unable to hire or retain qualified personnel, or if newly hired personnel fail to develop the necessary skills or reach productivity slower than anticipated, it would be more difficult for us to sell our products and services, and we could experience a shortfall in revenue or earnings, and not achieve our planned growth.

If our products fail to perform properly due to undetected errors or similar problems, our business could suffer.

Complex software such as ours often contains undetected errors or bugs. Such errors are frequently found after introduction of new software or enhancements to existing software. We continually introduce or acquire the rights to new products and release new versions of our products. If we detect any errors before we ship a product, we might have to delay product shipment for an extended period of time while we address the problem. We might not discover software errors that affect our new or current products or enhancements until after they are deployed, and we may need to provide enhancements to correct such errors. Therefore, it is possible that, despite testing by us, errors may occur in our software. These errors could result in:

- harm to our reputation;
- lost sales;
- delays in commercial release;
- product liability claims;
- delays in or loss of market acceptance of our products;
- license terminations or renegotiations; and
- unexpected expenses and diversion of resources to remedy errors.

Furthermore, our customers may use our software together with products from other companies. As a result, when problems occur, it might be difficult to identify the source of the problem. Even when our software does not cause these problems, the existence of these errors might cause us to incur significant costs, divert the attention of our technical personnel from our product development efforts, impact our reputation and cause significant customer relations problems.

Our failure to integrate third-party technologies could harm our business.

We intend to continue licensing technologies from third parties, including applications used in our research and development activities, technologies which are integrated into our products, and products that we resell. These technologies might not continue to be available to us on commercially reasonable terms or at all. Our inability to obtain any of these licenses could delay product development until equivalent technology can be identified, licensed or developed and integrated. This inability in turn would harm our business and operating results. Our use of third-party technologies exposes us to increased risks, including, but not limited to, risks associated with the integration of new technology into our products, the diversion of our resources from development of our own proprietary technology and our inability to generate revenue from licensed technology sufficient to offset associated acquisition and maintenance costs.

If the security of our software is breached or we fail to securely collect, store and transmit customer information, our business and reputation could suffer.

Fundamental to the use of our products is the secure collection, storage and transmission of confidential donor and end user information. Third parties may attempt to breach our security or that of our customers and their databases. We might be liable to our customers for any breach in such security, and any breach could harm our customers, our business and our reputation. Any imposition of liability, particularly liability that is not covered by insurance or is in excess of insurance coverage, could harm our reputation and our business and operating results. Also, computers, including those that utilize our software, are vulnerable to computer viruses, physical or

electronic break-ins and similar disruptions, which could lead to interruptions, delays or loss of data. We might be required to expend significant capital and other resources to protect further against security breaches or to rectify problems caused by any security breach.

If we are unable, or customers believe we are unable, to detect and prevent unauthorized use of credit cards and bank account numbers and safeguard confidential donor data, we could be subject to financial liability, our reputation could be harmed and customers may be reluctant to use our products and services.

We rely on third-party and internally-developed encryption and authentication technology to provide secure transmission of confidential information over the Internet, including customer credit card and bank account numbers, and protect confidential donor data. Advances in computer capabilities, new discoveries in the field of cryptography or other events or developments could result in a compromise or breach of the technology we use to protect sensitive transaction data. If any such compromise of our security, or the security of our customers, were to occur, it could result in misappropriation of proprietary information or interruptions in operations and have an adverse impact on our reputation or the reputation of our customers. We are not currently compliant with Payment Card Industry, or PCI, security standards. This or other factors could make customers believe we are unable to detect and prevent unauthorized use of credit cards and bank account numbers or protect confidential donor data, which could harm our business.

We currently do not have any issued patents, but we rely upon trademark, copyright, patent and trade secret laws to protect our proprietary rights, which might not provide us with adequate protection.

Our success and ability to compete depend to a significant degree upon the protection of our software and other proprietary technology rights. We might not be successful in protecting our proprietary technology, and our proprietary rights might not provide us with a meaningful competitive advantage. To protect our proprietary technology, we rely on a combination of patent, trademark, copyright and trade secret laws, as well as nondisclosure agreements, each of which affords only limited protection. We currently do not have patents issued for any of our proprietary technology and we only recently filed patent applications relating to a number of our products. Moreover, we have no patent protection for The Raiser's Edge, which is one of our core products and responsible for a significant portion of our revenue. Any inability to protect our intellectual property rights could seriously harm our business, operating results and financial condition. It is possible that:

- our pending patent applications may not result in the issuance of patents;
- any patents issued to us may not be timely or broad enough to protect our proprietary rights;
- any issued patent could be successfully challenged by one or more third parties, which could result in our loss of the right to prevent others from exploiting the inventions claimed in those patents; and
- current and future competitors may independently develop similar technologies, duplicate our products or design around any of our patents.

In addition, the laws of some foreign countries do not protect our proprietary rights in our products to the same extent as do the laws of the United States. Despite the measures taken by us, it may be possible for a third party to copy or otherwise obtain and use our proprietary technology and information without authorization. Policing unauthorized use of our products is difficult, and litigation could become necessary in the future to enforce our intellectual property rights. Any litigation could be time consuming and expensive to prosecute or resolve, result in substantial diversion of management attention and resources, and materially harm our business, financial condition and results of operations.

Restrictions in our revolving credit facility may limit our activities, including dividend payments, share repurchases and acquisitions.

Our revolving credit facility contain restrictions, including covenants limiting our ability to incur additional debt, grant liens, make acquisitions and other investments, prepay specified debt, consolidate, merge or acquire other

businesses, sell assets, pay dividends and other distributions, repurchase stock and enter into transactions with affiliates. We cannot assure you that we will be able to remain in compliance with the covenants to which we are subject in the future and, if we fail to do so, that we will be able to obtain waivers from our lenders or amend the covenants.

In the event of a default under our credit facility, we could be required to immediately repay all outstanding borrowings, which we might not be able to do. In addition, certain of our subsidiaries have guaranteed amounts borrowed under the credit facility and we have pledged the shares of certain of our subsidiaries as collateral for our obligations under the credit facility. Any such default could have a material adverse effect on our ability to operate, including allowing lenders under the credit facility to enforce the guarantees of our subsidiaries or exercise their rights with respect to the shares pledged as collateral.

If we were found subject to or in violation of any laws or regulations governing privacy or electronic fund transfers, we could be subject to liability or forced to change our business practices.

It is possible that the payment processing component of our web-based software is subject to various governmental regulations. Any further legislation at the state and federal levels could also restrict further our information gathering and disclosure practices. Existing and potential future privacy laws might limit our ability to develop new products and services that make use of data we gather from various sources. For example, our custom modeling and analytical services, including ProspectPoint, WealthPoint and donorCentrics, rely heavily on securing and making use of data we gather from various sources and privacy laws could jeopardize our ability to market and profit from those services. The provisions of these laws and related regulations are complicated, and we do not have extensive experience with these laws and related regulations. Even technical violations of these laws can result in penalties that are assessed for each non-compliant transaction. In addition, we might be subject to the privacy provisions of the Health Insurance Portability and Accountability Act of 1996 and the Gramm-Leach-Bliley Act and related regulations. If we or our customers were found to be subject to and in violation of any of these laws or other privacy laws or regulations, our business would suffer and we and/or our customers would likely have to change our business practices. In addition, these laws and regulations could impose significant costs on us and our customers and make it more difficult for donors to make online donations.

Increasing government regulation could affect our business.

We are subject, not only to regulations applicable to businesses generally, but also to laws and regulations directly applicable to electronic commerce. Although there are currently few such laws and regulations, state, federal and foreign governments may adopt laws and regulations applicable to our business. Any such legislation or regulation could dampen the growth of the Internet and decrease its acceptance. If such a decline occurs, companies may decide in the future not to use our products and services. Any new laws or regulations in the following areas could affect our business:

- user privacy;
- the pricing and taxation of goods and services offered over the Internet;
- the content of websites;
- copyrights;
- consumer protection, including the potential application of “do not call” registry requirements on our customers and consumer backlash in general to direct marketing efforts of our customers;
- the online distribution of specific material or content over the Internet; and
- the characteristics and quality of products and services offered over the Internet.

Our operations might be affected by the occurrence of a natural disaster or other catastrophic event in Charleston, South Carolina.

We depend on our principal executive offices and other facilities in Charleston, South Carolina for the continued operation of our business. Although we have contingency plans in effect for natural disasters or other catastrophic events, these events, including terrorist attacks and natural disasters such as hurricanes, which have struck the Charleston area in the past, could disrupt our operations. Even though we carry business interruption insurance policies and typically have provisions in our contracts that protect us in certain events, we might suffer losses as a result of business interruptions that exceed the coverage available under our insurance policies or for which we do not have coverage. Any natural disaster or catastrophic event affecting us could have a significant negative impact on our operations.

Item 1B. *Unresolved staff comments*

None.

Item 2. *Properties*

We lease our headquarters in Charleston, South Carolina which consists of approximately 230,000 square feet. The lease on our Charleston headquarters expires in July 2010, and we have the option for two 5-year renewal periods. We also lease facilities near Indianapolis, Indiana and in Cambridge, Massachusetts; Glasgow, Scotland; London, England; and Sydney, Australia. We believe that our properties are in good operating condition and adequately serve our current business operations for all of our business segments. We also anticipate that suitable additional or alternative space, including those under lease options, will be available at commercially reasonable terms for future expansion.

Item 3. *Legal proceedings*

From time to time we may become involved in litigation relating to claims arising from our ordinary course of business. We do not believe that there are any claims or actions pending or threatened against us, the ultimate disposition of which would have a material adverse affect on us.

Item 4. *Submission of matters to a vote of security holders*

No matter was submitted to a vote of our stockholders during the fourth quarter of the year ended December 31, 2007.

PART II

Item 5. *Market for registrant's common equity, related stockholder matters and issuer purchases of equity securities*

Our common stock began trading on the Nasdaq National Market under the symbol "BLKB" on July 26, 2004. On July 1, 2006, our common stock began trading on Nasdaq's newest market tier, the Nasdaq Global Select Market. The following table sets forth the high and low prices for shares of our common stock, as reported by Nasdaq for the periods indicated. The prices are based on quotations between dealers, which do not reflect retail markup, mark-down or commissions.

Blackbaud quarterly high and low stock prices

| | High | Low |
|--|---------|---------|
| Fiscal year ended December 31, 2006 | | |
| First quarter | \$21.68 | \$16.09 |
| Second quarter | 24.13 | 17.61 |
| Third quarter | 23.79 | 18.25 |
| Fourth quarter | 27.96 | 21.95 |
| | High | Low |
| Fiscal year ended December 31, 2007 | | |
| First quarter | \$26.38 | \$22.15 |
| Second quarter | 25.29 | 21.57 |
| Third quarter | 27.17 | 20.94 |
| Fourth quarter | 29.74 | 25.11 |

As of February 14, 2008, there were 310 stockholders of record and approximately 15,000 beneficial owners of our common stock. On February 25, 2008, the closing price of our common stock was \$24.11.

Issuer purchases of issuer securities

| Period | Total number of shares purchased(1) | Average price paid per share | Total number of shares purchased as part of publicly announced plans or programs | Approximate dollar value of shares that may yet be purchased under the plan or programs(2) |
|--|-------------------------------------|------------------------------|--|--|
| Beginning balance, October 1, 2007 | | | | \$40,873,340 |
| October 1, 2007 through October 31, 2007 | — | \$ — | — | \$40,873,340 |
| November 1, 2007 through November 30, 2007 | 50,929 | \$27.55 | — | \$40,873,340 |
| December 1, 2007 through December 31, 2007 | — | \$ — | — | \$40,873,340 |
| Total | 50,929 | \$27.55 | — | \$40,873,340 |

- (1) Includes 50,929 shares withheld by us to satisfy the tax obligations of employees due upon vesting of restricted stock during the period.
- (2) On June 13, 2007, our Board of Directors approved a new stock repurchase program that authorizes us to repurchase an amount of our common stock up to \$35.0 million plus the aggregate amount of \$6,181,751 that was authorized but not used under the prior stock repurchase program as of that date and terminated the prior program. The new program has no expiration date.

Dividend policy and restrictions

Our Board of Directors has adopted a dividend policy which reflects an intention to distribute to our stockholders a portion of the cash generated by our business that exceeds our operating needs and capital expenditures as regular quarterly dividends. This policy reflects our judgment that we can provide greater value to our stockholders by distributing to them a portion of the cash generated by our business.

In accordance with this dividend policy, we paid dividends at an annual rate of \$0.34 per share in 2007, resulting in an aggregate dividend payment to stockholders of \$15.1 million in 2007. In February 2008, our Board of Directors increased the annual rate of our dividend from \$0.34 per share to \$0.40 per share. In accordance with this increase, we declared a first quarter dividend of \$0.10 per share payable on March 14, 2008 to stockholders of record on February 28, 2008, and currently intend to pay quarterly dividends at an annual rate of \$0.40 per share of common stock for each of the remaining fiscal quarters in 2008. Dividends at this rate would total approximately \$18.0 million in the aggregate on the common stock in 2008 (assuming 45,000,000 shares of common stock are outstanding, net of treasury stock).

Dividends on our common stock will not be cumulative. Consequently, if dividends on our common stock are not declared and/or paid at the targeted level, our stockholders will not be entitled to receive such payments in the future. We are not obligated to pay dividends, and as described more fully below, our stockholders might not receive any dividends as a result of the following factors:

- our credit facility limits the amount of dividends we are permitted to pay;
- our Board of Directors could decide to reduce dividends or not to pay dividends at all, at any time and for any reason;
- the amount of dividends distributed is subject to state law restrictions; and
- we might not have enough cash to pay dividends due to changes to our operating earnings, working capital requirements and anticipated cash needs.

Assumptions and considerations

We estimate that the cash necessary to fund dividends on our common stock for 2008 at the rate described above is approximately \$18.0 million (assuming 45,000,000 shares of common stock are outstanding, net of treasury stock).

In addition to our dividend policy, on June 13, 2007, our Board of Directors approved a stock repurchase program that authorized us to purchase up to \$35,000,000 of our outstanding shares of common stock plus the aggregate amount of \$6,181,000 that was authorized but not used under the prior stock repurchase program as of that date. The prior program was terminated at that date. The shares could be purchased in conjunction with a public offering of our stock, from time to time on the open market or in privately negotiated transactions depending upon market conditions and other factors, all in accordance with the requirements of applicable law. As of February 20, 2008, we had purchased 211,056 shares of common stock for \$5.3 million pursuant to this program. Any open market purchases under the repurchase program will be made in compliance with Rule 10b-18 of the Securities Exchange Act of 1934 and all other applicable securities regulations. We might not purchase any additional shares of common stock and our Board of Directors may decide, in its absolute discretion, at any time and for any reason, to cancel the stock repurchase program.

We believe that our cash on hand and the cash flows we expect to generate from operations will be sufficient to meet our liquidity requirements through 2008, including dividends and purchases under our stock repurchase program. See “Management’s discussion and analysis of financial conditions and results of operations—Liquidity and capital resources” in this report.

If our assumptions as to operating expenses, working capital requirements and capital expenditures are too low or if unexpected cash needs arise that we are not able to fund with cash on hand or with borrowings under our credit facility, we would need to either reduce or eliminate dividends. If we were to use working capital or permanent borrowings to fund dividends, we would have less cash available for future dividends and other purposes, which could negatively impact our stock price, financial condition, our results of operations and our ability to maintain or expand our business.

We have estimated our dividend only for 2008, and we cannot assure our stockholders that during or following such periods that we will pay dividends at the estimated levels, or at all. We are not required to pay dividends, and our Board of Directors may modify or revoke our dividend policy at any time. Dividend payments are within the absolute discretion of our Board of directors and will be dependent upon many factors and future developments that could differ materially from our current expectations. Indeed, over time our capital and other cash needs, including unexpected cash needs, will invariably change and remain subject to uncertainties, which could impact the level of any dividends we pay in the future.

We believe that our dividend policy could limit, but not preclude, our ability to pursue growth as we intend to retain sufficient cash after the distribution of dividends to permit the pursuit of growth opportunities that do not require material capital investments. In order to pay dividends at the level currently anticipated under our dividend policy and to fund any substantial portion of our stock repurchase program, we expect that we could require financing or borrowings to fund any significant acquisitions or to pursue growth opportunities requiring capital expenditures significantly beyond our anticipated capital expenditure levels. Management will evaluate potential growth opportunities as they arise and, if our Board of Directors determines that it is in our best interest to use cash that would otherwise be available for distribution as dividends to pursue an acquisition opportunity, to materially increase capital spending or for some other purpose, the Board would be free to depart from, or change, our dividend policy at any time.

Restrictions on payment of dividends

Under Delaware law, we can only pay dividends either out of “surplus” (which is defined as total assets at fair market value minus total liabilities, minus statutory capital) or out of current or the immediately preceding year’s earnings. As of December 31, 2007, we had approximately \$14.8 million in cash and cash equivalents. In addition, we anticipate that we will have sufficient earnings in 2008 to pay dividends at the level described above. Although we believe we will have sufficient surplus and earnings to pay dividends at the anticipated levels for 2008, our Board of Directors will seek periodically to assure itself of this sufficiency before actually declaring any dividends.

Our credit facility with Wachovia Bank, N.A. dated July 25, 2007 restricts our ability to declare and pay dividends on our common stock as follows:

- In order to pay any cash dividends and/or repurchase shares of stock: (1) no default or event of default shall have occurred and be continuing under the credit facility; (2) we must be in compliance with a leverage ratio set forth in the credit agreement (3) we must have cash on hand (which includes any unused amounts under the credit facility) of at least \$10.0 million; each after giving effect to the payment of dividends and/or the repurchase of shares.

Item 6. Selected consolidated financial data

The selected consolidated financial data set forth below should be read in conjunction with “Management’s discussion and analysis of financial condition and results of operations” and our financial statements and the related notes included elsewhere in this report. The following data, insofar as it relates to each of the years ended December 31, 2007, 2006 and 2005, has been derived from the audited annual financial statements, including the consolidated balance sheets at December 31, 2007 and 2006 and the related consolidated statements of operations, cash flows and stockholders’ equity and comprehensive income for the three years ended December 31, 2007, 2006 and 2005 and notes thereto appearing elsewhere herein. The following data, insofar as it relates to each of the years ended December 31, 2004 and 2003 and the consolidated balance sheet as of December 31, 2005, 2004 and 2003 are derived from audited financial statements not included in this report.

As described in Note 2 of the consolidated financial statements included in this annual report, the Company made business acquisitions in 2007 and 2006, which could affect the comparability of the information presented.

| (in thousands, except per share data) | Years ended December 31, | | | | |
|--|--------------------------|-----------|-----------|-----------|-----------|
| | 2007 | 2006 | 2005 | 2004 | 2003 |
| Consolidated statements of operations data: | | | | | |
| Revenue | | | | | |
| License fees | \$ 37,569 | \$ 32,500 | \$ 29,978 | \$ 25,387 | \$ 21,339 |
| Services | 91,376 | 61,242 | 52,606 | 42,793 | 34,263 |
| Maintenance | 94,602 | 80,893 | 71,163 | 63,081 | 56,767 |
| Subscriptions | 25,389 | 10,605 | 6,965 | 3,686 | 1,867 |
| Other revenue | 8,102 | 6,140 | 5,237 | 4,316 | 4,352 |
| Total revenue | 257,038 | 191,380 | 165,949 | 139,263 | 118,588 |
| Cost of revenue | | | | | |
| Cost of license fees | 2,870 | 2,260 | 4,380 | 3,545 | 2,819 |

Item 7. Management’s discussion and analysis of financial condition and results of operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and related notes included elsewhere in this Annual Report on Form 10-K. This report contains forward- looking statements within the meaning of Section 21E of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward- looking statements reflect our current view with respect to future events and financial performance and are subject to risks and uncertainties, including those set forth under “Cautionary statement” included in this “Management’s discussion and analysis of financial condition and results of operations” and elsewhere in this report, that could cause actual results to differ materially from historical or anticipated results.

Overview

We are the leading global provider of software and related services designed specifically for nonprofit organizations. Our products and services enable nonprofit organizations to increase donations, reduce fundraising costs, improve communications with constituents, manage finances and optimize internal operations. We have focused solely on the nonprofit market since our incorporation in 1982 and have developed our suite of products and services based upon our extensive knowledge of the operating challenges facing nonprofit organizations. At the end of 2007, we had approximately 19,000 customers. Our customers operate in multiple verticals within the nonprofit market, including education, foundations, health and human services, religion, arts and cultural, public and societal benefits, environment and animal welfare and international foreign affairs.

We derive revenue from selling perpetual licenses or charging for the use of our software products and providing a broad offering of services, including consulting, training, installation, implementation, as well as ongoing customer support and maintenance. Consulting, training and implementation are generally not essential to the functionality of our software products and are sold separately. Furthermore, we derive revenue from providing hosting services, performing donor prospect research engagements, selling lists of potential donors, providing benchmarking studies and data modeling services.

Critical accounting policies and estimates

Our discussion and analysis of financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”). The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, the reported amounts of revenue and expenses during the reporting period and related disclosures of contingent assets and liabilities. The most significant estimates and assumptions relate to our revenue recognition, our allowance for sales returns and doubtful accounts, valuation of long-lived and intangible assets and goodwill, stock-based compensation and provision for income taxes, valuation of deferred tax assets and liabilities and contingencies.

We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. On an ongoing basis, we reconsider and evaluate our estimates and assumptions. We are not aware of any circumstances in the past that have caused these estimates and assumptions to be materially wrong. Furthermore, we are not currently aware of any material changes in our business that might cause these assumptions or estimates to differ significantly. In our discussion below of deferred taxes, the most significant asset subject to such assumptions and estimates, we have described the sensitivity of these assumptions or estimates to potential deviations in actual results. Actual results could differ from any of our estimates under different assumptions or conditions.

We believe the critical accounting policies listed below affect significant judgments and estimates used in the preparation of our consolidated financial statements.

Revenue recognition

Our revenue is generated primarily by selling perpetual licenses or charging for the use of our software products and providing support, training, consulting, technical and other professional services for those products. We make available certain software products for use in hosted application arrangements without licensing perpetual rights to the software (“hosted applications”). Additionally we provide hosting services to customers who have purchased perpetual rights to certain of our software products (“hosting services”). We recognize revenue in accordance with:

- The American Institute of Certified Public Accountants Statements of Position (“SOP”) 97-2, “Software Revenue Recognition,” as modified by SOPs 98-4 and 98-9, as well as Technical Practice Aids issued from time to time by the American Institute of Certified Public Accountants;
- The SEC Staff Accounting Bulletin (“SAB”) No. 104, “Revenue Recognition in Financial Statements;”
- The Emerging Issues Task Force (“EITF”) Issue No. 00-03, “Application of AICPA Statement of Position 97-2 to Arrangements that Include the Right to Use Software Stored on Another Entity’s Hardware;”
- The EITF Issue No. 00-21, “Revenue Arrangements with Multiple Deliverables;” and
- The SOP 81-1, “Accounting for Performance of Construction-Type and Certain Production-Type Contracts.”

We recognize revenue from the sale of perpetual license rights to software when persuasive evidence of an arrangement exists, the product has been delivered, title and risk of loss have transferred to the customers, the fee is fixed or determinable and collection of the resulting receivable is probable. We deem acceptance of an agreement to be evidence of an arrangement. Delivery occurs when the product is shipped or transmitted. Our typical license agreement does not include customer acceptance provisions; if acceptance provisions are provided, delivery is deemed to occur upon acceptance. We consider the fee to be fixed or determinable unless the fee is subject to refund or adjustment or is not payable within our standard payment terms. We consider payment terms greater than 90 days to be beyond its customary payment terms. We deem collection probable if we expect that the customer will be able to pay amounts under the arrangement as they become due. If we determine that collection is not probable, we postpone recognition of the revenue until cash collection. We sell software licenses with maintenance and, often times, professional services. We allocate revenue to delivered components, normally the license component of the arrangement, using the residual value method based on objective evidence of the fair value of the undelivered elements, which is specific to us. Fair value for the maintenance services associated with our software licenses is based upon renewal rates stated in our agreements, which vary according to the level of the maintenance program. Fair value of professional services and other products and services is based on sales of these products and services to other customers when sold on a stand-alone basis.

The application of SOP 97-2 requires judgment, including whether a software arrangement includes multiple elements, and if so, whether vendor-specific objective evidence (“VSOE”) of fair value exists for those elements. As we develop new products, we may experience difficulty in determining VSOE regarding the fair value of those new products. This would result in the deferral of revenue on those transactions until all elements of the arrangement have been delivered or until VSOE is established.

Our services, which include consulting, installation and implementation services, are generally billed based on hourly rates plus reimbursable travel-related expenses. For small service engagements, less than approximately \$10,000, we frequently contract for and bill based on a fixed fee plus reimbursable travel-related expenses. We recognize this revenue upon completion of the work performed. When our services include software customization, these services are provided to support customer requests for assistance in creating special reports and other minor enhancements that will assist with efforts to improve operational efficiency and/or to support business process improvements. These services are not essential to the functionality of our software and rarely

exceed three months in duration. We recognize revenue as these services are performed. When we enter into larger fixed price contracts, we recognize revenue on a percent-complete basis.

We recognize analytic services revenue from donor prospect research engagements, sales of lists of potential donors, benchmarking studies and data modeling service engagements upon delivery.

We sell training at a fixed rate for each specific class, at a per attendee price, or at a packaged price for several attendees, and revenue is recognized only upon the customer attending and completing training. Additionally, we sell a fixed-rate program, which permits customers to attend unlimited training over a specified contract period, typically one year, subject to certain restrictions, and revenue is recognized ratably over this contract period.

We recognize revenue from maintenance services ratably over the contract term, which is principally one year. Maintenance revenue also includes the right to unspecified product upgrades on an if-and-when available basis. Certain support services are sold in prepaid units of time and recognized as revenue upon their usage.

Subscription revenue includes revenue associated with hosted applications, hosting services, data enrichment services, data management services and online training programs. Subscription-based revenue and any related set-up fees are recognized ratably over the service period of the contract.

To the extent that our customers are billed and/or pay for the above described services in advance of delivery, the amounts are recorded in deferred revenue.

Sales returns and allowance for doubtful accounts

We provide customers a 30-day right of return and maintain a reserve for returns. We estimate the amount of this reserve based on historical experience. Provisions for sales returns are charged against the related revenue items.

We maintain an allowance for doubtful accounts at an amount we estimate to be sufficient to provide adequate protection against losses resulting from extending credit to our customers. In judging the adequacy of the allowance for doubtful accounts, we consider multiple factors including historical bad debt experience, the general economic environment, the need for specific customer reserves and the aging of our receivables. Any necessary provision is reflected in general and administrative expense. A considerable amount of judgment is required in assessing these factors and if any receivables were to deteriorate, an additional provision for doubtful accounts could be required.

Valuation of long-lived and intangible assets and goodwill

We review identifiable intangible and other long-lived assets for impairment when events change or circumstances indicate the carrying amount may not be recoverable. Events or changes in circumstances that indicate the carrying amount may not be recoverable include, but are not limited to, a significant decrease in the market value of the business or asset acquired, a significant adverse change in the extent or manner in which the business or asset acquired is used or significant adverse change in the business climate. If such events or changes in circumstances occur, we use the undiscounted cash flow method to determine whether the asset is impaired. Cash flows would include the estimated terminal value of the asset and exclude any interest charges. To the extent that the carrying value of the asset exceeds the undiscounted cash flows over the estimated remaining life of the asset, we measure the impairment using discounted cash flows. The discount rate utilized would be based on our best estimate of our risks and required investment returns at the time the impairment assessment is made.

In accordance with the Financial Accounting Standards Board's ("FASB") Statement of Financial Accounting Standards ("SFAS") No. 142, "Goodwill and Other Intangible Assets" ("SFAS No. 142"), we test goodwill for

impairment annually, or more frequently if events or changes in circumstances indicate that the asset might be impaired. The impairment test compares the fair value of the reporting unit with its carrying amount. If the carrying amount exceeds its fair value, impairment is indicated. The impairment is measured as the excess of the recorded goodwill over its fair value, which could materially adversely impact our financial position and results of operations. Goodwill is assigned to various reporting units.

Stock-based compensation

We account for stock-based compensation in accordance the provisions of SFAS No. 123 (revised 2004), "Share-Based Payment" ("SFAS No. 123(R)"). Under the fair value recognition provisions of this statement, stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the requisite service period, which is the vesting period.

The determination of the fair value of the stock options and stock appreciation rights is made using an option pricing model and requires us to use significant judgment to make estimates regarding the life of the award, volatility of our stock price, the risk-free interest rate and the dividend yield of our stock over the life of the award. Changes to these estimates would result in different fair values of awards.

SFAS No. 123(R) requires us to estimate the number of awards that will be forfeited and recognize expense only for those awards that ultimately vest. Significant judgment is required in determining the adjustment to compensation expense for estimated forfeitures. Compensation expense in a period could be impacted, favorably or unfavorably, by differences between forfeiture estimates and actual forfeitures.

We adopted SFAS No. 123(R) on January 1, 2006 using the modified prospective method. Under the modified prospective application method, prior periods are not revised for comparative purposes. The provisions of SFAS No. 123(R) apply to grants made after the adoption date and existing grants which were partially unvested at that date. Compensation expense for grants outstanding on the date of adoption are recognized over the remaining service period using the grant date fair values and amortization methods determined previously for the SFAS No. 123, "Accounting for Stock-Based Compensation," pro forma disclosures.

Provision for income tax and valuation of deferred tax assets

We account for income taxes using the asset and liability approach as prescribed by SFAS Statement No. 109, "Accounting for Income Taxes." This approach requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the consolidated financial statements or income tax returns. Using the enacted tax rates in effect for the year in which we expect the differences to reverse, we determine deferred tax assets and liabilities based on the differences between the financial reporting and the tax basis of an asset or liability. We record a valuation allowance when it is more likely than not that the deferred tax asset will not be realized.

Significant judgment is required in determining our income taxes in each of the jurisdictions in which we operate. This process involves estimating our actual current tax exposure together with assessing temporary differences resulting from differing treatment of items, such as deferred revenue, for tax and accounting purposes. These differences result in a net deferred tax asset, which is included on our consolidated balance sheets. The final tax outcome of these matters might be different than that which is reflected in our historical income tax provisions, benefits and accruals. Any difference could have a material effect on our income tax provision and net income in the period in which such a determination is made.

Prior to October 13, 1999, we were organized as an S corporation under the Internal Revenue Code and, therefore, were not subject to federal income taxes. In addition, we were not subject to income tax in many of the states in which we operated as a result of our S corporation status. We historically made distributions to our stockholders to cover the stockholders' anticipated tax liability. In connection with our 1999 recapitalization, we

converted our U.S. taxable status from an S corporation to a C corporation. Accordingly, since October 14, 1999 we have been subject to federal and state income taxes. Upon the conversion and in connection with the recapitalization, we recorded a one-time benefit of \$107.0 million to establish a deferred tax asset.

We must assess the likelihood that the net deferred tax asset will be recovered from future taxable income and to the extent we believe that recovery is not likely, we must establish a valuation allowance. To the extent we establish a valuation allowance, we must include an expense within the tax provision in the statement of operations. Except with respect to certain state income tax credits, we have not recorded a valuation allowance as of December 31, 2007 and 2006, because we expect to be able to utilize our entire net deferred tax asset. The ability to utilize our net deferred tax asset is solely dependent on our ability to generate future taxable income. Based on current estimates of revenue and expenses, we expect future taxable income will be more than sufficient to recover the annual amount of additional tax deductions permitted. Even if actual results are significantly below our current estimates, the recovery still remains likely and no valuation allowance would be necessary.

Significant judgment is required in determining the provision for income taxes. To the extent that the final results differ from these estimated amounts that were initially recorded, such differences will impact the income tax provision in the period in which such determination is made and could have an impact on the deferred tax asset. Our deferred tax assets and liabilities are recorded at an amount based upon a U.S. federal income tax rate of 35.0%. If our projected taxable income falls and our tax rate decreases, we will adjust our deferred tax assets and liabilities to an amount reflecting a reduced expected U.S. federal income tax rate. If such change is determined to be appropriate, it will affect the provision for income taxes during the period that the determination is made.

We adopted FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109, Accounting for Income Taxes," ("FIN 48") on January 1, 2007. Under FIN 48 we must recognize the tax impact from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax impact recognized in the financial statements from such a position is measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate resolution. Penalties and interest related to uncertain tax positions are recorded as tax expense. Significant judgment is required in the identification of uncertain tax positions and in the estimation of penalties and interest on uncertain tax positions.

Contingencies

We are subject to the possibility of various loss contingencies in the normal course of business. In accordance with SFAS No. 5, "Accounting for Contingencies," we record an accrual for a contingency when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Often these issues are subject to substantial uncertainties and, therefore, the probability of loss and an estimation of damages are difficult to ascertain. These assessments can involve a series of complex judgments about future events and can rely heavily on estimates and assumptions that have been deemed reasonable by us. Although we believe we have substantial defenses in these matters, we could in the future incur judgments or enter into settlements of claims that could have a material adverse effect on our financial position, results of operations or cash flows in any particular period.

Consolidated statements of operations, percent of revenue

| | Years ended December 31, | | |
|---|--------------------------|---------------|---------------|
| | 2007 | 2006 | 2005 |

Results of operations

Comparison of the years ended December 31, 2007, 2006 and 2005

We completed the acquisition of the Target Companies on January 16, 2007. Additionally, we completed the acquisition of eTapestry on August 1, 2007. On January 20, 2006, we acquired Campagne Associates, Ltd. The results of operations from the Target Companies, eTapestry and Campagne are included in our consolidated results of operations from the dates of their respective acquisition.

Revenue

The table below compares revenue from our statement of operations for the years ended December 31, 2007, 2006, and 2005.

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|----------------------|--------------------------|----------------|----------------|------------------|------------|------------------|------------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| License fees | \$ 37.5 | \$ 32.5 | \$ 30.0 | \$ 5.0 | 15% | \$ 2.5 | 8% |
| Services | 91.4 | 61.2 | 52.6 | 30.2 | 49% | 8.6 | 16% |
| Maintenance | 94.6 | 80.9 | 71.2 | 13.7 | 17% | 9.7 | 14% |
| Subscriptions | 25.4 | 10.6 | 6.9 | 14.8 | 140% | 3.7 | 54% |
| Other | 8.1 | 6.2 | 5.2 | 1.9 | 31% | 1.0 | 19% |
| Total revenue | \$257.0 | \$191.4 | \$165.9 | \$65.6 | 34% | \$25.5 | 15% |

Total revenue increased \$65.6 million, or 34%, in 2007 compared to 2006. A total of \$24.8 million or 38% of this increase was attributable to the inclusion of the Target Companies in our consolidated results of operations. The inclusion of eTapestry contributed \$3.5 million, or 5% of the total increase in revenue. The remaining increase in revenue in 2007, totaling \$37.3 million and representing a 19.5% increase over 2006 revenue, is due to growth in services and license fees to new and existing customers partially due to the introduction of new product offerings. Also contributing to the growth is revenue from new maintenance contracts associated with these new license agreements and existing client increases and revenue from our subscription offerings.

Total revenue increased \$25.5 million, or 15%, in 2006 compared to 2005. The increase in revenue in 2006 is due to growth in services and license fees to new and existing customers as well as the introduction of new product offerings. Also contributing to the growth is revenue from new maintenance contracts associated with these new license agreements and existing client increases and revenue from our subscription offerings.

Segment results

We analyze our business according to our six operating segments as identified in Note 14, which are license fees, consulting and education services, analytic services, maintenance, subscriptions and other. The analyses provided below are presented on a non-GAAP basis before the inclusion of various allocable corporate costs such as depreciation, facilities and information technology, or IT, support costs, stock-based compensation and amortization of intangibles arising from business combinations because, in managing our operations, we believe that the exclusion of these costs allows us to better understand and manage other operating expenses and cash needs. These excluded costs are analyzed separately following the segment results analysis.

Segment margin percentages discussed in this section are summarized in the following table.

| | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|-----------------------------------|--------------------------|------------|------------|-------------------------|-------------|-------------------------|-----------|
| | 2007 | 2006 | 2005 | Percentage point change | % Change | Percentage point change | % Change |
| License fees | 93% | 93% | 85% | — | 0% | 8 | 9% |
| Consulting and education services | 47% | 52% | 55% | (5) | (9)% | (3) | (6)% |
| Analytic services | 56% | 51% | 37% | 5 | 11% | 14 | 38% |
| Maintenance | 86% | 87% | 88% | (1) | (1)% | (1) | (1)% |
| Subscriptions | 69% | 80% | 81% | (11) | (14)% | (1) | (1)% |
| Other | 11% | 8% | 6% | 3 | 38% | 2 | 40% |

License fees

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|--|-----------------------------|--------|--------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| License fee revenue | \$37.5 | \$32.5 | \$30.0 | \$5.0 | 15% | \$ 2.5 | 8% |
| Direct controllable cost of license fees | 2.7 | 2.3 | 4.4 | 0.4 | 17% | (2.1) | (48)% |
| Segment income | \$34.8 | \$30.2 | \$25.6 | \$4.6 | 15% | \$ 4.6 | 18% |
| Segment margin % | 93% | 93% | 85% | | | | |

Revenue from license fees is derived from the sale of our software products, under a perpetual license agreement. License fee revenue growth in 2007 is comprised of an increase due to product price increases of approximately \$1.2 million and an increase due to volume and mix of products sold of \$3.8 million. Additionally, the increase in license fee revenue is attributable to a \$1.7 million increase in sales to existing clients and a \$3.0 million increase in sales to new clients. The Target Companies contributed \$0.4 million of license fee revenue in 2007.

Direct controllable cost of license fees includes third-party software royalties, costs of shipping software products to our customers and, in years prior to 2007, variable reseller commissions. The increase in cost of license fees in 2007 is comprised of a \$0.3 million increase in third party royalty payments associated with The Patron Edge, our ticketing software, and a \$0.3 million increase in proprietary software costs, offset by a \$0.2 million decrease due to reduced reseller commissions as a result of the discontinued use of that sales channel. The segment margin remained unchanged in 2007 compared to 2006.

License fee revenue growth in 2006, which is primarily volume driven, is attributable to a \$2.7 million increase in sales to new customers, including those previously associated with the acquisition of Campagne. This increase was offset by a \$0.2 million decrease in sales to existing clients.

The cost of license fees decrease in 2006 is primarily due to a \$1.6 million decrease in variable reseller commissions as a result of the discontinued use of that sales channel resulting in the increase of segment margin from 85% in 2005 to 93% in 2006.

Consulting and education services

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|---|-----------------------------|--------|--------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Consulting and education services revenue | \$73.2 | \$53.7 | \$46.9 | \$19.5 | 36% | \$6.8 | 14% |
| Direct controllable cost of consulting and education services | 38.8 | 26.0 | 21.1 | 12.8 | 49% | 4.9 | 23% |
| Segment income | \$34.4 | \$27.7 | \$25.8 | \$ 6.7 | 24% | \$1.9 | 7% |
| Segment margin % | 47% | 52% | 55% | | | | |

Consulting and education services revenue consists of consulting, installation, implementation and education services. Consulting, installation and implementation services involve converting data from a customer's existing system, assistance in file set up and system configuration, and/or process re-engineering. Education services involve customer training activities.

The rates charged for our service offerings have remained relatively constant year over year and, as such, the increase in revenue in 2007 is principally the result of increased volume of services provided. The increase in revenue is comprised of a \$15.2 million increase in consulting, installation and implementation services delivered, of which \$5.3 million is attributable to the Target Companies and \$0.3 million is attributable to eTapestry. Additionally, education services delivered increased \$4.3 million or 25%. Of this increase, \$2.9 million is attributable to Training Pass, our fixed-rate program, which permits customers to attend unlimited training over a specified contract period.

Cost of consulting and education services is principally comprised of human resource costs, third-party contractor expenses, classroom rentals and other costs incurred in providing consulting, installation and implementation services and customer training. During 2007, salary, benefit and bonus expense increased \$11.3 million, or a 55% increase, compared to 2006 as we increased headcount to meet growing customer demand. A total of \$2.2 million, or 19% of the increase in salary, benefits and bonus expense is due to the inclusion of headcount associated with the Target Companies and an additional \$0.2 million from the inclusion of the headcount associated of eTapestry. Additionally, travel-related expenses and training materials increased \$1.4 million.

The margin decrease in 2007 compared to 2006 is due to increased human resource costs related to our successful hiring efforts in 2007 and lower utilization as a result of a greater percentage of headcount not fully trained compared to the prior year and other scheduling challenges of matching client demands with consultants' availability and appropriate skill set. Additionally, average billing rates for our consultants have remained relatively constant while consultant's salaries and related human resource costs have increased year over year.

The increase in revenue in 2006 compared to 2005 is comprised of a \$5.6 million increase in consulting, installation and implementation services delivered and a \$1.2 million increase in education services delivered.

During 2006, salary, benefit and bonus expense increased \$3.4 million compared to 2005 as we increased headcount to meet growing customer demand. Other increases include increased travel-related expenses and services from contractors totaling \$0.8 million, recruiting and relocation costs totaling \$0.2 million and higher training class costs of \$0.2 million.

The increases in salary, benefits and bonus and outside consultant costs contributed to the margin compression experienced in 2006 compared to 2005.

Analytic services

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|---|-----------------------------|-------|-------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Analytic services revenue | \$18.2 | \$7.5 | \$5.7 | \$10.7 | 143% | \$ 1.8 | 32% |
| Direct controllable cost of analytic services | 8.0 | 3.6 | 3.6 | 4.4 | 122% | — | — % |
| Segment income | \$10.2 | \$3.9 | \$2.1 | \$ 6.3 | 162% | \$ 1.8 | 86% |
| Segment margin % | 56% | 52% | 37% | | | | |

Analytic services, which are comprised of donor prospect research, benchmarking studies and data modeling services involve the assessment of current and prospective donor information of the customer. The end product enables the customer to more effectively target its fundraising activities. These assessments are performed using our proprietary analytical tools. Revenue from analytic services increased 143% in 2007 compared to 2006. The increase in analytic services is comprised of a \$10.7 million increase in donor prospect research, sales of lists of potential donors, benchmarking studies and data modeling services delivered, of which \$8.6 million is attributable to the Target Companies.

Cost of analytic services is primarily comprised of human resource costs and data expense incurred to perform analytic services. The increase in cost of analytic services in 2007 compared to 2006 is principally due the inclusion of headcount associated with the Target Companies. Salary, benefits and bonus expense increased \$3.8 million in 2007 compared to 2006, of which \$3.2 million is directly related to the Target Companies. Additionally, data expense incurred to deliver analytic services increased \$0.4 million, of which \$0.2 million is directly associated with revenue from the Target companies.

The analytic services margin increase in 2007 compared to 2006 is attributable to including the analytic services segment of the Target Companies, which has a different cost structure and a higher margin than the segment including Blackbaud only.

Revenue from analytic services increased 32% in 2006 compared to 2005. The increase in analytic services is comprised of a \$1.8 million increase in donor prospect research and data modeling services delivered.

During 2006, the cost of revenue in providing donor prospect research and data modeling services remained relatively flat improving margins as we recognized efficiencies and were able to deliver more services with a nominal increase in headcount.

Maintenance

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|---|-----------------------------|--------|--------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Maintenance revenue | \$94.6 | \$80.9 | \$71.2 | \$13.7 | 17% | \$9.7 | 14% |
| Direct controllable cost of maintenance | 13.4 | 10.8 | 8.6 | 2.6 | 24% | 2.2 | 26% |
| Segment income | \$81.2 | \$70.1 | \$62.6 | \$11.1 | 16% | \$7.5 | 12% |
| Segment margin % | 86% | 87% | 88% | | | | |

Revenue from maintenance is comprised of annual fees derived from maintenance contracts associated with new software licenses and annual renewals of existing maintenance contracts. These contracts provide customers updates, enhancements and upgrades to our software products and online, telephone and email support. The increase in maintenance revenue in 2007 compared to 2006 is comprised of \$12.6 million of new maintenance contracts associated with new license agreements, including new products, \$2.5 million from maintenance agreements associated with customers of the Target Companies and \$2.3 million from maintenance contract inflationary rate adjustments, offset by \$3.9 million of maintenance contracts that were not renewed.

Direct controllable cost of maintenance is primarily comprised of human resource costs, third-party contractor expenses, third-party royalty costs and data expenses, and other costs incurred in providing support and services to our customers. During 2007 the cost of maintenance increase is principally the result of a \$2.5 million increase in salary, benefits and bonus expense, of which \$0.7 million is due the inclusion of headcount associated with the acquisition of the Target Companies. Increases from third-party royalty costs contributed an additional \$0.1 million.

The maintenance revenue increase in 2006 compared to 2005 is comprised of \$8.2 million of new maintenance contracts associated with new license agreements, including new products, \$2.8 million from maintenance contract inflationary rate adjustments, and \$1.5 million from maintenance agreements associated with customers acquired as part of the purchase of Campagne Associates, Ltd., offset by a decrease of \$2.8 million due to maintenance contracts that were not renewed.

During 2006 the cost of maintenance increase is principally the result of a \$1.5 million increase in salary, benefits and bonus expense and a \$0.7 million increase in royalty payments related to our Patron Edge maintenance revenue.

Subscriptions

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|---|-----------------------------|--------|-------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Subscriptions revenue | \$25.4 | \$10.6 | \$6.9 | \$14.8 | 140% | \$3.7 | 54% |
| Direct controllable cost of subscriptions | 7.8 | 2.1 | 1.3 | 5.7 | 271% | 0.8 | 62% |
| Segment income | \$17.6 | \$ 8.5 | \$5.6 | \$ 9.1 | 107% | \$2.9 | 52% |
| Segment margin % | 69% | 80% | 81% | | | | |

Revenue from subscriptions is principally comprised of revenue from providing access to hosted applications, providing application hosting services, and access to certain data services and our online subscription training offerings. The increase in subscriptions revenue in 2007 compared to 2006 is principally due to a \$10.7 million increase in revenue from providing access to our hosted applications, of which \$7.4 million is attributable to the Target Companies and \$2.7 million is attributable to eTapestry. Additionally, revenue from application hosting services increased \$1.7 million and revenue from our online analytics products increased \$2.4 million.

Direct controllable cost of subscriptions is primarily comprised of human resource costs, third-party royalty and data expenses, hosting expenses, and other costs incurred in providing support and services to our customers. The increase in the cost of subscriptions in 2007 compared to 2006 is primarily due to an increase in salary, benefits and bonus expenses, which increased \$4.9 million, of which \$3.9 million and \$0.4 million is due to the inclusion of headcount associated with the acquisitions of the Target Companies and eTapestry, respectively. Additionally, data expense increased \$0.4 million and travel-related and other costs increased an additional \$0.4 million.

The decrease in subscriptions margin in 2007 compared to 2006 is predominantly due to higher salaries, benefits, and bonus expense as a result of the inclusion of costs related to the Target Companies.

The increase in subscriptions revenue in 2006 compared to 2005 is principally due to a \$1.1 million increase in revenue from providing access to our hosted applications. Additionally, revenue from our online analytics products increased \$1.0 million and revenue from our application hosting services increased \$0.9 million. Other subscription revenue contributed \$0.5 million of the increase, of which \$0.2 million attributable to Campaign products.

The increase in the cost of subscriptions in 2006 compared to 2005 is primarily due to an increase in salary, benefits and bonus expenses, which increased \$0.7 million as we increased headcount to meet customer demand.

Other revenue

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|---|-----------------------------|-------|-------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Other revenue | \$8.1 | \$6.2 | \$5.2 | \$1.9 | 31% | \$1.0 | 19% |
| Direct controllable cost of other revenue | 7.2 | 5.7 | 4.9 | 1.5 | 26% | 0.8 | 16% |
| Segment income | \$0.9 | \$0.5 | \$0.3 | \$0.4 | 80% | \$0.2 | 67% |
| Segment margin % | 11% | 8% | 6% | | | | |

Other revenue includes the sale of business forms that are used in conjunction with our software products; reimbursement of travel-related expenses, primarily incurred during the performance of services at customer locations; fees from user conferences; and sale of hardware in conjunction with The Patron Edge. Other revenue increased in 2007 primarily due to a \$1.5 million increase in reimbursable travel-related costs from our services businesses. Additionally, revenue from user conferences increased \$0.4 million, of which \$0.3 million is attributable to the Target Companies.

Direct controllable cost of other revenue includes human resource costs, costs of business forms and reimbursable expenses relating to the performance of services at customer locations. The increase in 2007 compared to 2006 is due to a \$1.3 million increase in reimbursable expenses related to providing services at clients' sites and a \$0.2 million increase in costs associated with our user conferences.

The margin increase in 2007 is due to an increase in realization of reimbursable travel-related costs associated with providing services at clients' sites as a percentage of other revenue.

Other revenue increased in 2006 primarily due to a \$0.4 million increase in reimbursable travel costs from our services businesses and a \$0.2 million increase from the sale of our business forms.

The increase in the cost of other revenue in 2006 compared to 2005 is predominantly due to a \$0.8 million increase in reimbursable expenses related to providing services at clients' sites.

The margin increase in 2006 is primarily due to decreases in conference costs and salaries, benefits and bonus expense totaling \$0.3 million.

U.S. GAAP gross profit

Segment income does not include an allocation of corporate costs, stock-based compensation expense and amortization expense. The following schedule reconciles total segment income to gross profit as stated on the statement of operations.

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|---|--------------------------|---------|---------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Segment income | | | | | | | |
| License fees | \$ 34.8 | \$ 30.2 | \$ 25.6 | \$ 4.6 | 15% | \$ 4.6 | 18% |
| Consulting and education services | 34.4 | 27.7 | 25.8 | 6.7 | 24% | 1.9 | 7% |
| Analytic services | 10.2 | 3.9 | 2.1 | 6.3 | 162% | 1.8 | 86% |
| Maintenance | 81.2 | 70.1 | 62.6 | 11.1 | 16% | 7.5 | 12% |
| Subscriptions | 17.6 | 8.5 | 5.6 | 9.1 | 107% | 2.9 | 52% |
| Other | 0.9 | 0.5 | 0.3 | 0.4 | 80% | 0.2 | 67% |
| Total segment income | 179.1 | 140.9 | 122.0 | 38.2 | 27% | 18.9 | 15% |
| Less corporate costs not allocated to segment expenses: | | | | | | | |
| Stock-based compensation expense | 1.1 | 0.7 | 0.3 | 0.4 | 57% | 0.4 | 133% |
| Amortization of intangible assets acquired in business combinations | 2.9 | — | — | 2.9 | — | — | — |
| Corporate overhead costs | 10.5 | 6.1 | 5.9 | 4.4 | 72% | 0.2 | 3% |
| Gross profit as stated in statement of operations | \$164.6 | \$134.1 | \$115.8 | \$30.5 | 23% | \$18.3 | 16% |
| Gross margin % | 64% | 70% | 70% | | | | |

Stock-based compensation expense and amortization expense are analyzed separately following the operating expenses section.

Corporate overhead costs are comprised of depreciation, facilities and IT support costs. Of the \$4.4 million increase in 2007, \$1.9 million and \$0.2 million are attributable the Target companies and eTapestry, respectively. Overhead costs increased due to the lease of two additional office facilities. Facilities expense increased \$0.8 million in rent expense and general and other facility costs as the result of leasing additional office space, a sublease expiring and a decrease in the South Carolina state incentive, which is accounted for as a reduction to rent, and a \$0.2 million increase in communications expense. IT support costs increased \$0.7 million, of which \$0.3 million is human resource costs and \$0.4 million is maintenance cost on internally used software. Additionally, depreciation expense increased \$0.4 million.

Corporate overhead costs increased in 2006 is due to a \$0.1 million increase in depreciation expense and a \$0.1 million increase in IT support costs.

Operating expenses

The operating expenses analyzed below are presented on a non-U.S. GAAP basis as they exclude stock-based compensation expense. We believe that the exclusion of these costs allows us to better understand and manage other operating expenses and cash needs. Stock-based compensation expense is analyzed, in total, in the section following the operating expense analysis.

Sales and marketing

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|-----------------------------|--------------------------|--------|--------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Sales and marketing expense | \$56.2 | \$40.6 | \$33.3 | \$15.6 | 38% | \$7.3 | 22% |
| Percentage of revenue | 22% | 21% | 20% | | | | |

Sales and marketing expense includes salaries and related human resource costs, travel-related expenses, sales commissions, advertising and marketing materials, public relations and an allocation of depreciation, facilities and IT support costs. The increase in sales and marketing expense in 2007 compared to 2006 in absolute dollars and as a percentage of revenue is principally due to the increase in the size of our sales force by approximately 27%. During 2007, salaries, benefits and bonus expense increased \$8.2 million, of which \$3.1 million and \$0.9 million is due to the inclusion of headcount associated with the Target Companies and eTapestry, respectively. Additionally, commissions increased \$3.7 million due to higher commissionable sales. Other increases include higher allocated costs of \$1.6 million, higher travel-related expenses of \$1.3 million and higher marketing expenses of \$0.7 million.

The increase in sales and marketing expense in 2006 compared to 2005 in absolute dollars and as a percentage of revenue is principally due to increases in the size of our sales force. During 2006, salaries, benefits and bonus expense increased \$3.4 million. Additionally, commissions increased \$1.9 million due to higher commissionable sales. Other increases include higher allocated costs of \$0.3 million, higher travel-related expenses of \$0.8 million, higher marketing expenses of \$0.6 million and higher recruiting and relocation costs of \$0.1 million.

Research and development

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|----------------------------------|--------------------------|--------|--------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Research and development expense | \$27.3 | \$22.4 | \$21.0 | \$4.9 | 22% | \$1.4 | 7% |
| Percentage of revenue | 11% | 12% | 13% | | | | |

Research and development expenses include salaries and related human resource costs, third-party contractor expenses, software development tools and other expenses related to developing new products, upgrading and enhancing existing products and an allocation of depreciation, facilities and IT support costs. During 2007, the increase in absolute dollars in research and development costs is primarily due to a \$4.9 million increase in salaries, benefits and bonus expense of which \$1.0 million and \$0.5 million are due to the inclusion of headcount associated with the Target Companies and eTapestry, respectively. We discontinued the use of offshore contractors during the fourth quarter of 2006 resulting in the need for additional staffing for the development of new product offerings. A further increase of \$1.0 million is attributable to higher allocated costs. These increases were offset by a \$1.0 million decrease in outside contractor expenses as a result of the discontinued use of offshore contractors.

During 2006, the increase in research and development costs is primarily due to a \$1.7 million increase in salaries, benefits and bonus expense associated with increased headcount as development projects with offshore

contractors ended and additional staffing was needed to develop new product offerings internally. This increase was partially offset by a \$0.3 million decrease in outside contractor expenses.

Research and development as a percentage of revenue decreased one percentage point in 2007 and 2006. During 2007, we focused on reevaluating and, as necessary, revising our product development plans in light of the combination with the Target Companies and eTapestry. As we begin to execute these plans, we expect research and development to increase as a percentage of revenue in future periods.

General and administrative

| (in millions) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|------------------------------------|-----------------------------|--------|--------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| General and administrative expense | \$22.4 | \$16.6 | \$16.1 | \$5.8 | 35% | \$0.5 | 3% |
| Percentage of revenue | 9% | 9% | 10% | | | | |

General and administrative expense consists primarily of human resource costs for general corporate functions, including finance, accounting, legal, human resources, corporate development, third-party professional fees, insurance, an allocation of depreciation, facilities and IT support costs, and other administrative expenses. During 2007, general and administrative expenses increased \$5.8 million compared to 2006; of this amount, \$2.7 million and \$0.4 million are attributable to the inclusion of the Target Companies and eTapestry, respectively. This \$5.8 million increase was primarily driven by a \$3.3 million increase in salaries, benefits and bonus expense associated with additional headcount, of which \$1.1 million and \$0.2 million are due to the inclusion of the Target Companies and eTapestry, respectively. Other increases include higher travel-related expenses, third-party professional fees, allocated costs, insurance, recruiting and relocation expenses, bad debt expense and other costs of \$2.4 million. General and administrative expenses remained relatively constant as a percentage of revenue in 2007 compared to 2006.

During 2006, general and administrative expenses increased \$0.5 million compared to 2005. Of this increase, a total of \$0.9 million is due to an increase in salaries, benefits and bonus expense associated with additional headcount. This increase was offset by a \$0.4 million decrease in expenses associated with the cost of compliance with the Sarbanes-Oxley Act of 2002 and costs associated with hiring of a successor Chief Executive Officer.

Stock-based compensation

Beginning on January 1, 2006, we adopted SFAS No. 123(R), using the modified prospective transition method. SFAS No. 123(R) requires us to recognize compensation expense related to stock-based awards to employees.

Our consolidated statements of operations for 2007, 2006 and 2005 include the amounts of stock-based compensation illustrated below:

| (in thousands) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|--------------------------------------|--------------------------|---------|--------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Included in cost of revenue: | | | | | | | |
| Cost of services | \$ 627 | \$ 531 | \$ 269 | \$ 96 | 18% | \$ 262 | 1% |
| Cost of maintenance | 234 | 117 | 33 | 117 | 100 | 84 | 3 |
| Cost of subscriptions | 274 | 19 | — | 255 | 1,342 | 19 | — |
| Total included in cost of revenue | 1,135 | 667 | 302 | 468 | 70 | 365 | 1 |
| Included in operating expenses: | | | | | | | |
| Sales and marketing | 831 | 813 | 217 | 18 | 2 | 596 | 3 |
| Research and development | 1,219 | 746 | 139 | 473 | 63 | 607 | 4 |
| General and administrative | 3,749 | 5,174 | (343) | (1,425) | (28) | 5,517 | (16) |
| Total included in operating expenses | 5,799 | 6,733 | 13 | (934) | (14) | 6,720 | 517 |
| Total | \$6,934 | \$7,400 | \$ 315 | \$ (466) | (6)% | \$7,085 | 22% |

Stock-based compensation is comprised of expense from stock options, restricted stock awards and stock appreciation rights. The table below summarizes the stock-based compensation by award type for 2007, 2006 and 2005.

| (in thousands) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|--------------------------------|--------------------------|---------|--------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Stock-based compensation from: | | | | | | | |
| Stock options | \$2,385 | \$5,512 | \$(53) | \$(3,127) | (57)% | \$5,565 | N/A% |
| Restricted stock awards | 3,821 | 1,807 | 368 | 2,014 | 111 | 1,439 | 391 |
| Stock appreciation rights | 728 | 81 | — | 647 | 799 | 81 | — |
| Total stock-based compensation | \$6,934 | \$7,400 | \$315 | \$ (466) | (6)% | \$7,085 | 22% |

The decrease in total stock-based compensation in 2007 compared to 2006 is the result of using the accelerated method for recognizing stock-based compensation expense associated with stock options. This method results in the recognition of more expense in the earlier periods of vesting when compared with the straight-line method of amortization, which results in equal amounts of expense in all vesting periods. Furthermore, there have been no new grants of stock options since 2005. The decrease in stock option expense is partially offset by an increase in compensation expense from restricted stock awards due to an increase in number of awards granted and their associated amortization. Additionally, grants of stock appreciation rights, which began in the fourth quarter of 2006, contributed to an increase in stock-based compensation expense for 2007 compared to 2006.

The total amount of compensation costs related to non-vested awards not yet recognized was \$26,939,000 as of December 31, 2007. This amount will be recognized over a weighted average period of 1.75 years.

Under the fair value recognition provisions of SFAS No. 123(R), stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the requisite service period,

which is the vesting period. The provisions of SFAS No. 123(R) apply to grants made after the adoption date, awards modified, repurchased or cancelled after the adoption date and existing grants which were partially unvested at that date. Compensation expense for grants outstanding on the date of adoption is recognized over the remaining service period using the grant date fair values and amortization methods determined previously for the SFAS No. 123, "Accounting for Stock-Based Compensation," pro forma disclosures. Prior to the adoption of SFAS No. 123(R), certain of our options were accounted for as variable awards under the provisions of APB No. 25, which required us to record deferred compensation, and recognize compensation expense over the requisite vesting period, for the difference between the exercise price and the fair market value of the stock at each reporting date. The increase in stock-based compensation expense related to stock options in 2006 compared to 2005 is due the recognition of expense related to the unamortized portion of the fair value of the awards existing at the adoption of SFAS No. 123(R). The treatment of compensation expense related to restricted stock awards is the same under SFAS No. 123(R) and APB 25. Therefore, the increase in stock-based compensation expense related to restricted stock awards in 2006 is from the impact of a full year of expense in 2006 from awards granted in late 2005.

Amortization

Amortization expense is allocated according to the nature of the respective identifiable intangible asset and, to the extent associated directly with revenue, we allocate amortization expense to the respective cost of revenue. Amortization expense included in our consolidated statements of operations for the years ended December 31, 2007, 2006 and 2005 is illustrated below:

| (in thousands) | Years ended December 31, | | | 2007 versus 2006 | | 2006 versus 2005 | |
|-----------------------------------|--------------------------|-------|------|------------------|----------|------------------|----------|
| | 2007 | 2006 | 2005 | Change | % Change | Change | % Change |
| Included in cost of revenue: | | | | | | | |
| Cost of license fees | \$153 | \$— | \$— | \$153 | 100% | \$— | — % |
| Cost of services | 1,178 | — | — | 1,178 | 100 | — | — |
| Cost of maintenance | 406 | — | — | 406 | 100 | — | — |
| Cost of subscriptions | 1,112 | — | — | 1,112 | 100 | — | — |
| Cost of other revenue | 96 | — | — | 96 | 100 | — | — |
| Total included in cost of revenue | 2,945 | — | — | 2,945 | 100 | — | — |
| Included in operating expenses: | 491 | 699 | 18 | (208) | (30) | 681 | 3,783 |
| Total | \$3,436 | \$699 | \$18 | \$2,737 | 392% | \$681 | 3,783% |

The increase in amortization expense in 2007 compared to 2006 is directly attributable to the acquisition of the Target Companies and eTapestry which resulted in the recognition of approximately \$32.7 million in identifiable intangible assets with estimated useful lives ranging from 5 to 15 years. The increase in 2006 compared to 2005 is attributable to the acquisition of Campagne, which resulted in the recognition of approximately \$8.2 million in identified intangible assets with estimated useful lives ranging from 3 to 15 years.

Interest expense

Interest expense was \$1.2 million in 2007 compared with less than \$0.1 million in 2006. This increase in interest expense is directly related to our borrowing under our credit facility in connection with the acquisitions of the Target Companies and eTapestry and other short-term liquidity purposes. Interest expense was less than \$0.1 million in 2005.

Income tax provision

We record income tax expense in our consolidated financial statements based on an estimated annual effective income tax rate. We had an effective tax rate of 38.5%, 37.7% and 28.5% in 2007, 2006 and 2005, respectively. In 2005, the lower effective rate was attributable to recognizing the benefit of certain state income tax credits.

Significant judgment is required in determining the provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We account for income taxes using the asset and liability approach as prescribed by SFAS No. 109, "Accounting for Income Taxes." This approach requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the consolidated financial statements or income tax returns. Using the enacted tax rates in effect for the year in which the differences are expected to reverse, deferred tax assets and liabilities are determined based on the differences between the financial reporting and the tax basis of an asset or liability. A valuation allowance is recorded when it is more likely than not that the deferred tax asset will not be realized. If a change in the effective tax rate to be applied to the timing differences or a change in a valuation reserve is determined to be appropriate, it will affect the provision for income taxes during the period that the determination is made.

In 2007 and 2006, we increased our deferred tax asset valuation allowance by \$0.7 million and \$0.1 million, respectively, for state credits that are expected to expire unused.

In 2005, we recognized an income tax benefit of \$3.2 million related to changes in state income tax credits. Our deferred tax asset at December 31, 2004 included state income tax credits, net of federal taxes at 34.8%, of approximately \$4.0 million that expire between 2009 and 2019. We established a full valuation allowance against these credits when the asset was recorded because, based on information available at that time, it was not deemed probable that these credits would be realized. During 2005, as a result of profitable results in 2004 and 2003, expectations of future profitability and utilization of all related state net operating losses, we released \$2.3 million of the valuation allowance related to these state income tax credits which resulted in a credit to income tax expense for 2005. Additionally, certain other state tax credits whose use was previously restricted to reducing state franchise taxes became available to offset state income tax as a result of a clarification in enacted tax law during 2005. Accordingly, a deferred tax asset was established during 2005 in the amount of \$2.2 million, net of federal taxes at 34.8%, related to the associated future reduction of state income taxes which resulted in an additional credit to income tax expense for 2005. A valuation allowance was established for \$1.3 million of the \$2.2 million representing the portion of the credits not deemed more likely than not to be utilized which resulted in a debit to income tax expense for 2005. The net effect of these items related to state income tax credits was a decrease in our 2005 income tax expense of \$3.2 million. We continue to evaluate the realizability of the remaining state tax credits and any further adjustment to the valuation allowance will be made in the period we determine it is more likely than not any of the remaining credits will be utilized.

Our deferred tax assets and liabilities are recorded at an amount based upon a U.S. federal income tax rate of 35.0% and appropriate statutory tax rates of various foreign, state and local jurisdictions in which we operate. If our tax rates change in the future, we may adjust our deferred tax assets and liabilities to an amount reflecting those income tax rates. If such change is determined to be appropriate, it will affect the provision for income taxes during the period that the determination is made.

We adopted the provisions of FIN 48 on January 1, 2007. As a result of the implementation of FIN 48, we recognized a \$0.3 million reduction to the January 1, 2007 balance of retained earnings. The total amount of unrecognized tax benefits as of January 1, 2007, the date of adoption, was \$0.6 million, of which \$0.4 million would impact our effective rate if recognized. As of the date of adoption, the total amount of accrued interest and penalties was \$0.3 million.

The following table reconciles the amounts of unrecognized tax benefits at January 1, 2007 and December 31, 2007.

| (in thousands) | Unrecognized tax benefits |
|---|------------------------------|
| Balance at January 1, 2007 | \$642 |
| Increases from prior period positions | 11 |
| Decreases from prior period positions | (15) |
| Increases from current period positions | 8 |
| Decreases relating to settlements with taxing authorities | (23) |
| Balance at December 31, 2007 | \$623 |

The amount of unrecognized tax benefits that, if recognized, would impact our effective tax rate was \$0.4 million at December 31, 2007. Tax expense for 2007 was increased by \$25,000 for changes in liabilities, penalties and accrued interest related to uncertain tax positions. The total amounts of interest and penalties included in the consolidated balance sheet as of December 31, 2007 is \$0.3 million.

We have taken positions in certain taxing jurisdictions for which it is reasonably possible that the total amounts of unrecognized tax benefits may significantly decrease within the next twelve months. The possible decrease could result from the finalization of state income tax reviews and the expiration of statutes of limitations. The reasonably possible decrease is \$0.6 million.

We file income tax returns in the U.S. federal and various state jurisdictions and foreign jurisdictions including Canada, United Kingdom and Australia. We are subject to U.S. federal income tax examination for calendar tax years ending 2004 through 2007.

Liquidity and capital resources

At December 31, 2007, cash and cash equivalents totaled \$14.8 million, compared to \$67.8 million at December 31, 2006. The \$53.0 million decrease in cash and cash equivalents during 2007 is principally the result of:

- generating \$62.9 million of cash from operations;
- \$10.4 million from the proceeds and excess tax benefits of stock option exercises;

offset by:

- \$83.4 million, net of cash acquired, used to purchase the Target Companies and eTapestry and \$1.0 million used in payment of contingent consideration related to Campagne;
- \$14.4 million used to purchase our stock under our stock repurchase program and \$1.5 million used to purchase shares from restricted stock holders to satisfy their tax obligation;
- \$15.1 million in dividends paid to stockholders;
- \$8.1 million used to purchase fixed assets.

Further details of operating, investing and financing cash flows are provide below.

Our principal source of liquidity is our operating cash flow, which depends on continued customer renewal of our maintenance and support agreements and market acceptance of our products and services. Based on current estimates of revenue and expenses, we believe that the currently available sources of funds and anticipated cash flows from operations will be adequate to finance our operations and anticipated capital expenditures for the foreseeable future and repay any outstanding debt that might be incurred. Dividend payments are not guaranteed and our Board of Directors may decide, in its absolute discretion, at any time and for any reason, not to declare or pay further dividends and/or repurchase our common stock. There were no principle or interest amounts outstanding under the credit facility as of December 31, 2007.

We have drawn on our credit facilities from time to time to help us meet other short-term financial needs, such as business acquisitions. On July 25, 2007, we entered into a new five-year, \$75.0 million credit facility, with an optional incremental increase of up to \$50 million, to replace our previous three-year, \$30.0 million credit facility that would have expired September 30, 2007; the new credit facility provides us with greater financial flexibility because of its size and more favorable terms compared with the previous facility.

Operating cash flow

Net cash provided by operating activities decreased \$0.1 million to \$62.9 million in 2007 compared to \$63.0 million as reported for 2006. Throughout both periods, our cash flows from operations were derived principally from: (i) our earnings from on-going operations prior to non-cash expenses such as depreciation, amortization and stock-based compensation and adjustments to our provision for sales returns and allowances; (ii) the tax benefit associated with our deferred tax asset, which reduces our cash outlay for income tax expense; and (iii) changes in our working capital.

Working capital changes as they impact the statement of cash flows are composed of accounts receivable, other current assets, accounts payable, accrued expenses, accrued liabilities and deferred revenue. Net collections of accounts receivable and increases in deferred revenue represent a decrease in working capital of \$3.1 million and \$6.5 million in 2007 and 2006, respectively. Changes in our balances of accounts payable, accrued expenses, accrued liabilities and other current assets represent an increase in working capital of \$3.2 million and \$7.5 million in 2007 and 2006, respectively. Changes in working capital are driven by a number of factors, including becoming a tax payer again in 2007 and the timing of vendor payments. We made tax payments in 2007 totaling \$5.6 million compared to \$0.7 million in 2006 and \$3.9 million in 2005.

Investing cash flow

Net cash used in 2007 for investing activities was \$92.5 million compared to \$10.8 million of net cash used in investing activities in 2006. The increase is principally due to the acquisitions of the Target Companies on January 16, 2007 and eTapestry on August 1, 2007. We invested \$8.1 million in property and equipment in 2007 compared to \$4.7 million in 2006, an increase of \$3.5 million as we made investments in our infrastructure to support our growth.

Financing cash flow

Net cash used in financing activities for 2007 was \$23.4 million, comprised of \$48.0 million provided by the issuance of debt in connection with the acquisitions of the Target Companies and eTapestry and other liquidity purposes and \$10.4 million from the proceeds and excess tax benefits of stock option exercises, offset by \$42.5 million used to repay debt incurred in connection with the acquisitions of the Target Companies and eTapestry, \$5.5 million used to repay short-term borrowings, \$14.4 million used for repurchases of our stock under our stock repurchase program, dividend payments of \$15.1 million to stockholders, \$1.9 million used to repay debt assumed in connection with the Target Companies, \$1.5 million used to repurchase shares from restricted stockholders, \$0.4 million paid for deferred financing fees in connection with our new credit facility and \$0.5 million used to pay capital lease obligations. Comparatively, net cash used in financing activities for 2006 was \$7.1 million, comprised of \$8.7 million for purchases of our stock and dividend payments of \$12.3 million to stockholders, offset by proceeds from stock option exercises of \$7.9 million and \$6.0 million of excess tax benefits from stock option exercises.

Commitments and contingencies

As of December 31, 2007, we had future minimum lease commitments of \$20.4 million as follows:

| (in thousands) | Payments Due by Period | | | | |
|------------------|------------------------|------------------|-----------|-----------|-------------------|
| | Total | Less than 1 year | 1-3 years | 3-5 years | More than 5 years |
| Operating leases | \$19,145 | \$6,963 | \$11,167 | \$639 | \$376 |
| Capital leases | 1,241 | 629 | 570 | 42 | — |
| Total | \$20,386 | \$7,592 | \$11,737 | \$681 | \$376 |

Our commitments related to operating leases have not been reduced by the future minimum lease commitments under various sublease agreements extended through 2008, which total \$0.1 million.

In connection with the acquisition of eTapestry on August 1, 2007, discussed in Note 2 of the consolidated financial statements as of and for the three year ended December 31, 2007, we could pay up to a total of \$1.5 million in contingent consideration based on the performance of eTapestry for the twelve-month periods ending September 30, 2008 and 2009, which is not included in the table above.

In connection with the acquisition of the Target Companies on January 16, 2007, discussed in Note 2 of the consolidated financial statements as of and for the year ended December 31, 2007, we could pay up to \$2.4 million of contingent consideration based on the performance of the Target Companies during the 2007 fiscal year. We expect that we will pay between \$2.3 million and \$2.4 million related to this obligation in March 2008, which is not included in the table above.

In connection with the January 2006 purchase of Campagne Associates, Ltd., we could pay up to \$2.5 million of contingent consideration as part of the acquisition. Of the \$2.5 million of contingent consideration, \$1.0 million was paid in March 2007. The remaining contingent consideration, if any, will be payable in the first quarter of 2008 based on performance during the second year following the acquisition.

As of December 31, 2007, we have accrued \$0.6 million of state taxes and \$0.4 million of interest and penalties related to uncertain tax positions taken in current and prior years. Please refer to Note 10 in our notes to the consolidated financial statements for further information. We are unable to determine the period in which these liabilities will be settled, and accordingly, we have not included these amounts in the table above, which is not included in the table above.

We utilize third-party relationships in conjunction with our products. The contractual arrangements vary in length from one to four years. In certain cases, these arrangements require a minimum annual purchase commitment. The total minimum annual purchase commitment under these arrangements at December 31, 2007 is approximately \$0.7 million through 2010, which is not included in the table above. We incurred expense under these arrangements of \$0.8 million, \$0.7 million and \$0.7 million for the years ended December 31, 2007, 2006 and 2005, respectively.

Our Board of Directors approved an increase in our annual dividend from \$0.34 to \$0.40 per share in 2008 and declared a first quarter dividend of \$0.10 per share payable on March 14, 2008 to stockholders of record on February 28, 2007. Dividends at this rate would total approximately \$18.0 million in the aggregate on the common stock in 2008 (assuming 45,000,000 shares of common stock are outstanding). Our ability to pay dividends may be restricted by, among other things, the terms of our credit facility.

Foreign currency exchange rates

Approximately 14.1% of our total net revenue for the year ended December 31, 2007 was derived from operations outside the United States. We do not have significant operations in countries in which the economy is considered to be highly inflationary. Our consolidated financial statements are denominated in U.S. dollars and, accordingly, changes in the exchange rate between foreign currencies and the U.S. dollar will affect the translation of our subsidiaries' financial results into U.S. dollars for purposes of reporting our consolidated financial results. The accumulated currency translation adjustment, recorded as a separate component of stockholders' equity, was \$0.1 million and \$0.2 at December 31, 2007 and 2006, respectively.

The vast majority of our contracts are entered into by our U.S., Canadian or U.K. entities. The contracts entered into by the U.S. entity are almost always denominated in U.S. dollars, contracts entered into by our Canadian subsidiary are generally denominated in Canadian dollars, and contracts entered into by our U.K. subsidiary are generally denominated in pounds sterling. In recent years, the U.S. dollar has weakened against many non-U.S. currencies, including the British pound and Canadian dollar. During this period, our revenues generated in the United Kingdom have increased. Though we do not believe our increased exposure to currency exchange rates have had a material impact on our results of operations or financial position, we intend to continue to monitor such exposure and take action as appropriate.

Cautionary statement

We operate in a highly competitive environment that involves a number of risks, some of which are beyond our control. The following statement highlights some of these risks.

Statements contained in this Form 10-K, which are not historical facts, are or might constitute forward-looking statements under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Although we believe the expectations reflected in such forward-looking statements are based on reasonable assumptions, we can give no assurance that our expectations will be attained. Forward-looking statements involve known and unknown risks that could cause actual results to differ materially from expected results. Factors that could cause actual results to differ materially from our expectations expressed in the report include management of integration of recently acquired companies and other risks associated with acquisitions; risk associated with successful implementation of multiple integrated software products; lengthy sales and implementation cycles, particularly in larger organizations; uncertainty regarding increased business and renewals from existing customers; continued success in sales growth; the ability to attract and retain key personnel; risks related to our dividend policy and stock repurchase program, including potential limitations on our ability to grow and the possibility that we might discontinue payment of dividends; risks relating to restrictions imposed by the credit facility; risks associated with management of growth; technological changes that make our products and services less competitive; and the other risk factors set forth from time to time in our SEC filings.

New accounting pronouncements

In December 2007, the FASB issued SFAS No. 141 (revised 2007), "Business Combinations" ("SFAS No. 141R"). SFAS No. 141R establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. SFAS No. 141R also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS No. 141R is effective for financial statements issued for fiscal years beginning after December 15, 2008. We are currently evaluating the potential impact of adoption of SFAS No. 141R on our consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160. "Noncontrolling Interests in Consolidated Financial Statements-an Amendment of ARB No. 51" (SFAS No. 160). SFAS 160 establishes accounting and reporting standards pertaining to ownership interests in subsidiaries held by parties other than the parent, the amount of net

income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest, and the valuation of any retained noncontrolling equity investment when a subsidiary is deconsolidated. This statement also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS No. 160 is effective for fiscal years beginning on or after December 15, 2008. We are currently evaluating the potential impact of adoption of SFAS No. 160 on our consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Liabilities, including an amendment of FASB Statement No. 115" ("SFAS No. 159"). SFAS No. 159 permits entities to choose, at specified election dates, to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Unrealized gains and losses shall be reported on items for which the fair value option has been elected in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. We do not expect the adoption of SFAS No. 159 to have a material impact on our consolidated financial position, results of operations or cash flows.

In September 2006, the FASB issued SFAS No. 157, which defines fair value, establishes guidelines for measuring fair value and expands disclosures regarding fair value measurements. SFAS No. 157 does not require any new fair value measurements but rather eliminates inconsistencies in guidance found in various prior accounting pronouncements. On February 12, 2008, the FASB issued FASB Staff Position (FSP) 157-b which delays the effective date of FAS 157 for one year, for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). FAS 157 and FSP 157-b are effective for financial statements issued for fiscal years beginning after November 15, 2007. We do not expect the adoption of SFAS No. 157 to have a material impact on our consolidated financial position, results of operations or cash flows.

Item 7A. *Quantitative and qualitative disclosures about market risk*

Due to the nature of our short-term investments and our lack of material debt, we have concluded that we face no material market risk exposure. Therefore, no quantitative tabular disclosures are required.

Item 8. *Financial statements and supplementary data*

The information required by this Item is set forth in the consolidated financial statements and notes thereto beginning at page F-1 of this report.

Item 9. *Changes in and disagreements with accountants on accounting and financial disclosure*

None.

Item 9A. *Controls and procedures*

Evaluation of disclosure controls and procedures

Disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e) and 15d-15(e)) are designed only to provide reasonable assurance that they will meet their objectives. As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective to provide the reasonable assurance discussed above.

Changes in internal control over financial reporting

No change in our internal control over financial reporting occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Management's report on internal control over financial reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. GAAP. Our internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on the financial statements.

Our management has excluded the Target Companies and eTapestry from its assessment of internal control over financial reporting as of December 31, 2007 because they were acquired by the Company in a purchase business combination during 2007. The Target Companies and eTapestry are wholly-owned subsidiaries whose total assets and total revenues represent \$96.8 million and \$28.3 million respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2007.

Our management conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2007, based on the framework in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2007.

The effectiveness of our internal control over financial reporting as of December 31, 2007 has been audited by our independent registered public accounting firm, as stated in their attestation report, which is included herein.

Item 9B. Other information

None.

PART III

Item 10. *Directors, executive officers and corporate governance*

Incorporated by reference to Blackbaud's Proxy Statement for the 2008 Annual Meeting of Stockholders to be held on June 18, 2008, except for the identification of executive officers of the Registrant which is set forth in Part I of this report.

Item 11. *Executive compensation*

Incorporated by reference to Blackbaud's Proxy Statement for the 2008 Annual Meeting of Stockholders to be held on June 18, 2008.

Item 12. *Security ownership of certain beneficial owners and management and related stockholder matters*

Incorporated by reference to Blackbaud's Proxy Statement for the 2008 Annual Meeting of Stockholders to be held on June 18, 2008.

Item 13. *Certain relationships, related transactions and director independence*

Incorporated by reference to Blackbaud's Proxy Statement for the 2008 Annual Meeting of Stockholders to be held on June 18, 2008.

Item 14. *Principal accountant fees and services*

Incorporated by reference to Blackbaud's Proxy Statement for the 2008 Annual Meeting of Stockholders to be held on June 18, 2008.

PART IV

Item 15 Exhibits and financial statement schedules

(a) Financial statements

The following statements are filed as part of this report:

| | <u>Page</u> |
|---|-------------|
| Report of independent registered public accounting firm | F-2 |
| Consolidated balance sheets as of December 31, 2007 and 2006 | F-3 |
| Consolidated statements of operations for the years ended December 31, 2007, 2006 and 2005 | F-4 |
| Consolidated statements of cash flows for the years ended December 31, 2007, 2006 and 2005 | F-5 |
| Consolidated statements of stockholders' equity and comprehensive income for the years ended December 31, 2007, 2006 and 2005 | F-6 |
| Notes to consolidated financial statements | F-7 |

Schedules not listed above have been omitted because the information required to be set forth therein is not applicable or is shown in the financial statements thereto.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Blackbaud, Inc.:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, of cash flows and of stockholders' equity and comprehensive income present fairly, in all material respects, the financial position of Blackbaud, Inc. and its subsidiaries at December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 1 to the consolidated financial statements, the Company changed the manner in which it accounts for stock-based compensation in 2006 and the manner in which it accounts for uncertain tax positions in 2007.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As described in Management's Report on Internal Control over Financial Reporting, management has excluded the Target Software, Inc. and Target Analysis Group, Inc. (the Target Companies) and eTapestry.com, Inc. (eTapestry) from its assessment of internal control over financial reporting as of December 31, 2007 because they were acquired by the Company in purchase business combinations during 2007. We have also excluded the Target Companies and eTapestry from our audit of internal control over financial reporting. The Target Companies and eTapestry are wholly-owned subsidiaries whose total assets and total revenues represent \$96.8 million and \$28.3 million, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2007.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and significant accounting policies

Blackbaud, Inc. (the “Company”) is the leading global provider of software and related services designed specifically for nonprofit organizations and provides products and services that enable nonprofit organizations to increase donations, reduce fundraising costs, improve communications with constituents, manage their finances and optimize internal operations. As of the end of 2007, the Company had approximately 19,000 active customers distributed across multiple verticals within the nonprofit market including religion, education, foundations, health and human services, arts and cultural, public and societal benefits, environment and animal welfare and international foreign affairs.

Basis of presentation

The consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”).

Basis of consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting periods. Areas of the financial statements where estimates may have the most significant effect include revenue recognition, the allowance for sales returns and doubtful accounts, valuation of long-lived and intangible assets and goodwill, stock-based compensation and provision for income taxes and valuation of deferred tax assets. Changes in the facts or circumstances underlying these estimates could result in material changes and actual results could differ from these estimates.

Reclassifications

Certain amounts in the 2006 statement of cash flows have been reclassified to conform to the 2007 presentation. Under the current presentation, the excess tax benefit on the exercise of stock options is shown as adjustment to reconcile net income to net cash provided by operating activities whereas it was included in the change in accrued expenses and other current liabilities in 2006. Additionally, under the current presentation, stock-based compensation expense in the statements of operations is allocated to individual components of operating expenses whereas it was shown as a single component of operating expenses in 2005. Furthermore, the presentation of segment information was modified in 2006. See Note 14 of the consolidated financial statements, for more information regarding reclassifications in the segment information.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Revenue recognition

The Company's revenue is generated primarily by selling perpetual licenses or charging for the use of its software products and providing support, training, consulting, technical and other professional services for those products. The Company makes available certain of its software products for use in hosted application arrangements without licensing perpetual rights to the software ("hosted applications"). Additionally, the Company provides hosting services to customers who have purchased perpetual rights to certain of its software products ("hosting services"). The Company recognizes revenue in accordance with:

- The American Institute of Certified Public Accountants Statements of Position ("SOP") 97-2, "Software Revenue Recognition," as modified by SOPs 98-4 and 98-9, as well as Technical Practice Aids issued from time to time by the American Institute of Certified Public Accountants,
- The SEC Staff Accounting Bulletin ("SAB") No. 104, "Revenue Recognition in Financial Statements,"
- The Emerging Issues Task Force ("EITF") Issue No. 00-03, "Application of AICPA Statement of Position 97-2 to Arrangements that Include the Right to Use Software Stored on Another Entity's Hardware,"
- The EITF Issue No. 00-21, "Revenue Arrangements with Multiple Deliverables," and
- The SOP 81-1, "Accounting for Performance of Construction-Type and Certain Production-Type Contracts."

The Company recognizes revenue from the sale of perpetual software license rights when persuasive evidence of an arrangement exists, the product has been delivered, title and risk of loss have transferred to the customers, the fee is fixed or determinable and collection of the resulting receivable is probable. The Company deems acceptance of an agreement to be evidence of an arrangement. Delivery occurs when the product is shipped or transmitted. The Company's typical license agreement does not include customer acceptance provisions; if acceptance provisions are provided, delivery is deemed to occur upon acceptance. The Company considers the fee to be fixed or determinable unless the fee is subject to refund or adjustment or is not payable within the Company's standard payment terms. The Company considers payment terms greater than 90 days to be beyond its customary payment terms. The Company deems collection probable if the Company expects that the customer will be able to pay amounts under the arrangement as they become due. If the Company determines that collection is not probable, the Company postpones recognition of the revenue until cash collection. The Company sells software licenses with maintenance and, often times, professional services. The Company allocates revenue to delivered components, normally the license component of the arrangement, using the residual value method based on objective evidence of the fair value of the undelivered elements, which is specific to the Company. Fair value for the maintenance services associated with the Company's software licenses is based upon renewal rates stated in the Company's agreements, which vary according to the level of the maintenance program. Fair value of professional services and other products and services is based on sales of these products and services to other customers when sold on a stand-alone basis.

The Company's consulting, installation and implementation services are generally billed based on hourly rates plus reimbursable travel-related expenses. For small service engagements, less than approximately \$10,000, the Company frequently contracts for and bills based on a fixed fee plus reimbursable travel-related expenses. The Company recognizes this revenue upon completion of the work performed. When the Company's services include software customization, these services are provided to support customer requests for assistance in creating special reports and other minor enhancements that will assist with efforts to improve operational efficiency and/or to support business process improvements. These services are not essential to the functionality of the Company's software and rarely exceed three months in duration. The Company recognizes revenue as

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

these services are performed. When the Company enters into larger fixed price contracts, the Company recognizes revenue on a percent-complete basis.

The Company recognizes analytic services revenue from donor prospect research engagements, the sale of lists of potential donors, benchmarking studies and data modeling service engagements upon delivery.

The Company sells training at a fixed rate for each specific class, at a per attendee price, or at a packaged price for several attendees, and revenue is recognized only upon the customer attending and completing training. Additionally, the Company sells a fixed-rate program, which permits customers to attend unlimited training over a specified contract period, typically one year, subject to certain restrictions, and revenue is recognized ratably over this contract period.

The Company recognizes revenue from maintenance services ratably over the contract term, which is principally one year. Maintenance revenue also includes the right to unspecified product upgrades on an if-and-when available basis. Certain support services are sold in prepaid units of time and recognized as revenue upon their usage.

Subscription revenue includes revenue associated with hosted applications, hosting services, data enrichment services, data management services and online training programs. Subscription-based revenue and any related set-up fees are recognized ratably over the service period of the contract.

To the extent that the Company's customers are billed and/or pay for the above described services in advance of delivery, the amounts are recorded in deferred revenue.

Sales taxes

Sales taxes and other taxes collected from customers and remitted to governmental authorities are presented on a net basis and, as such, are excluded from revenues.

Cash and cash equivalents

The Company considers all highly liquid investments purchased with a maturity of three months or less to be cash equivalents.

Restricted cash

Restricted cash represents contingent consideration held in an interest bearing account related to the acquisition of Campagne Associates, Ltd. on January 20, 2006. The restriction lapsed in 2007 upon the payment of the contingent consideration. See Note 9 of these consolidated financial statements for more information.

Property and equipment

Property and equipment are recorded at cost and depreciated over their estimated useful lives using the straight-line method. Property and equipment subject to capital leases are depreciated over the lesser of the term of the lease or the estimated useful life of the asset. Upon retirement or sale, the cost of assets disposed of and the related accumulated depreciation are removed from the accounts and any resulting gain or loss is credited or charged to income. Repair and maintenance costs are expensed as incurred. Construction-in-progress represents purchases of computer software and hardware associated with new internal system implementation projects,

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

which had not been placed in service at the respective balance sheet dates. These assets are transferred to the applicable property category on the date they are placed in service. There was no capitalized interest applicable to construction-in-process for the years ended December 31, 2007 and 2006.

Computer software costs represent software purchased from external sources for use in the Company's internal operations. These amounts have been accounted for in accordance with SOP 98-1, "Accounting for the Cost of Computer Software Developed or Obtained for Internal Use."

Goodwill and intangible assets

The Company accounts for indefinite-lived intangible assets in accordance with the Financial Accounting Standards Board's ("FASB") Statement of Financial Accounting Standards ("SFAS") No. 142, "Goodwill and Other Intangible Assets." Under SFAS No. 142, indefinite-lived intangible assets are not amortized, but are reviewed annually for impairment or more frequently if impairment indicators arise. No impairment of goodwill resulted in 2007, 2006 and 2005.

Other intangible assets with finite lives continue to be amortized on a straight-line basis over their estimated useful lives in accordance with the adoption of SFAS No. 142.

| | Amortization period (in years) |
|------------------------|--------------------------------------|
| Customer relationships | 10-15 |
| Tradename | 3-7 |
| Software | 3-10 |
| Database | 8 |
| Non-compete agreements | 5 |

Fair value of financial instruments

The fair value of a financial instrument is the amount at which the instrument could be exchanged between willing parties other than in a forced sale or liquidation. The financial instruments of the Company consist primarily of cash and cash equivalents, accounts receivable and accounts payable at December 31, 2007 and 2006. The Company believes that the carrying amounts of these financial instruments approximate their fair values at December 31, 2007 and 2006, due to the immediate or short-term maturity of these financial instruments.

Deferred financing costs

Deferred financing fees included in other assets represent the direct costs of entering into the Company's revolving credit facility in July 2007. These costs are amortized as interest expense using the effective interest method. The deferred financing fees are being amortized over the term of the credit facility.

Stock-based compensation

Stock-based compensation is accounted for in accordance with the provisions of FASB's SFAS No. 123 (revised 2004), "Share-Based Payment" ("SFAS No. 123(R)"). Under the fair value recognition provisions of this

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

statement, stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the requisite service period, which is the vesting period. The provisions of SFAS No. 123(R) apply to grants made after the adoption date, awards modified, repurchased or cancelled after the adoption date and existing grants which were partially unvested at that date. Compensation expense for grants outstanding on the date of adoption is recognized over the remaining service period using the grant date fair values and amortization methods determined previously for the SFAS No. 123, “Accounting for Stock-Based Compensation,” pro forma disclosures.

Under SFAS No. 123(R), costs for stock options continue to be recognized using the accelerated method. Costs for restricted stock and stock appreciation rights are recognized on a straight-line basis.

The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of Statement 123 to options granted under the Company’s stock option plans in periods presented that do not include the recognition of the fair value of stock based awards. For purposes of this pro forma disclosure, the value of the options is estimated using a Black-Scholes option-pricing formula and amortized to expense over the options’ vesting periods on a straight-line basis.

| (in thousands, except per share amounts) | Year ended December 31, 2005 |
|--|------------------------------------|
| Net income, as reported | \$33,087 |
| Total stock-based compensation expense (benefit), net of related tax effects included in the determination of net income as reported | (330) |
| Total stock-based compensation expense, net of related tax effects that should have been included in the determination of net income if the fair value method had been applied to all awards | (2,205) |
| Pro forma net income | \$30,552 |
| Earnings per share: | |
| Basic, as reported | \$ 0.78 |
| Basic, pro forma | \$ 0.72 |
| Diluted, as reported | \$ 0.72 |
| Diluted, pro forma | \$ 0.67 |

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Stock-based compensation expense is allocated to expense categories on the statements of operations. The following table summarizes stock-based compensation expense for the year ended December 31, 2007, 2006 and 2005.

| (in thousands) | Years ended December 31, | | |
|--------------------------------------|--------------------------|---------|--------|
| | 2007 | 2006 | 2005 |
| Included in cost of revenue: | | | |
| Cost of services | \$ 627 | \$ 531 | \$ 269 |
| Cost of maintenance | 234 | 117 | 33 |
| Cost of subscriptions | 274 | 19 | — |
| Total included in cost of revenue | 1,135 | 667 | 302 |
| Included in operating expenses: | | | |
| Sales and marketing | 831 | 813 | 217 |
| Research and development | 1,219 | 746 | 139 |
| General and administrative | 3,749 | 5,174 | (343) |
| Total included in operating expenses | 5,799 | 6,733 | 13 |
| Total | \$6,934 | \$7,400 | \$ 315 |

Amortization expense

Amortization expense related to intangible assets acquired in business combinations is allocated to cost of revenue on the statements of operations based on the revenue stream to which the asset contributes. The following table summarizes amortization expense for the year ended December 31, 2007, 2006 and 2005.

| (in thousands) | Years ended December 31, | | |
|-----------------------------------|--------------------------|-------|-------|
| | 2007 | 2006 | 2005 |
| Included in cost of revenue: | | | |
| Cost of license fees | \$ 153 | \$— | \$— |
| Cost of services | 1,178 | — | — |
| Cost of maintenance | 406 | — | — |
| Cost of subscriptions | 1,112 | — | — |

| Total included in cost of revenue | 2,945 | — | — |
| Included in operating expenses | 491 | 699 | 18 |
| Total | \$3,436 | \$699 | \$ 18 |

Income taxes

Prior to October 13, 1999, the Company was organized as an S corporation under the Internal Revenue Code and, therefore, was not subject to federal income taxes. The Company historically made distributions to its stockholders to cover the stockholders' anticipated tax liability. In connection with its 1999 recapitalization, the Company converted its U.S. taxable status from an S corporation to a C corporation and, accordingly, since October 14, 1999 has been subject to federal and state income taxes. Upon this conversion and as a result of the recapitalization, the Company recorded a one-time benefit of \$107,000,000 to establish a deferred tax asset. This amount was recorded as a direct increase to equity in the statements of stockholders' equity. The Company has

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

not recorded a valuation allowance against this item in its deferred tax asset as of December 31, 2007 or 2006, as the Company believes it is more likely than not that it will be able to utilize this benefit, which is dependent upon the Company's ability to generate future taxable income.

The Company adopted FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109, Accounting for Income Taxes," ("FIN 48") on January 1, 2007. Under FIN 48 the tax benefit from an uncertain tax position must be recognized only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate resolution. Penalties and interest accrued related to unrecognized tax benefits are recognized in the provision for income taxes. The disclosure requirements and cumulative effect of adoption of FIN 48 are presented in Note 10.

Significant judgment is required in determining the provision for income taxes. The Company records its tax provision at the anticipated tax rates based on estimates of annual pretax income. To the extent that the final results differ from these estimated amounts that were initially recorded, such differences will impact the income tax provision in the period in which such determination is made and could have an impact on the deferred tax asset. The Company's deferred tax assets and liabilities are recorded at an amount based upon a U.S. federal income tax rate of 35.0% and appropriate statutory rates of various foreign, state and local jurisdictions in which the Company operates. If the Company's tax rates change, the deferred tax assets and liabilities may be adjusted to an amount reflecting those income tax rates. If such change is determined to be appropriate, it will affect the provision for income taxes during the period that the determination is made.

In 2007 and 2006, the valuation allowance on the deferred tax assets was increased by \$749,000 and \$124,000, respectively, for state credits that are expected to expire unused.

In 2005, the Company recognized an income tax benefit of \$3,219,000 related to changes in state income tax credits. The Company's deferred tax asset at December 31, 2004 included state income tax credits, net of federal taxes at 34.8%, of approximately \$3,964,000 that expire between 2009 and 2019. The Company established a full valuation allowance against these credits when the asset was recorded because, based on information available at that time, it was not deemed probable that these credits would be realized. During 2005, as a result of profitable results in 2004 and 2003, expectations of future profitability and utilization of all related state net operating losses, the Company released \$2,282,000 of the valuation allowance related to these state income tax credits which resulted in a credit to its income tax expense for 2005. Additionally, certain other state tax credits whose use was previously restricted to reducing state franchise taxes became available to offset state income tax as a result of a clarification in enacted tax law during 2005. Accordingly, a deferred tax asset was established during 2005 of \$2,213,000, net of federal taxes at 34.8%, related to the associated future reduction of state income taxes. In connection with the establishment of this additional deferred tax asset, a valuation allowance was established for \$1,346,000 of the \$2,213,000 representing the portion of the credits not deemed more likely than not to be utilized. Accordingly, these additional state tax credits resulted in a net credit of \$867,000 to the income tax expense for 2005. The Company will continue to evaluate the realizability of the remaining state tax credits and any further adjustment to the valuation allowance will be made in the period the Company determines it is more likely than not any of the remaining credits will be utilized.

Foreign currency

The Company's financial statements are translated into U.S. dollars in accordance with SFAS No. 52, "Foreign Currency Translation." For all operations outside the United States, net assets are translated at the

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

current rates of exchange. Income and expense items are translated at the average exchange rate for the year and balance sheet accounts are translated at the period ending rate. The resulting translation adjustments are recorded in accumulated other comprehensive income net of tax.

Gains and losses resulting from foreign currency transactions denominated in currency other than the functional currency are recorded at the approximate rate of exchange at the transaction date. For the years ended December 31, 2007, 2006 and 2005, the Company recorded net foreign currency losses of \$503,000, \$214,000 and net foreign currency gains of less than \$1,000, respectively, as included in other (expense) income, net.

Research and development

Research and development costs are expensed as incurred. They include salaries and related human resource costs, third-party contractor expenses, software development tools, an allocation of facilities and depreciation expenses and other expenses in developing new products and upgrading and enhancing existing products.

Software development costs

Software development costs have been accounted for in accordance with SFAS No. 86, "Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed." Under the standard, capitalization of software development costs begins upon the establishment of technological feasibility, subject to net realizable value considerations. To date, the period between achieving technological feasibility and the general availability of such software has substantially coincided; therefore, software development costs qualifying for capitalization have been immaterial. Accordingly, the Company has not capitalized any software development costs and has charged all such costs to product development expense.

Sales returns and allowance for doubtful accounts

The Company provides customers a 30-day right of return and maintains a reserve for returns which is estimated based on several factors including historical experience and existing economic conditions. Provisions for sales returns are charged against the related revenue items.

In addition, the Company records an allowance for doubtful accounts that reflects estimates of probable credit losses. This assessment is based on several factors including aging of customer accounts, known customer specific risks, historical experience and existing economic conditions. Accounts are charged against the allowance after all means of collection are exhausted and recovery is considered remote. Provisions for doubtful accounts are recorded in general and administrative expense.

Below is a summary of the changes in the Company's allowance for doubtful accounts.

| Years ended December 31, (in thousands) | Balance at beginning of year | Acquired through business combinations | Provision/ adjustment | Write-off | Balance at end of year |
|--|------------------------------------|---|--------------------------|-----------|------------------------------|
| 2007 | \$335 | \$ 57 | \$ (14) | \$ (70) | \$308 |
| 2006 | 342 | — | 130 | (137) | 335 |
| 2005 | 511 | — | 219 | (388) | 342 |

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Below is a summary of the changes in the Company's allowance for sales returns.

| Years ended December 31, (in thousands) | Balance at beginning of year | Acquired through business combinations | Provision/ adjustment | Write-off | Balance at end of year |
|--|------------------------------------|---|--------------------------|-----------|------------------------------|
| 2007 | \$933 | \$ 95 | \$2,056 | \$(1,457) | \$1,627 |
| 2006 | 758 | — | 1,584 | (1,409) | 933 |
| 2005 | 909 | — | 603 | (754) | 758 |

Sales commissions

Prior to July 1, 2004, and resuming on October 1, 2006, the Company pays sales commissions at the time contracts with customers are signed or shortly thereafter depending on the size and duration of the sales contract. To the extent that these commissions relate to revenue not yet recognized, these amounts are recorded as deferred sales commission costs. Subsequently, the commissions are recognized as expense as the revenue is recognized.

During the period July 1, 2004 to September 30, 2006, the Company paid commissions as the associated revenue was recognized and, accordingly, no deferred sales commission was recorded.

Below is a summary of the changes in the Company's deferred sales commission costs included in prepaid expenses and other current assets.

| Years ended December 31, (in thousands) | Balance at beginning of year | Additions | Expense | Balance at end of year |
|--|------------------------------------|-----------|-----------|------------------------------|
| 2007 | \$588 | \$5,335 | \$(4,020) | \$1,903 |
| 2006 | — | 750 | (162) | 588 |
| 2005 | 344 | — | (344) | — |

Advertising costs

Advertising costs are expensed as incurred and were \$717,000, \$346,000 and \$212,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

Impairment of long-lived assets

The Company evaluates the recoverability of its property and equipment and other long-lived assets in accordance with SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS No. 144 requires that one accounting model be used for long-lived assets to be disposed of by sale, whether previously held and used or newly acquired. The Company reviews long-lived assets for impairment when events change or circumstances indicate the carrying amount may not be recoverable. If such events or changes in circumstances are present, the undiscounted cash flow method is used to determine whether the asset is impaired. An impairment loss is recognized when, and to the extent, the net book value of such assets exceeds the estimated future undiscounted cash flows attributable to the assets or the business to which the assets relate. Cash flows would include the estimated terminal value of the asset and exclude any interest charges. The discount rate utilized would be based on the Company's best estimate of the related risks and return at the time the impairment assessment is made.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Shipping and handling

Shipping and handling costs are expensed as incurred and included in cost of license fees. The reimbursement of these costs by the Company's customers is included in license fees.

Earnings per share

The Company computes earnings per common share in accordance with SFAS Statement No. 128, "Earnings per Share" ("SFAS No. 128"). Under the provisions of SFAS No. 128, basic earnings per share is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding. Diluted earnings per share is computed by dividing net income available to common stockholders by the weighted average number of common shares and dilutive potential common shares then outstanding. Diluted earnings per share reflect the assumed conversion of all dilutive securities using the treasury stock method. Potential common shares consist of shares issuable upon the exercise of stock options and shares of non-vested restricted stock and stock appreciation rights.

Diluted earnings per share for the years ended December 31, 2007, 2006 and 2005 includes the effect of 976,325, 1,348,380 and 3,650,757, respectively, potential common shares as they are dilutive. Diluted earnings per share for the year ended December 31, 2005 do not include the effect of 74,521 potential common share equivalents, respectively, as they are anti-dilutive. There were no anti-dilutive common share equivalents for the years ended December 31, 2007 and 2006.

The following table sets forth the computation of basic and diluted earnings per share:

| (in thousands, except share and per share amounts) | Years ended December 31, | | |
|--|--------------------------|------------|------------|
| | 2007 | 2006 | 2005 |
| Numerator: | | | |
| Net income | \$ 31,724 | \$ 30,153 | \$ 33,087 |
| Denominator: | | | |
| Weighted average common shares | 43,619,158 | 43,320,096 | 42,559,342 |
| Add effect of dilutive securities: | | | |
| Employee stock-based compensation | 976,325 | 1,348,380 | 3,650,757 |
| Weighted average common shares assuming dilution | 44,595,483 | 44,668,476 | 46,210,099 |
| Earnings per share: | | | |
| Basic | \$ 0.73 | \$ 0.70 | \$ 0.78 |
| Diluted | \$ 0.71 | \$ 0.68 | \$ 0.72 |

New accounting pronouncements

In December 2007, the FASB issued SFAS No. 141 (revised 2007), "Business Combinations" ("SFAS No. 141R"). SFAS No. 141R establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. SFAS No. 141R also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS No. 141R is effective for financial statements issued for fiscal years beginning after December 15, 2008. The Company is currently evaluating the potential impact of adoption of SFAS No. 141R on its consolidated financial statements.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

In December 2007, the FASB issued SFAS No. 160, “Noncontrolling Interests in Consolidated Financial Statements—an Amendment of ARB No. 51” (“SFAS No. 160”). SFAS No. 160 establishes accounting and reporting standards pertaining to ownership interests in subsidiaries held by parties other than the parent, the amount of net income attributable to the parent and to the noncontrolling interest, changes in a parent’s ownership interest, and the valuation of any retained noncontrolling equity investment when a subsidiary is deconsolidated. This statement also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS No. 160 is effective for fiscal years beginning on or after December 15, 2008. The Company is currently evaluating the potential impact of adoption of SFAS No. 160 on its consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Liabilities, including an amendment of FASB Statement No. 115” (“SFAS No. 159”). SFAS No. 159 permits entities to choose, at specified election dates, to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Unrealized gains and losses shall be reported on items for which the fair value option has been elected in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The Company does not expect the adoption of SFAS No. 159 to have a material impact on its consolidated financial position, results of operations or cash flows.

In September 2006, the FASB issued SFAS No. 157, “Fair Value Measurements,” (“SFAS No. 157”) which defines fair value, establishes guidelines for measuring fair value and expands disclosures regarding fair value measurements. SFAS No. 157 does not require any new fair value measurements but rather eliminates inconsistencies in guidance found in various prior accounting pronouncements. On February 12, 2008, the FASB issued FASB Staff Position (“FSP”) 157-b which delays the effective date of FAS 157 for one year, for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). FAS 157 and FSP 157-b are effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company does not expect the adoption of SFAS No. 157 to have a material impact on its consolidated financial position, results of operations or cash flows.

2. Business combinations

eTapestry

On August 1, 2007, the Company acquired eTapestry.com, Inc. (“eTapestry”), a privately-owned company based near Indianapolis, Indiana. eTapestry is the provider of an on-demand fundraising solution. The Company believes that the acquisition of eTapestry will allow it to address a broader market opportunity by providing an on-demand solution that is suited for smaller organizations interested in a relatively low-cost offering and mid-sized nonprofits interested in a stand-alone fundraising solution deployed in an on-demand model. The Company acquired all of the outstanding capital stock of eTapestry for approximately \$25,429,000 in a cash transaction financed by a combination of cash on hand and borrowings of \$12,500,000 under the Company’s revolving credit facility. An additional amount of up to \$1,500,000 is contingently payable to certain eTapestry employees under a stock-based incentive arrangement based upon performance of the acquired business over the next two years and will be accounted for as expense when incurred. The results of operations of eTapestry are included in the consolidated financial statements of the Company from the date of acquisition.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The allocation of the purchase price is based on a valuation. The following table summarizes the allocation of the purchase price to the estimated fair values of the assets acquired and liabilities assumed in the acquisition of eTapestry:

| <u>(in thousands)</u> | |
|--|----------|
| Cash and cash equivalents | \$ 308 |
| Accounts receivable | 1,095 |
| Other current assets | 21 |
| Property and equipment | 720 |
| Intangible assets | 10,450 |
| Goodwill | 18,428 |
| Trade accounts payable | (137) |
| Accrued expenses and other current liabilities | (304) |
| Deferred revenue, current and noncurrent | (3,087) |
| Other liabilities, noncurrent | (39) |
| Net deferred tax liabilities, noncurrent | (2,026) |
| Total purchase price | \$25,429 |

None of the \$18,428,000 of goodwill arising in the acquisition is deductible for income tax purposes. The goodwill was allocated to the Analytic services and Subscriptions segments. The acquisition resulted in the identification of \$10,450,000 of intangible assets, all of which are subject to amortization. The following table presents the amounts assigned to each intangible asset class:

| | Intangible assets acquired (in thousands) | Weighted average amortization period (in years) |
|---------------------------|--|--|
| Customer relationships | \$ 6,100 | 10.0 |
| Software | 2,790 | 7.0 |
| Tradename | 560 | 7.0 |
| Noncompetition agreements | 1,000 | 5.0 |
| Total | \$10,450 | 8.6 |

Target Companies

On January 16, 2007, the Company acquired Target Software, Inc. and Target Analysis Group, Inc., or the Target Companies, privately-owned affiliated companies based in Cambridge, Massachusetts. The two acquired companies provide solutions that help organizations analyze, plan, forecast, execute, and manage high-volume fundraising campaigns while simultaneously helping them maintain long-term constituent relationships. The acquisition of the Target Companies is expected to significantly advance the Company's strategic goal of providing a complete solution for meeting the fundraising and direct marketing needs of the nonprofit sector. The Company acquired all of the outstanding capital stock of the Target Companies for approximately \$58,733,000, including direct acquisition-related costs, in an all cash transaction that was financed by a combination of cash on hand and borrowings under the Company's revolving credit facility. An additional amount of up to \$2,400,000 is contingently payable to the sellers under an earn-out arrangement based upon performance of the acquired businesses over the next year. Amounts paid, if any, will be accounted for as additional cost of the acquired entities. The results of operations of the Target Companies are included in the consolidated financial statements of the Company from the date of acquisition.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The allocation of the purchase price is based on a valuation. The following table summarizes the allocation of the purchase price to the estimated fair values of the assets acquired and liabilities assumed in the acquisition of the Target Companies:

| <u>(in thousands)</u> | |
|---|----------|
| Cash and cash equivalents | \$ 507 |
| Accounts receivable | 5,067 |
| Other current assets | 278 |
| Property and equipment | 2,291 |
| Deferred tax assets | 738 |
| Intangible assets | 22,323 |
| Goodwill | 36,453 |
| Trade accounts payable | (445) |
| Accrued expenses and other current liabilities | (3,243) |
| Deferred revenue, current and noncurrent | (1,807) |
| Loans from shareholders, current | (1,919) |
| Capital lease obligations, current and noncurrent | (1,510) |
| Total purchase price | \$58,733 |

Of the total amount of goodwill arising in the acquisition, \$35,789,000 is expected to be deductible for income tax purposes. All segments were allocated a portion of the goodwill.

The acquisition resulted in the identification of \$22,323,000 of intangible assets, all of which are subject to amortization. The following table presents the amounts assigned to each intangible asset class:

| | Intangible assets acquired (in thousands) | Weighted average amortization period (in years) |
|---------------------------|--|--|
| Customer relationships | \$13,627 | 12.7 |
| Software | 3,655 | 10.0 |
| Database | 3,441 | 8.0 |
| Tradename | 800 | 5.0 |
| Noncompetition agreements | 800 | 5.0 |
| Total | \$22,323 | 11.0 |

The following unaudited pro forma information presents the consolidated results of operations of the Company as if the acquisition of the Target Companies and eTapestry had taken place at the beginning of 2007 and 2006. The pro forma information includes the business combination effect of the amortization charges from acquired intangible assets, adjustments to interest income and related tax effects. The pro forma information does not necessarily reflect the actual results that would have occurred nor is it necessarily indicative of future results of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Campagne

On January 20, 2006, the Company acquired Campagne Associates, Ltd. (“Campagne”), the New Hampshire-based provider of *GiftMaker Pro* fundraising software, for approximately \$6,100,000. This acquisition will allow the Company to offer its products to a larger customer base and use the combined experience of the two companies to deliver software solutions to meet customer’s needs. The results of Campagne’s operations have been included in the consolidated financial statements since that date. Included in this amount is \$500,000 of purchase price that is contingent upon the seller satisfying certain conditions set forth in the purchase agreement, which has been classified in the consolidated balance sheets as restricted cash. The Company also agreed to pay additional contingent consideration of up to \$2,000,000 based upon performance of the acquired business over the next two years. The transaction was accounted for in accordance with SFAS No. 141, “Business Combinations” (“SFAS No. 141”), which requires that all acquisitions be accounted for under the purchase method. The purchase price has been allocated to the assets acquired and the liabilities assumed based upon their estimated fair values at the date of the acquisition. The net fair values of the identified assets acquired and liabilities assumed exceeded the amount of the cash purchase price by \$1,260,000 which, in accordance with SFAS No. 141, was recorded as a deferred acquisition cost. Simultaneously, the Company recognized a deferred tax liability on the acquisition in connection with the difference between depreciable book value and depreciable tax basis, for \$489,000, which reduced the deferred acquisition costs by that amount. Of the remaining \$771,000 deferred acquisition costs, approximately \$500,000 was classified as a current liability. During the year ended December 31, 2007, contingent consideration of \$993,000 was paid, which reduced restricted cash.

Identifiable intangible assets with an aggregate value of \$8,182,000 were recorded as part of the purchase price allocation. The following table presents the amounts assigned to each intangible asset class:

| | Intangible assets acquired (in thousands) | Weighted average amortization period (in years) |
|------------------------|--|---|
| Customer relationships | \$7,368 | 15.0 |
| Tradename | 24 | 3.0 |
| Software | 490 | 3.0 |
| Non-compete agreement | 300 | 5.0 |
| Total | \$8,182 | 13.9 |

3. Property and equipment

Property and equipment as of December 31, 2007 and 2006 consisted of the following:

| (in thousands) | Estimated useful life (years) | December 31, | |
|---|-------------------------------------|--------------|-----------|
| | | 2007 | 2006 |
| Equipment | 3 - 5 | \$ 5,858 | \$ 5,424 |
| Computer hardware | 3 - 5 | 21,570 | 16,714 |
| Computer software | 3 - 5 | 8,005 | 7,717 |
| Construction in progress | — | 2,642 | 101 |
| Furniture and fixtures | 7 | 4,695 | 3,850 |
| Leasehold improvements | term of lease | 1,310 | 358 |
| Total property and equipment | | 44,080 | 34,164 |
| Less: accumulated depreciation | | (27,118) | (23,640) |
| Property and equipment, net of depreciation | | \$ 16,962 | \$ 10,524 |

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Depreciation expense was \$4,713,000, \$3,010,000 and \$2,652,000 for December 31, 2007, 2006 and 2005, respectively.

Property and equipment at December 31, 2007 and 2006, includes the following amounts for assets under capital leases:

| (in thousands) | December 31, | |
|--|--------------|------|
| | 2007 | 2006 |
| Computer hardware | \$1,166 | \$ — |
| Computer software | 255 | — |
| Total property and equipment under capital leases | 1,421 | — |
| Less: accumulated depreciation | (478) | — |
| Property and equipment under capital leases, net of depreciation | \$ 943 | \$— |

4. Goodwill and other intangible assets

The change in goodwill during the years ended December 31, 2007 and 2006 consisted of the following:

| (in thousands) | |
|--|-----------------|
| Balance at December 31, 2005 | \$ 2,208 |
| Payment of contingent consideration | 12 |
| Effect of foreign currency translation | 298 |
| Balance at December 31, 2006 | 2,518 |
| Additions related to business combinations | 54,881 |
| Payment of contingent consideration | 844 |
| Effect of foreign currency translation | 32 |
| Balance at December 31, 2007 | \$58,275 |

Additions to goodwill during the year ended December 31, 2007 related to the acquisitions of the Target Companies and eTapestry are described in Note 2 of these consolidated financial statements. Goodwill also increased during the year ended December 31, 2007 due to the payment of contingent consideration related to the acquisition of Campagne on January 20, 2006.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The Company has recorded intangible assets acquired in various business combinations based on their fair values at the date of acquisition. The table below sets forth the balances of each class of intangible asset, all of which are subject to amortization, as of December 31, 2007 and 2006.

| (in thousands) | December 31, | |
|---------------------------------------|--------------|---------|
| | 2007 | 2006 |
| Gross carrying amount | | |
| Customer relationships | \$27,571 | \$7,894 |
| Tradename | 1,384 | 24 |
| Acquired software | 6,935 | 490 |
| Non-compete agreements | 2,100 | 300 |
| Database | 3,441 | — |
| Total gross carrying amount | 41,431 | 8,708 |
| Accumulated amortization | | |
| Customer relationships | (2,363) | (510) |
| Tradename | (203) | (7) |
| Acquired software | (829) | (150) |
| Non-compete agreements | (352) | (55) |
| Database | (412) | — |
| Total accumulated amortization | (4,159) | (722) |
| Total intangible assets, net | \$37,272 | \$7,986 |

Additions to intangible assets subject to amortization during 2007 are related to the acquisitions of the Target Companies and eTapestry described in Note 2 of these consolidated financial statements.

The amortization expense for intangible assets for the years ended December 31, 2007, 2006 and 2005 was \$3,436,000, \$699,000 and \$18,000, respectively. Amortization expense for acquisition-related intangible assets as of December 31, 2007 consolidated balance sheet for each of the next five years is as follows:

| Years ended December 31, | Amortization expense (in thousands) |
|--------------------------|---|
| 2008 | \$ 4,281 |
| 2009 | 4,123 |
| 2010 | 4,109 |
| 2011 | 4,054 |
| 2012 | 3,659 |
| Total | \$20,226 |

5. Prepaid expenses and other current assets

Prepaid expenses and other current assets consisted of the following as of December 31, 2007 and 2006:

| (in thousands) | December 31, | |
|--|--------------|---------|
| | 2007 | 2006 |
| Taxes, prepaid and receivable | \$ 5,547 | \$4,986 |
| Prepaid software maintenance and royalties | 2,131 | 1,633 |
| Deferred sales commissions | 1,903 | 588 |
| Other | 1,698 | 1,300 |
| Total prepaid expenses and other current assets | \$11,279 | \$8,507 |

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

6. Accrued expenses and other current liabilities

Accrued expenses and other current liabilities consisted of the following as of December 31, 2007 and 2006:

| (in thousands) | December 31, | |
|--|--------------|----------|
| | 2007 | 2006 |
| Accrued bonuses | \$ 6,566 | \$ 4,599 |
| Accrued commissions and salaries | 2,967 | 1,954 |
| Taxes payable | 3,306 | 4,703 |
| Accrued accounting and legal fees | 1,766 | 1,278 |
| Accrued health care costs | 1,094 | 489 |
| Customer credit balances | 1,588 | 1,060 |
| Other | 3,288 | 1,964 |
| Total accrued expenses and other current liabilities | \$20,575 | \$16,047 |

7. Deferred revenue

Deferred revenue consisted of the following as of December 31, 2007 and 2006:

| (in thousands) | December 31, | |
|---|--------------|----------|
| | 2007 | 2006 |
| Maintenance | \$62,208 | \$53,882 |
| Subscriptions | 11,957 | 5,461 |
| Services | 21,661 | 17,504 |
| License fees and other | 274 | 105 |
| Total deferred revenue | 96,100 | 76,952 |
| Less: Long-term portion of deferred revenue | (2,994) | (1,874) |
| Current portion of deferred revenue | \$93,106 | \$75,078 |

8. Long-term debt

Revolving credit facility

On July 25, 2007, the Company entered into a \$75,000,000 revolving credit facility, with an optional incremental increase of up to \$50,000,000. The new revolving credit facility has a term of five years, is guaranteed by the material domestic subsidiaries and is collateralized with the stock of all of the Company's subsidiaries. Amounts borrowed under the revolving credit facility bear interest, at the Company's option, at a variable rate based (a) on the higher of the prime rate plus a margin of up to 0.5% or federal funds rate plus a margin of 0.5% to 1.0% or (b) LIBOR plus a margin of 1.0% to 1.5% depending on the nature of the loan and the debt ratio at the time of the borrowing. A commitment fee will be charged ranging from 0.20% to 0.30% per annum on the unused portion of the revolving credit facility, depending the leverage ratio of the Company. The outstanding balance of the previous credit facility on July 25, 2007 of \$10,000,000 was transferred upon its termination on that date to the new credit facility.

During the year ended December 31, 2007, the Company has borrowed \$48,000,000 under its current and previous credit agreements for business acquisition purposes and to meet operating needs and has repaid these borrowings. There were no principle or interest amounts outstanding under the credit facility as of December 31, 2007.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Deferred financing costs

Amortization expense for deferred financing costs was \$69,000, \$48,000 and \$48,000 for the years ended December 31, 2007, 2006 and 2005, respectively. Deferred financing costs amortized in 2005, 2006 and part of 2007 were associated with the credit facility signed in September 2004. The amortization of deferred financing cost recognized in 2007 include the amortization of cost related to the revolving credit facility entered into in July 2007.

As of December 31, 2007 and 2006, deferred financing costs totaling \$386,000 and \$36,000, respectively, are included in other assets on the consolidated balance sheet.

9. Commitments and contingencies

The Company currently leases office space and various office equipment under operating and capital leases. Total rental expense was \$4,405,000, \$2,586,000 and \$2,841,000 for the years ended December 31, 2007, 2006 and 2005, respectively. The future minimum lease commitments related to these agreements, as well as the lease agreements discussed below, net of related sublease commitments, are as follows:

| <u>Years ending December 31, (in thousands)</u> | <u>Operating leases</u> | <u>Capital leases</u> |
|---|-----------------------------|---------------------------|
| 2008 | \$ 6,835 | \$ 629 |
| 2009 | 6,984 | 403 |
| 2010 | 4,182 | 164 |
| 2011 | 640 | 40 |
| 2012 and thereafter | 376 | 2 |
| Total minimum lease payments | \$19,017 | 1,238 |
| Less: portion representing interest | | 139 |
| Present value of net minimum lease payments | | 1,099 |
| Less: current maturities | | 513 |
| Long-term maturities | | \$ 586 |

Lease agreements

On October 13, 1999, the Company entered into a lease agreement for office space with Duck Pond Creek, LLC, which is owned by certain current executive officers of the Company. The term of the lease is for ten years with two five-year renewal options by the Company. The annual base rent of the lease is \$4,854,000 payable in equal monthly installments. The base rate escalates annually at a rate equal to the change in the consumer price index, as defined in the agreement.

The Company has subleased a portion of its headquarters facility under various agreements extending through 2008. Under these agreements, rent expense was reduced by \$381,000, \$484,000 and \$474,000 for the years ended December 31, 2007, 2006 and 2005, respectively. The operating lease commitments will be reduced by minimum aggregate sublease commitments of \$128,000 during 2008. No minimum aggregate sublease commitments exist in 2009 and thereafter. The Company has also received and expects to receive through 2015, quarterly South Carolina state incentive payments as a result of locating its headquarters facility in Berkeley County, South Carolina. These amounts are recorded as a reduction of rent expense and were \$1,949,000, \$2,203,000 and \$1,562,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Additionally, the Company has entered into various leases for office space for its domestic subsidiaries in Cambridge, Massachusetts and near Indianapolis, Indiana and for its foreign operations in the United Kingdom and Australia.

Contingent consideration

In connection with the acquisition of the Target Companies on January 16, 2007, the Company has amounts up to \$2,400,000 contingently payable based on the performance of the acquired businesses over the next year.

In connection with the acquisition of eTapestry on August 1, 2007, the Company has amounts up to \$1,500,000 contingently payable based on the performance of the acquired business over the next two years.

In connection with the acquisition of Campagne on January 20, 2006, the Company has amounts up to \$2,500,000 contingently payable based on the performance of the acquired business in the 2 years following the transaction. Of this amount, \$993,000 has been paid as of December 31, 2007. The remaining contingent consideration, if any, will be payable in 2008.

Other commitments

The Company has a commitment of \$200,000 payable annually through 2009 for certain naming rights on a stadium in Charleston, South Carolina. The Company incurred expense under this agreement of \$200,000 for each of the three years ended December 31, 2007, 2006 and 2005.

The Company utilizes third-party relationships in conjunction with its products. The contractual arrangements vary in length from one to four years. In certain cases, these arrangements require a minimum annual purchase commitment. The aggregate minimum purchase commitment under these arrangements is approximately \$658,000 through 2010. The Company incurred expense under these arrangements of \$808,000, \$727,000 and \$670,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

Legal contingencies

The Company is subject to legal proceedings and claims which have arisen in the ordinary course of business. In accordance with SFAS No. 5, "Accounting for Contingencies," the Company records an accrual for a contingency when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. The Company does not believe the amount of potential liability with respect to these actions will have a material adverse effect upon the Company's financial position, results of operations or cash flows.

Guarantees and indemnification obligations

The Company enters into agreements in the ordinary course of business with, among others, customers, vendors and service providers. Pursuant to certain of these agreements it has agreed to indemnify the other party for certain matters, such as property damage, personal injury, acts or omissions of the Company, or its employees, agents or representatives, or third-party claims alleging that the activities of our contractual partner pursuant to the contract infringe a patent, trademark or copyright of such third party.

The Company assesses the fair value of its liability on the above indemnities to be immaterial based on historical experience and information known at December 31, 2007.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

10. Income taxes

The following summarizes the components of the income tax expense:

| (in thousands) | Years ended December 31, | | |
|--------------------|--------------------------|----------|------------|
| | 2007 | 2006 | 2005 |
| Current provision | \$ 6,490 | \$ 6,422 | \$ (4,196) |
| Deferred provision | 13,339 | 11,853 | 17,407 |
| Total provision | \$19,829 | \$18,275 | \$13,211 |

A reconciliation between the effect of applying the federal statutory rate and the effective income tax rate used to calculate the Company's income tax provision is as follows:

| | Years ended December 31, | | |
|---|--------------------------|-------|-------|
| | 2007 | 2006 | 2005 |
| Statutory federal income tax rate | 35.0% | 34.0% | 34.0% |
| State income taxes, net of federal benefit | 3.9 | 3.1 | 3.6 |
| Effect of change in federal income tax rate | — | 0.9 | 0.8 |
| Effect of change in federal income tax rate applied to deferred tax asset | (0.3) | (0.3) | — |
| Effect of change in state income tax rate applied to deferred tax asset | — | 0.5 | — |
| Effect of disqualifying dispositions of incentive stock options | (0.3) | (0.8) | (1.8) |
| Incremental South Carolina credits, net of federal benefit | (1.4) | (0.1) | (5.5) |
| Change in valuation reserve for state tax credits, net of federal benefit | 1.6 | 0.3 | (2.0) |
| Nondeductible initial public offering costs | — | — | 0.2 |
| Other | — | 0.1 | (0.8) |
| Income tax provision effective rate | 38.5% | 37.7% | 28.5% |

At December 31, 2007, the Company had no net operating loss carryforwards for federal or state income tax.

As of December 31 2007, the Company had a federal foreign tax credit carryover of approximately \$1,004,000, which will expire between 2014 and 2017, and a federal alternative minimum tax credit of approximately \$558,000, which has no expiration date. As of December 31, 2007 the Company had state tax credits of approximately \$10,807,000, \$7,025,000 net of tax, which will expire between 2009 and 2020, if unused. These state tax credits had a valuation reserve of approximately \$5,987,000, \$3,891,000 net of tax, as of December 31, 2007. Income tax benefits of approximately \$4,931,000 and \$6,060,000, which were attributable to employee stock option transactions and restricted stock vesting, were recorded in stockholders' equity in fiscal 2007 and 2006, respectively.

The amount of tax allocated to the translation adjustment recorded in accumulated other comprehensive income was \$61,000 of expense, \$89,000 of benefit and \$168,000 of expense for the years ended December 31, 2007, 2006 and 2005, respectively.

As a result of the eTapestry acquisition, eTapestry underwent a change in ownership within the meaning of Section 382 of the Internal Revenue Code (IRC Sec. 382) on August 1, 2007. In general, IRC Section 382 places annual limitations on the use of certain tax attributes such as net operating losses and tax credit carryovers in existence at the ownership change date. As of December 31, 2007, approximately \$5,309,000 and \$6,860,000 of U.S. federal and state net operating losses, respectively, acquired from eTapestry are generally subject to an annual limitation of approximately \$2,859,000.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The significant components of the Company's deferred tax asset were as follows:

| (in thousands) | December 31, | |
|---|--------------|----------|
| | 2007 | 2006 |
| Deferred tax assets: | | |
| Current | | |
| Research and other tax credits | \$ 1,295 | \$ 2,730 |

| Decreases from prior period positions | (12) |
| Increases from current period positions | 8 |
| Decreases relating to settlements with taxing authorities | (22) |
| Balance at December 31, 2007 | \$629 |

The total amount of unrecognized tax benefit that, if recognized, would affect the effective tax rate was \$409,000 at December 31, 2007. Tax expense for 2007 was increased by \$25,000 for changes in liabilities, penalties and accrued interest related to uncertain tax positions. The total amounts of interest and penalties included in the consolidated balance sheet as of December 31, 2007 was \$386,000.

The Company has taken positions in certain taxing jurisdictions for which it is reasonably possible that the total amounts of unrecognized tax benefits may significantly decrease within the next twelve months. The possible decrease could result from the finalization of state income tax reviews and the expiration of statutes of limitations. These positions relate to state nexus issues. The reasonably possible decrease is \$479,000.

The Company files income tax returns in the U.S. federal and various state jurisdictions and foreign jurisdictions including Canada, United Kingdom and Australia. The Company is subject to U.S. federal income tax examination for calendar tax years 2004 through 2007 and state and foreign income tax examination for various years depending on statutes of limitations of those jurisdictions.

11. Stock-based compensation

Employee stock-based compensation plans

The Company has three outstanding stock-based compensation plans. The Company's Compensation Committee of the Board of Directors administers the plans and the stock-based awards are granted under terms determined by them. The total number of authorized stock-based awards under these plans is 4,660,575. The Company issues common stock from its pool of authorized stock upon exercise of stock options, settlement of stock appreciation rights or upon granting of restricted stock.

The Company issues or has issued three types of awards under these plans: stock options, restricted stock and stock appreciation rights. The following table sets forth the number of awards outstanding for each award type as of December 31, 2007 and 2006.

| Award type | Outstanding at December 31, | |
|---------------------------|--------------------------------|-----------|
| | 2007 | 2006 |
| Stock options | 1,582,645 | 2,364,360 |
| Restricted stock | 899,025 | 597,608 |
| Stock appreciation rights | 710,324 | 207,791 |

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The majority of the stock-based awards granted under these plans have a 10-year contractual term. The option to purchase 800,000 shares of common stock granted on November 28, 2005, to the current Chief Executive Officer (“CEO”), has a 7-year contractual term. Additionally, stock appreciation rights, or SARs, have contractual lives of 5 to 7 years.

The Company recognizes compensation expense associated with options on an accelerated basis consistent with the method of amortization used prior to adoption of SFAS 123(R) over the requisite service period of the individual grantees, which generally equals the vesting period. The Company recognizes compensation expense associated with restricted stock and SARs on a straight-line basis over the requisite service period of the individual grantees, which generally equals the vesting period.

The total amount of compensation cost related to non-vested awards not recognized was \$26,939,000 at December 31, 2007. This amount will be recognized over a weighted average period of 1.75 years.

Stock options

The following table summarizes the options outstanding, vested and unvested under each of the Company’s stock-based compensation plans as of December 31, 2007.

| Plan | Date of adoption | Options outstanding | Options vested | Options unvested | Range of exercise prices |
|------------------------|-------------------------|----------------------------|-----------------------|-------------------------|---------------------------------|
| 1999 Stock Option Plan | October 13, 1999 | 193,735 | 193,735 | — | \$ 4.80 |
| 2001 Stock Option Plan | July 1, 2001 | 560,590 | 548,871 | 11,719 | \$ 4.80-\$9.04 |
| 2004 Stock Plan | March 23, 2004 | 828,320 | 365,287 | 463,033 | \$8.00-\$16.10 |
| Total | | 1,582,645 | 1,107,893 | 474,752 | |

All options granted under the 1999 Stock Option Plan are fully vested.

The options granted under the 2001 Stock Option Plan vest in equal annual installments over four years from the date of grant and are subject to accelerated vesting upon a change in control of the Company as defined in the plan. The option grants under this plan include a provision whereby the Company has the right to call shares exercised under the grants at a discount from fair market value if the employee is terminated for cause, as defined by the plan. This provision expired upon the Company’s initial public offering. The inclusion of this provision required the Company to account for all options issued under this plan after January 18, 2001 as variable awards and record compensation expense for the difference between the exercise price and the fair market value of the stock at each reporting date.

The options granted under the 2004 Stock Plan vest in equal annual installments over four years from the grant date, with the exception of an option to purchase 800,000 shares granted to the CEO which vests 25% on the first anniversary from the date of grant and the remaining 75% in 12 equal quarterly installments and are subject to accelerated vesting upon a change in control of the Company as provided in his employment and stock option agreements.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

A summary of outstanding options as of December 31, 2007, and changes during the year then ended, is as follows:

| Options | Share options | Weighted average exercise price | Weighted average remaining contractual term (in years) | Aggregate intrinsic value (in thousands) |
|--|---------------|---------------------------------|--|--|
| Outstanding at January 1, 2007 | 2,364,360 | \$ 9.11 | | |
| Exercised | (776,125) | 7.02 | | |
| Forfeited | (5,590) | 10.59 | | |
| Outstanding at December 31, 2007 | 1,582,645 | \$10.14 | 4.2 | \$29,065 |
| Vested and expected to vest at December 31, 2007 | 1,577,093 | \$10.12 | 4.2 | \$28,774 |
| Vested and exercisable at December 31, 2007 | 1,107,893 | \$ 8.05 | 3.9 | \$22,662 |

The weighted-average grant-date fair value of options granted during 2005 was \$10.93, the last year stock option awards were granted. The total intrinsic value of options exercised during the years ended December 31, 2007, 2006 and 2005 was \$14,800,000, \$22,000,000 and \$58,351,000, respectively.

All outstanding options granted by the Company had a fair market value assigned at grant date based on the use of the Black-Scholes option pricing model. Significant assumptions used in that model for stock options granted in 2005 are as follows:

| | Year ended December 31, 2005 |
|-------------------------------|------------------------------------|
| Volatility | 80.96% |
| Dividend yield | 1.20% |
| Risk-free interest rate | 4.32% |
| Expected option life in years | 5.54 |

No options were granted during the years ended December 31, 2007 and 2006. Since the Company has been publicly traded for less than the expected life of the stock options, the expected volatility assumption is determined by calculating the volatility for a number of comparable companies and calculating the average expected volatility over the expected life of the option. The dividend yield is based on the adopted dividend policy in effect at the time of grant. The risk-free interest rate is based on United States Treasury rate for a term consistent with the expected life of the awards at the time of grant. The expected life of the option represents the length of time from grant until the option is exercised based on experience.

Restricted stock

The Company has also granted shares of common stock subject to certain restrictions under the 2004 Stock Plan. Restricted stock granted to employees vest in equal annual installments over four years from the grant date. However, restricted stock granted to non-employee directors vests after one year. The fair market value of the stock at the time of the grant is amortized on a straight-line basis to expense over the period of vesting. Recipients of restricted stock have the right to vote such shares and receive dividends. Income tax benefits resulting from the vesting of restricted stock are recognized in the period the restrictions lapse to the extent expense has been recognized. Tax benefits associated with stock-based compensation in excess of the related

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

book expense recorded are credited to additional paid-in capital within stockholders' equity. The Company purchased 54,079 shares from restricted stock holders upon lapsing of stock restrictions in order for holders to satisfy personal tax liabilities. There were 899,025 shares related to restricted stock outstanding and unvested at December 31, 2007.

A summary of unvested restricted stock as of December 31, 2007, and changes during the year then ended, is as follows:

| Unvested restricted stock | Restricted stock | Weighted average grant-date fair value |
|----------------------------------|-------------------------|---|
| Unvested at January 1, 2007 | 597,608 | \$20.04 |
| Granted | 549,320 | 25.80 |
| Vested | (167,611) | 19.55 |
| Forfeited | (80,292) | 20.45 |
| Unvested at December 31, 2007 | 899,025 | \$23.61 |

As of December 31, 2007, the number and intrinsic value of restricted stock awards expected to vest is 862,669 and \$3,821,000, respectively. The total fair value of restricted stock that vested during the years ended December 31, 2007 and 2006 was \$4,448,000 and \$2,763,000, respectively. No restricted stock vested during the year ended December 31, 2005. The weighted average grant-date fair value of restricted stock granted during the years ended December 31, 2007, 2006 and 2005 was \$25.80, \$26.04 and \$14.52, respectively.

Stock appreciation rights

During 2007 and 2006, the Company granted SARs under the 2004 Stock Plan to certain members of management. The SARs will be settled in stock at the time of exercise and vest three and four years from the date of grant subject to the recipient's continued employment with the Company. The number of shares issued upon the exercise of the SARs is calculated as the difference between the share price of the Company's stock on the date of exercise and the date of grant multiplied by the number of SARs divided by the share price on the exercise date.

| Stock appreciation rights | Stock appreciation rights | Weighted average exercise price | Weighted average remaining contractual term (in years) | Aggregate intrinsic value (in thousands) |
|---------------------------------------|----------------------------------|--|---|---|
| Outstanding at January 1, 2007 | 207,791 | \$26.75 | | |
| Granted | 566,259 | 25.64 | | |
| Forfeited | (63,726) | 25.95 | | |
| Outstanding at December 31, 2007 | 710,324 | \$25.94 | 6.4 | \$1,820 |
| Expected to vest at December 31, 2007 | 697,474 | \$25.94 | 6.4 | \$1,466 |

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

No SARs were vested or exercisable as of December 31, 2007. The weighted average grant date fair value of SARs granted for the years ended December 31, 2007 and 2006 was \$9.17 and \$8.19, respectively. No SARs were granted during the year ended December 31, 2005. All outstanding SARs granted by the Company had a fair market value assigned at the grant date based on the use of the Black-Scholes option pricing model. Significant assumptions used in that model for SARs granted in 2006 are as follows:

| | Years ended December 31, | |
|----------------------------|--------------------------|--------|
| | 2007 | 2006 |
| Volatility | 42% to 46% | 40.97% |
| Dividend yield | 1.30% to 1.40% | 1.10% |
| Risk-free interest rate | 3.89% to 4.80% | 4.64% |
| Expected SAR life in years | 3 to 4 | 3 |

The assumptions used in the valuation of SARs are the same as described in the stock option section.

12. Stockholders' equity

Common stock

The Company has authorized 180,000,000 shares of common stock with a par value of \$0.001. As of December 31, 2007 and 2006, 50,450,675 and 49,205,522 shares were issued and 45,018,823 and 44,461,627 shares were outstanding, respectively.

Preferred stock

The Company has authorized 20,000,000 shares of preferred stock. No shares were issued and outstanding at December 31, 2007 and 2006. The Company's Board of Directors may fix the relative rights and preferences of each series of preferred stock in a resolution of the Board of Directors.

Dividends

On February 2, 2007, the Company's Board of Directors approved an increase to the Company's annual dividend from \$0.28 per share to \$0.34 per share and declared its first quarter dividend of \$0.085 per share, which was paid on March 15, 2007 to stockholders of record on February 28, 2007.

On May 1, 2007, the Company's Board of Directors declared a second quarter dividend of \$0.085 per share which was paid on June 15, 2007 to stockholders of record on May 28, 2007.

On August 3, 2007, the Company's Board of Directors declared a third quarter dividend of \$0.085 per share which was paid on September 14, 2007 to stockholders of record on August 28, 2007.

On October 31, 2007, the Company's Board of Directors declared a fourth quarter dividend of \$0.085 per share payable on December 14, 2007 to stockholders of record on November 28, 2007.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Treasury stock

The following table sets forth the changes in treasury stock for the years ended December 31, 2007 and 2006:

| (in thousands, except shares) | Plan date | Shares | Amount |
|--|---------------|-----------|----------|
| Balance as of January 1, 2006 | | 4,267,313 | \$60,902 |
| Stock purchased in connection with stock repurchase program | July 26, 2005 | 442,000 | 7,797 |
| Stock acquired via surrender of shares of restricted stock to the Company upon vesting for settlement of taxes | | 34,582 | 931 |
| Balance as of December 31, 2006 | | 4,743,895 | 69,630 |
| Stock purchased in connection with stock repurchase program | June 13, 2007 | 633,878 | 14,386 |
| Stock acquired via surrender of shares of restricted stock to the Company upon vesting for settlement of taxes | | 54,079 | 1,471 |
| Balance as of December 31, 2007 | | 5,431,852 | \$85,487 |

Stock repurchase program

On June 13, 2007, the Company's Board of Directors approved a stock repurchase program that authorized the Company to purchase up to \$35,000,000 of the Company's outstanding shares of common stock plus the aggregate amount of \$6,182,000 that was authorized but not used under the prior stock repurchase program as of that date. The prior program was terminated at that date and the new plan does not have an expiration date. The shares can be purchased in conjunction with a public offering of the Company's stock, from time to time on the open market or in privately negotiated transactions depending upon market conditions and other factors, all in accordance with the requirements of applicable law. In the year ended December 31, 2007, the Company repurchased 633,878 shares under this and the prior program at an average price per share of \$22.66. The Company accounts for purchases of treasury stock under the cost method, which resulted in an increase to the treasury stock balance of \$14,386,000 as of December 31, 2007. The remaining amount available to purchase stock under this plan was \$40,873,000 as of December 31, 2007.

In addition to the Company's stock repurchase plan, 54,079 shares, totaling \$1,471,000, were surrendered by restricted stock holders to satisfy their tax obligations due upon vesting of restricted stock during the year ended December 31, 2007.

13. Employee profit-sharing plan

The Company has a 401(k) profit-sharing plan (the "Plan") covering substantially all employees. Employees can contribute between 1% and 30% of their salaries in 2007, 2006 and 2005 and the Company matches 50% of qualified employees' contributions up to 6% of their salary. The Plan also provides for additional employer contributions to be made at the Company's discretion. Total matching contributions to the Plan for the years ended December 31, 2007, 2006 and 2005 were \$2,386,000, \$1,869,000 and \$1,517,000, respectively. There was no discretionary contribution by the Company to the Plan in 2007, 2006 and 2005.

14. Segment information

The Company has adopted SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information." SFAS No. 131 establishes standards for the reporting by business enterprises of information about operating segments, products and services, geographic areas, and major customers. The method of determining what information is reported is based on the way that management organizes the operating segments within the

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Company for making operational decisions and assessments of financial performance. The Company has determined that its reportable segments are those that are based upon internal financial reports that disaggregate certain operating information into six reportable segments. The Company's chief operating decision maker, as defined in SFAS No. 131, is its chief executive officer, or CEO.

In the first quarter of 2006, as part of the continued refinement of its business strategy, the Company identified two modifications to its method of operating and evaluating its business units, and as a result, the Company modified its segment reporting under SFAS No. 131. At the beginning of 2006, the Company combined its consulting and training businesses under one managerial structure and began reporting the results of operations of these business units to the CEO as a combined entity. Additionally, as a result of the increased significance of its subscription revenue, the Company began to report separately the results of this business unit, previously included with the software maintenance segment. Accordingly, during 2006 the Company amended its segment disclosure for 2005 to reflect these changes. Additionally, as a result of the change in segment reporting, the Company has modified the consolidated statements of operations to reflect the reclassification of subscription revenue and cost of revenue to be shown separately.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The CEO uses the information presented in these reports to make certain operating decisions. The CEO does not review any report presenting segment balance sheet information. The segment revenues and direct controllable costs, which include salaries, related benefits, third-party contractors, data expense and classroom rentals, for the years ended December 31, 2007, 2006 and 2005 were as follows:

| (in thousands) | License fees | Consulting and education services(1) | Analytic services(2) | Maintenance | Subscriptions | Other | Total |
|---|--------------|--------------------------------------|----------------------|-------------|---------------|---------|------------------|
| Year ended December 31, 2007 | | | | | | | |
| Revenue | \$37,569 | \$73,174 | \$18,202 | \$94,602 | \$25,389 | \$8,102 | \$257,038 |
| Direct controllable costs | 2,717 | 38,778 | 8,009 | 13,382 | 7,837 | 7,164 | 77,887 |

| Segment income | 25,598 | 25,845 | 2,056 | 62,556 | 5,664 | 326 | 122,045 |
| Corporate costs not allocated(3) | | | | | | | 6,226 |
| Operating expenses | | | | | | | 70,442 |
| Interest income, net | | | | | | | (915) |
| Other income, net | | | | | | | (6) |
| Income before provision for income taxes | | | | | | | \$ 46,298 |

- (1) This segment consists of consulting, installation and implementation, document imaging, customer training and other educational services.
- (2) This segment consists of donor prospect research and data modeling services.
- (3) Various corporate costs such as depreciation, facilities and IT support costs, stock-based compensation and amortization of intangibles arising from business combinations are not allocated to the segment income as management believes that the exclusion of these costs allows the Company to better understand and manage other operating expenses and cash needs.

BLACKBAUD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The Company also derives a portion of its revenue from its foreign operations. The following table presents revenue by geographic region based on country of invoice origin and identifiable and long-lived assets by geographic region based on the location of the assets.

| (in thousands) | Domestic | Canada | Europe | Pacific | Total |
|----------------------------------|-----------|----------|----------|---------|-----------|
| Revenue from external customers: | | | | | |
| 2007 | \$220,851 | \$13,978 | \$17,927 | \$4,282 | \$257,038 |
| 2006 | 165,230 | 9,732 | 13,552 | 2,866 | 191,380 |
| 2005 | 143,570 | 8,318 | 12,047 | 2,014 | 165,949 |
| Property and equipment: | | | | | |
| December 31, 2007 | \$ 16,276 | \$ — | \$ 536 | \$ 150 | \$ 16,962 |
| December 31, 2006 | 9,901 | — | 600 | 23 | 10,524 |

The Company generated license fee revenue from its principal products as indicated in the table below:

| (in thousands) | Years ended December 31, | | |
|--------------------------------|--------------------------|----------|----------|
| | 2007 | 2006 | 2005 |
| The Raiser's Edge | \$22,606 | \$20,293 | \$19,023 |
| The Financial Edge | 5,988 | 5,256 | 6,031 |
| The Education Edge and related | 2,633 | 2,312 | 1,442 |
| Blackbaud NetCommunity | 1,606 | 1,099 | 0 |
| The Patron Edge | 2,527 | 2,112 | 1,941 |
| Blackbaud Analytics | 806 | 1,041 | 987 |
| Other | 1,403 | 387 | 554 |
| Total license fee revenue | \$37,569 | \$32,500 | \$29,978 |

It is impractical for the Company to identify its other revenues by product category.

The table below sets forth the goodwill balances for each reportable segment as of December 31, 2007.

| (in thousands) | December 31, | |
|-----------------------------------|--------------|---------|
| | 2007 | 2006 |
| License fees | \$ 1,295 | \$ 429 |
| Consulting and education services | 12,923 | 832 |

Blackbaud, Inc.

**CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED
PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report on Form 10-K of Blackbaud, Inc. (the "Company") for the period ended December 31, 2007 as filed with the Securities and Exchange Commission on or about the date hereof (the "Report"), I, Marc E. Chardon, President and Chief Executive Officer, hereby certify, pursuant to 18 U.S.C. 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to my knowledge:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company as of, and for, the periods presented in the Report.

Date: February 29, 2008
